In 2000, the Millennium Development Goals set out targets aimed at creating a safer, more prosperous, and more equitable world. If these goals were to be achieved, children's lives would indeed be transformed. In this collection, achievements against these targets are identified, with each contributor examining the progress made in early years provision in Australia, China, England, Greece, the Netherlands,

Portugal, South Africa, and Sweden. They highlight the priorities and agendas of their respective governments, and focus on the trends and issues which are particularly relevant to each situation, thereby revealing the social and educational inequalities that persist across countries. A common theme running through this volume concerns the political tensions that arise when governments and educators hold fundamentally different views about the nature and purpose of early years education and the needs of children and families. It is clear that although the past two decades have seen many

changes in attitude towards the importance of the early years of life; politically, economically, and environmentally, much still remains to be done if the Millennium Development Goals for young children and their families are to be fully met. Despite this, this volume demonstrates that those who work in this area continue to experience a deep concern for the well-being of young children, which transcends cultures, frontiers, and political and sectarian divides. This book was originally published as a special issue of the International Journal of Early Years Education. A fresh retelling by Byron Barton of the well-loved

story of the little red hen who grows grain, threshes wheat, and feeds her chicks--all by herself, without any help from her lazy friends. Mr. Barton's simple words, bold images, and imaginative use of color have made his many picture book perennial favorites with young children.

"Why are you learning Zulu?" When Mark Sanders began studying the language, he was often asked this question. In *Learning Zulu*, Sanders places his own endeavors within a wider context to uncover how, in the past 150 years of South African history, Zulu became a battleground for issues of property,

possession, and deprivation. Sanders combines elements of analysis and memoir to explore a complex cultural history. Perceiving that colonial learners of Zulu saw themselves as repairing harm done to Africans by Europeans, Sanders reveals deeper motives at work in the development of Zulu-language learning—from the emergence of the pidgin Fanagalo among missionaries and traders in the nineteenth century to widespread efforts, in the twentieth and twenty-first centuries, to teach a correct form of Zulu. Sanders looks at the white appropriation of Zulu language, music, and dance in South African culture,

and at the association of Zulu with a martial masculinity. In exploring how Zulu has come to represent what is most properly and powerfully African, Sanders examines differences in English- and Zulu-language press coverage of an important trial, as well as the role of linguistic purism in xenophobic violence in South Africa. Through one person's efforts to learn the Zulu language, *Learning Zulu* explores how a language's history and politics influence all individuals in a multilingual society.

This book argues for the essential use of drawing as a tool for science teaching and learning. The authors are working in schools, universities, and continual science learning (CSL) settings around the world. They have written of their experiences using a variety of prompts to encourage people to take pen to paper and draw their thinking – sometimes direct observation and in other instances, their memories. The result is a collection of research and essays that offer theory, techniques, outcomes, and models for the reader. Young children have provided evidence of the perceptions that they have accumulated from families and the media

before they reach classrooms. Secondary students describe their ideas of chemistry and physics. Teacher educators use drawings to consider the progress of their undergraduates' understanding of science teaching and even their moral/ethical responses to teaching about climate change. Museum visitors have drawn their understanding of the physics of how exhibit sounds are transmitted. A physician explains how the history of drawing has been a critical tool to medical education and doctor-patient communications. Each chapter contains samples, insights, and where applicable, analysis techniques. The chapters in this book should be helpful to researchers and teachers alike, across the teaching and learning continuum. The sections are divided by the kinds of

Can Language be Planned?

The earliest of the four Gospels, the book portrays Jesus as an enigmatic figure, struggling with enemies, his inner and external demons, and with his devoted but disconcerted disciples. Unlike other gospels, his parables are obscure, to be explained secretly to his

followers. With an introduction by Nick Cave "A masterpiece of contemporary Bible translation and commentary."—Los Angeles Times Book Review, Best Books of 1999 Acclaimed for its masterful new translation and insightful commentary, The David Story is a fresh, vivid rendition of one of the great works in Western literature. Robert Alter's brilliant translation gives us David, the beautiful, musical hero who slays Goliath and, through his struggles with Saul, advances to the kingship of Israel. But this David is also fully human: an ambitious, calculating man who navigates his life's course with a flawed moral vision. The consequences for him, his family, and his nation are tragic and bloody. Historical personage and full-blooded

imagining, David is the creation of a literary artist comparable to the Shakespeare of the history plays. Cry the Beloved Country is the deeply moving story of the Zulu pastor Stephen Kumalo and his son Absalom, set against the background of a land and a people riven by racial injustice. Remarkable for its contemporaneity, unforgettable for character and incident, Cry the Beloved Country is a classic work of love and hope, courage and endurance, born of the dignity of man.
