At present, the old techniques in the stock market have become almost ineffective, because with the advent of discount broker houses and the increase in the participation of retail investors in options and delivery in the market, the time has gone when the investors used to buy large amounts of a stock and held for 15 to 20 percent return. At present, most retail investors are either trading on intra-day, making a profit on a single day or making money in a call option

of a seven-day short expiry in an option, or taking a small profit in a swing trade, leading to more small range market fluctuations. The present book written in this context is the only one of its kind in which the author has made a meaningful effort to share many things in few words by incorporating intra-day, option trade and swing trade. The author has shared his 15 years of trading experience through 41 tips, which are essential for all investors—big and small—seeking to earn profits in the stock market.
