

## Imron Paint Colors

*In this provocative and eye-opening classic of investigative journalism, the #1 New York Times bestselling author and “America’s best true-crime writer” (Kirkus Reviews), Ann Rule, explores the nearly twenty-year long search for America’s most prolific and horrifying serial killer. In 1982, the body of Wendy Coffield is discovered floating near the sandy shore of Washington’s Green River. Authorities have no idea that this tragic and violent death is only the beginning of a string of murders that will rock and terrify the Seattle area for two decades. With her signature riveting prose and in-depth research, Ann Rule takes us behind the scenes of the search for the Green River Killer, a terrifying specter who ritualistically killed young women and eluded authorities for years. From seeking the help of incarcerated serial killer Ted Bundy to Ann Rule’s horrifying realization that the killer she was writing about had attended her book signings, Green River, Running Red is the suspenseful and unforgettable “definitive narrative of the brutal and senseless crimes that haunted the Seattle area for decades” (Publishers Weekly).*

How to Build a Pro Streetbike

Field & Stream

Whether it’s a big-bore, high-end custom sportbike you’re after, or a naked, bare knuckles streetfighting drag racer, this book has the goods for getting you there. In three different scenarios, the nation’s top builders give blow-by-blow instructions for completely rebuilding three popular streetbikes -- from performance modifications and exhaust systems to flawless finishes and detail work. Focusing on highly customized Hayabusa drag bikes, including a slammed and lowered Suzuki GSX1300R Hayabusa, John Dantzler of the Charlotte, North Carolina, shop Two Wheel Customs outlines the suspension and engine modifications that the serious street and quarter-mile racer can make. He takes a salvaged, late-model four-cylinder street machine and transforms it into the kind of machine that both professional stunt riders and corner-carving enthusiasts favor. Next, author Mike Seate covers the details on constructing and installing popular modifications -- everything from engine crash guards and wheelie bars to motocross-style handlebars and bikini fairings -- while stunt riders and streetfighter builders from the United States and Europe weigh in with tips and advice. Last but not least, the builders at Wisconsin’s Patrick’s Performance and South Carolina’s Coastal Motorcycles provide a step-by-step account of the construction of two high-end custom sportbikes -- transforming a Yamaha YZF R-1 and a Suzuki GSX-R 1000 into the kind of machines that are eye-popping everywhere-on the streets or on the motorcycle show circuit.

*When the J. Paul Getty Museum received twenty-eight sculptures created by a who’s who of twentieth-century artists, it took on the responsibility for their preservation, interpretation, and long-term stewardship. Donated from the private collection of the late film producer Ray Stark and his wife, Fran, the sculptures thrust the Getty into the evolving field of outdoor sculpture conservation. To honour its responsibility, the Museum embarked on new research into the collection’s materials-bronze, lead, ceramic, and painted metal-and construction techniques. This book presents the conservators’ comprehensive account of the process. Chapters are organized around phases of the project rather than individual sculptures and address key issues facing anyone charged with caring for works of art displayed outdoors, including: organization and planning; installation and grounds management; scientific analyses; collaborating with artists; structural issues; mounts, paint, coatings, and patinas; and long-term maintenance.*

Take a holistic approach to contemporary interior design. The interior design process is changing. In order to create truly engaging work, designers are developing a deeper and broader understanding of how design theory, research, and existing practice can help them make better decisions. This inquiry provides answers on how design is experienced, and its impact over time. At the same time, the profession is becoming increasingly collaborative. Designers today work closely with other professionals—such as architects, landscape designers, product designers, anthropologists, and business consultants—in new ways, engaging an expanding network of experts in the design process more than ever before. Written by renowned scholars Joy Dohr and Margaret Portillo, the book brings interior design theory and research to life utilizing a narrative inquiry approach that offers highly accessible coverage of the interior design world as it exists today. By looking at real-life stories that demonstrate what makes a memorable design, coupled with photographs and drawings to further illustrate these concepts, this book is a must-read for anyone interested in keeping abreast of interior design in the twenty-first century.
