Do you eat out when you could eat less expensively at home? Money Tip #3: Establish Financial Goals List future expenditures: What future expenses do you anticipate? (such as schooling, purchasing a home, replacing a car, etc). Consider future career and family changes: Are you considering starting your own business, serving in a ministry, getting married, or starting a family? What are realistic expectations money saving goals? Money Tip #4: Take Action with Your Finances Pay extra on your debts and stop feeding your debt through unnecessary habits. perspective should I have of money? Myth: "If you live a godly, Christian life, you will experience financial gain and prosperity." Truth: According to God's Word, godliness is not a means to financial gain. The Bible calls this "a different doctrine" taught by false teachers. Myth: "Money is the root of all evil." Truth: No, according to the Bible, it is the "love of money" that is a root of evil. (1 Timothy 6:10). Money can be used for great good. Myth: "If I ever have enough money and earthly possessions, I will be happy." Truth: Happiness does not spring from your financial situation nor does it come from possessions. "His master replied, Well done, good and faithful servant! You have been faithful with a few things; I will put you in charge of many things. Come and share your master's happiness!" (Matthew 25:23). Finding true financial freedom involves more than having enough money to bask in the comfort of a prosperous lifestyle. It's more than learning to budget expenses, to save regularly, to invest wisely. True financial freedom is being content with what God gives you. And contentment is a matter of the heart! defines essential terms--from general ledger to chart of accounts--and, more importantly, discusses their applications in everyday business. It also introduces managers to popular accounting software programs and their use in tracking and allocating funds in the organization. Business Mathematics, Third Edition provides the step-by-step explanation of principles, practical aspects, and importance of business mathematics. This edition is organized into six sections encompassing 14 chapters that cover related topics of the metric system, no-fault insurance, individual retirement plans, charge account plans, home mortgages, and NOW accounts. Section 1 gives a thorough review of the fundamental processes, while Section 2 deals with buying and selling, the first factors considered in calculating a firm's profit or loss. Section 3 discusses the operating expenses that reduce the profit or increase the loss from buying and selling activities, and the actual calculation of net profit or loss. Sections 4 and 5 consider the principles of interest as a form of additional income or expense, as well as the investment in stocks, bonds, mutual funds, and other areas as still another source of income or expense. Section 6 describes the procedures for summarizing and analyzing data. The review part at the

end of each section lists the important terms and reinforces the major principles learned in the unit. The summary problems in the Unit Review are intended as self-tests and should serve as effective review for examinations. This book will be of great value to business mathematicians, economists, and the general public who are interested in investments.

developed to satisfy South Carolina ' s 30-hour Unit II requirement. The course also fulfills the Real Estate Commission ' s objective of giving South Carolina real estate licensees a carefully developed reinforcement of key real estate brokerage principles, concepts, and practices necessary to initiate a productive, professional career in real estate. Beyond an initial review of key principles, the SCAP Program takes on a further examination of essential skills and practices that will be necessary to meet client and customer transactional requirements within South Carolina ' s legal framework. Such skills examined include compliance with South Carolina agency and disclosure laws; how to properly represent and disclose property characteristics; and an intensive look at South Carolina transaction contracts: listings; the sales contract; options and contracts for deed. Beyond its agency and contracts topics, the SCAP further examines the other key subjects required by the Commission: ethics; handling trust funds; regulatory compliance; and critical cornerstones of professional practice. Finally, the last two modules of the SCAP program examine the various methods used to measure real property; price and appraise real property; and evaluate how real property is evaluated as a professional investment. These considerations encompass income properties as well as residential non-income property, and include pre-tax analysis as well as after-tax analysis. Taken as a whole, the South Carolina Advanced Real Estate Principles program is designed to deepen the new licensee ' s understanding of how brokerage works in actual practice – and how it is supposed to be undertaken in view of today ' s standards of professionalism, ethics, and legal compliance.

Teachers see many opportunities for freelance work but is it really possible to make a living as a freelancer in the long-term? In this book, Janine Bray-Mueller has encapsulated some key lessons on pricing, learned during her career as a freelancer. In a competitive market, pricing is problematic, particularly in uncertain economic times. Establishing a sustainable business relies on charging enough to pay not just for immediate living expenses, but also to update and extend your teaching skills, and cover costs such as holidays, sickness and pension provision. Understanding why many teachers are trapped in a position of underearning is the first step to escape. Many teachers can be their own worst enemy if they lack self-confidence or undervalue their skills. Familiarity with local market conditions and competitors' prices is important, but the 'going rate' is not necessarily an appropriate rate to charge. Janine explains how to balance your business on three pillars: consultancy (one-to-one teaching), training (seminar workshops) and leverage (information products). This concept will enable you to build up a sustainable teaching business. Various pricing strategies are described with advice on how to select those which are appropriate for different types of products, services and customers. Specialisation is a key strand in establishing a sustainable level of pricing. You may be under constant pressure to discount prices, but Janine makes clear the

dangers in doing so. She also deals with when and how to increase prices to avoid a return to underearning. Value-based pricing is an approach which Janine has applied very successfully to freelance teaching, and this is explained fully with valuable practical advice on how it can give you a more flexible approach to pricing. Pricing Matters is full of careful explanations of key business concepts and practical advice on applying them in the context of freelance work. Step by step instructions are given on how to identify both your personal and business costs. With the aid of this book, you can calculate your available teaching time, so that you can establish your resentment number and price range. The worksheets and checklists included will help you to clarify your strategy and position yourself in the market. Janine presents effective ways to manage pricing in an entertaining way and makes them both meaningful and memorable for the freelance teacher. Her book contains all you need to know to overcome your demons, price your teaching services effectively and establish a financially sound career which is sustainable in the long-term.
