This volume offers a comprehensive and up-to-date overview of applied research efforts in the Middle East and North Africa (MENA). This region has not received due attention in the literature and this publication provides a much-needed contribution to the existing body of knowledge. The editor recruited a number of renowned scholars who either work in the MENA countries or have experience doing research in this region to contribute to this project. The selection of chapters ensured representation of applied linguistics efforts in North Africa, the Levant, and the Gulf. The book looks into language research within social and

educational MENA contexts. The final part of the book provides a forward-looking perspective about applied linguistics research and practices in the Middle East and North Africa. The book is primarily written for those interested in applied linguistics, particularly researchers, graduate students, and language professionals in the MNEA region.

language (EFL) reading tests at different levels of proficiency, this volume explores the relation between the complexity of written texts and the difficulty of reading comprehension tests. It brings together linguistic investigations into the text-inherent complexity of the tests and a study of the data derived from their administration to groups of Italian university students. The study of text complexity draws on corpus linguistics, text linguistics and systemic functional linguistics. Both quantitative and qualitative analyses are carried out on the language used in the reading texts and in the related tasks that make up the corpus of tests. The assessment of

test difficulty, on the other hand, is informed by research on language testing, and, in particular, by findings and methodologies of Classical Test Theory and Item Response Theory. Relevant aspects of these theories are used to analyze and interpret both the data obtained from the administration of the tests and the data collected by means of feedback questionnaires completed by test takers. The application of such diverse methodologies and the subsequent comparison of the results of the analyses has brought out interesting correlations between text-inherent complexity, perceived test difficulty and actual test difficulty. Updated annually and packed with

Navigating the Transition from High School to College for Students with Disabilities

What English Language Teachers Need to Know II
DICES

Moving beyond the 'Web 2.0' and 'digital native' rhetoric, this book addresses the complex experiences of learners of English as a foreign language (EFL) in a world embedded with interactive and participatory technologies. Adopting a sociocultural perspective, it investigates EFL learners' behaviours concerning digital technology, and guides exploration into their contextually mediated choices and learning practices in the '2.0' era. The argument is developed

Online Library lelts English Language Exam Webs

on the basis of the findings of a mixed sequential study that focused on 1485 Chinese undergraduates ' use and non-use of online tools and applications outside the English classroom. Particular attention is paid to the role of context and agency when understanding their learning choices and behaviours in the context of digital technology. In particular, the book acknowledges the explanatory power of agency in the minority instances of ' good practices ' among these EFL learners. At the same time it demonstrates that for most learners, use of the current web is limited and mostly non-interactive. The barriers to ' 2.0 ' transfer are largely contextual and the so-called ' communicative opportunities ' and ' participatory culture ' in particular did not fit into the learners ' sociocultural context of

Online Library lets English Language Exam Webs

(language) learning. Overall, the compelling argument proposes that the technology-facilitated changes in EFL practices are a ‘bottom up’ process that is taking place in day-to-day situations and constrained by the learning context within which the learner is situated. Based on these arguments, the book provides a framework that challenges the existing beliefs about (language) learning with online technology, and that contributes to our understanding of how context mediates EFL learners’ behaviours surrounding digital technologies. It is a valuable resource for teachers, researchers and policy makers, providing them with insights into using digital technology to stimulate ‘good learning practices’ outside the classroom.

freshmen • Campus safety and security • Thumbnail descriptions of faculty • Requirements for a degree • Athletic facilities • Extracurricular activities • E-mail addresses • College fax numbers and web sites • Admissions Contacts • and more

Schools are rated according to Barron's reliable competitiveness scale, which ranges from "Noncompetitive" to "Most Competitive." The book's tinted pages section presents an Index of College Majors that lists all available major study programs at every school. Also profiled are excellent colleges in Canada and several other countries, as well as brief profiles of religious colleges, and American colleges based in foreign countries.

The Second Language Learning Processes of Students with Specific

Online Library Ielts English Language Exam Webs

Learning Difficulties is the only recent book available to offer a detailed and in-depth discussion of the second language learning processes of students with specific learning difficulties (SpLDs). It summarizes research advances in the fields of cognitive and educational psychology and integrates them with recent studies in the area of second language acquisition (SLA). Thus the book is relevant not only to readers who are particularly interested in the role of specific learning difficulties in learning additional languages, but also to those who would like to understand how individual differences in cognitive functioning influence SLA. The book focuses on four important areas that are particularly relevant for language learners with SpLDs: the processes of SLA in general and the development

of reading skills in particular, the effectiveness of pedagogical programs, the assessment of the language competence of students with SpLDs and identifying SpLDs in another language. The book also views learners with SpLDs in their social and educational contexts and elaborates how the barriers in these contexts can affect their language learning processes. This is an excellent resource for language teachers, students, and researchers in the areas of second language acquisition and applied linguistics. English Learning in the Digital Age The Global-Local Interface and Hybridity

The British Council has been flexible in moving its attention and resources to match new UK priorities, particularly in the Islamic World and the Far East. It continues to implement numerous and extensive internal changes aimed at increasing its effectiveness and efficiency, though delivery of projects and change has been uneven across its global network. The Council's approach to measuring its performance is well developed. Its scorecard shows positive results across most aspects of activity, including audience sizes, customer satisfaction scores, and the perceptions of stakeholders and partners. The Council increasingly depends on contributions from external partners and commercial sponsors, to expand its activities and impacts. This will mean reversing the downward trend in

Online Library lets English Language Exam Webs

sponsorship and other contributions of the last six years. The Council has recognised the importance of good customer service, but it is not yet meeting the standards it sets for itself across the whole network. It also needs to implement a customer database to enable it to track customer contacts and better understand its audiences. The British Council's £ 181 million English language teaching and examinations business has a strong reputation and more than covers its costs. The teaching operation also supports UK public diplomacy, notably by helping overseas governments expand the teaching of English in their schools and colleges. But the teaching business has a high cost base, charges premium prices, and has limited reach outside overseas capital cities. Although there has been an increase in the numbers of students taught, the network of teaching centres has contracted in recent years. To continue to grow the business, the

Online Library lets English Language Exam Webs

Council will need to put into action its ideas about alternative lower-cost ways to deliver good quality teaching.

The Routledge Handbook of Corpus Linguistics provides a timely overview of a dynamic and rapidly growing area with a widely applied methodology. Through the electronic analysis of large bodies of text, corpus linguistics demonstrates and supports linguistic statements and assumptions. In recent years it has seen an ever-widening application in a variety of fields: computational linguistics, discourse analysis, forensic linguistics, pragmatics and translation studies. Bringing together experts in the key areas of development and change, the handbook is structured around six themes which take the reader through building and designing a corpus to using a corpus to study literature and translation. A comprehensive introduction covers the historical development of the field and its

growing influence and application in other areas. Structured around five headings for ease of reference, each contribution includes further reading sections with three to five key texts highlighted and annotated to facilitate further exploration of the topics.

The Routledge Handbook of Corpus Linguistics is the ideal resource for advanced undergraduates and postgraduates.

This book examines translanguaging pedagogy in Asia's English-medium instruction (EMI) higher education. It presents an overview of concepts and common issues, and case studies from specific contexts in Asia. The book first interrogates macro-level English-medium instruction policies and implementation from English as a lingua franca (ELF) perspectives. Following this, implications of English as a lingua franca on English-

medium instruction pedagogy will be explored, with a theoretical framework of 'translanguaging pedagogy' developed. The book concludes with a discussion on translanguaging and how the concept contributes to English-medium instruction in Asia. Through the book, the content focuses on the specificity of each Asian English-medium instruction context from a translanguaging lens. English-medium instruction policies and translanguaging practices from China, Japan, Taiwan, Thailand, and Vietnam are explored, and opportunities and challenges related to translanguaging pedagogy in Asian English-medium instruction classrooms are examined.

Over the years, various approaches to validation have emerged in psychological and educational assessment research, which can be classified into traditional approaches and modern approaches. Traditional approaches view validity as a multicomponential concept including, for example, content, construct, and predictive

Online Library Ielts English Language Exam Webs

validity, while modern approaches conceptualize it as a unitary concept evaluated through argumentation. Drawing on the modern approach, this book builds a validity argument for an International English Language Testing System (IELTS) listening test sample. The book provides some insights into the listening sub-skills that the test engages, the psychometric dimensionality of the test, variables that predict item difficulty parameters, bias across age, nationality, test experience, and gender, as well as predictive-referenced

evidence of validity. A variety of techniques including the Rasch model and structural equation modelling are used to answer the research questions and to build a validity argument framework; this argument organizes the thematically related findings into a coherent treatment of the validity of the listening test. The book presents the first treatment of validity argument and related analytical tools in one volume and maps the psychometric/statistical analysis tools onto the validity argument framework. It also provides an extensive literature

review of listening comprehension, validation, and psychometric modeling and proposes both methods for developing and validating self-assessment instruments and novel approaches to improving the quality of language assessments.

education. This research handbook provides higher education administrators, student affairs personnel, institutional researchers, and faculty with an integrated volume of theory, method, and application.

The chapters in this volume seek to bring hybrid language practices to the center of discussions about English as a global language. They demonstrate how local linguistic resources and practices are involved in the refashioning of identities in a variety of cross-cultural and geographical contexts, and

illustrate hybridity as an enactment of resistance and creativity. Drawing on a variety of disciplines and ideological perspectives, the authors use contexts as diverse as social media, Bollywood films, workplaces and kindergartens to explore the ways in which English has become a part of localities and social relations in ways that are of significant sociolinguistic interest in understanding the dynamics of mobile cultures and transcultural flows.

Designed for pre-service teachers and teachers new to the field of ELT, Volume II and its companion are companion textbook, Volume I, are volumes organized around the key question: What do teachers need to know and be able to do in order for their students to learn English?

Volume I covers the characteristics of the context in which teachers work, how English works and how it is learned, and the teacher ' s role in the larger professional sphere of English language education. Volume II covers the three main facets of teaching:

planning, instructing, and assessing. The focus throughout is on outcomes, that is, student learning. The texts work for teachers across different contexts (countries where English is the dominant language, one of the official languages, or taught as a foreign language); different levels (elementary/primary, secondary, college or university, or adult education), and different learning purposes (general English, workplace English, English for academic purposes, or English for specific purposes).
