quality management  
approaches that  
accentuated the

Bookmark File  
PDF Iso 17020  
2012

quality of production processes and quality management issues. In the last decade, international standards in the quality management field were published with the aim to provide the customer a trust in the supplier's

Bookmark File  
PDF Iso 17020  
2012

organization. The quality standardization formation accentuated the issue of services rendered to the customer, those which he could not examine and inspect by comparing to benchmark results

Bookmark File  
PDF Iso 17020  
2012

or by comparing between different suppliers (for example compliance with reliability requirements or laboratory's test results). For this type of services, international standards that were more meticulous were developed,

# Bookmark File PDF Iso 17020 2012

referring to the organization's form of management and its professional capabilities, which included the level of workforce, instrumentation and environmental conditions. Two concepts were developed in order to discriminate

Bookmark File  
PDF Iso 17020  
2012

between fields that only included the organizational management system and those that also required proof of professional capabilities-  
Certification and Accreditation  
Certification refers to demands from the management-

Bookmark File  
PDF Iso 17020  
2012

organizational framework. In order to acquire certification the existence and maintain of a compatible quality system is inspected. Accreditation refers to demands from the quality system and in addition the proof of professional

Bookmark File  
PDF Iso 17020  
2012

capabilities of the organization and its employees. The accreditation is given to laboratories, to bodies that grant certification to organizations that supply products and services, to bodies that certificate the professional level of

Bookmark File  
PDF Iso 17020  
2012

personnel, to bodies that confirm organizations standing up to environmental, safety and health requirements and to bodies that carry out inspections. In order that organizations in a country will be able to prove their compatibility with

# Bookmark File PDF Iso 17020 2012

the international standards, the country should develop an infrastructure that includes a National Accreditation Body (NAB). This body will accredit the certification bodies operating in the country. The certification bodies

# Bookmark File PDF Iso 17020 2012

should be a "third party" that will inspect certain requirements from various organizations. As an example a certification body for manufacturing and service industries audits compliance to ISO 9001. Several certification bodies

Bookmark File  
PDF Iso 17020  
2012

for this purpose  
operate in Israel:  
Certification  
Department at the  
Standards Institution  
of Israel [SII],  
RONET ICS Ltd.,  
IQC, DNV [Technion  
R&D Ltd.], GESCO  
Ltd., SKAL. A  
customer that  
approaches a  
supplier that

# Bookmark File PDF Iso 17020 2012

received certification from a certification body that has been accredited by a NAB can trust the supplier's quality management system.

Nevertheless, the customer should check if he is receiving a product (or service) that

# Bookmark File PDF Iso 17020 2012

complies with the specifications agreed with the supplier. The NAB accredits all kind of certification bodies and laboratories according to the appropriate requirements. The NAB operates according to ISO 17011. Companies

# Bookmark File PDF Iso 17020 2012

that provide inspection services should comply with ISO 17020(2012). The Inspection body performs inspections according to the requirements in a validated reference document that has been agreed upon with its customer or

# Bookmark File PDF Iso 17020 2012

that is mandated by local regulations.

The accredited inspected body has the right to grant a certification to the inspected customer's site or project. In 1995 EN 45004 was published in included the requirements for

Bookmark File  
PDF Iso 17020  
2012

imparting trust in an organization that performs an inspection, it replaced the previous ISO Guide 39(1988) .

Nevertheless, in that period the discrimination between accreditation and certification had not

# Bookmark File PDF Iso 17020 2012

yet been determined and the term "Acceptance" was in use. In 1998, on determining the discrimination and the determination that the inspection bodies will also undergo accreditation- the ISO 17010(1998) were developed.

# Bookmark File PDF Iso 17020 2012

This standard is influenced by EN 45003(1995) or its equivalent ISO Guide 58(1993) which refers to the accreditation body operating for laboratories, and also by ISO Guide 61(1996) that refers to the accreditation body for certification

# Bookmark File PDF Iso 17020 2012

bodies. The process of accreditation, i.e. if the inspection of management system processes and employees professionalism complies with requirements, has received the term "Conformity Assessment". The ISO committee that

# Bookmark File PDF Iso 17020 2012

dealt with this issue (CASCO) has prepared several guiding documents. The "tools" of the conformity inspection, according to the historical sequence of those documents are: an inspection, an examination, an audit, a certification,

# Bookmark File PDF Iso 17020 2012

and an accreditation. These tools can serve first and second parties, regulators and everybody else that presents requirements for conformity. The segmentation concerning the capability of applying the tools is

# Bookmark File PDF Iso 17020 2012

shown in Table 1,  
where the NAB is  
indicated as third

supervising fire  
extension systems  
and other safety  
devices, schools, surveillance,  
supervising  
measurement  
performance, etc.,.  
The requirements  
for accreditation and  
for not settling only  
for the certification  
of inspection bodies,

Bookmark File  
PDF Iso 17020  
2012

stems from the fact that it is difficult to install trust in an inspection that has been carried out, as it is impossible to verify it by carrying it out by performing a second time under the same conditions and with the same inspection body or with another one.

# Bookmark File PDF Iso 17020 2012

This is the reason underlying the decision that an inspection body should stand up to an accreditation similar to testing and calibration laboratories[] as it strongly depends on the performers[] professionalism. In light of the

Bookmark File  
PDF Iso 17020  
2012

requirements and partial interpretations published so far, the difference between an inspection body and a testing/calibration laboratory is not quite clear. So far, part of the inspecting work has only been carried

# Bookmark File PDF Iso 17020 2012

out by laboratories.  
ISO 17020 relates  
to activities of  
bodies whose tasks  
may include  
inspection of  
materials, products,  
facilities, plants,  
work processes,  
service operations  
and decisions on  
the level of  
conformity with

# Bookmark File PDF Iso 17020 2012

defined

requirements. The inspection usually relates to all the life cycle of items including the steps of design and recycling or disposal. The results of the inspection are reported to the customers and

Bookmark File  
PDF Iso 17020  
2012

whenever law  
requires the  
inspection the  
results will be  
reported also to the  
relevant authorities.  
The definition of  
inspection according  
to ISO 17020  
involves  
professional  
judgment for  
conformity

Bookmark File  
PDF Iso 17020

authorities.

The safety case  
(SC) is one of the

Bookmark File  
PDF Iso 17020  
2012

railway industry's most important deliverables for creating confidence in their systems.

This is the first book on how to write an SC, based on the standard EN 50129:2003.

Experience has shown that preparing and

Bookmark File  
PDF Iso 17020  
2012

understanding an SC is difficult and time consuming, and as such the book provides insights that enhance the training for writing an SC. The book discusses both "regular" safety cases and agile safety cases, which avoid too much

# Bookmark File PDF Iso 17020 2012

documentation,  
improve  
communication  
between the  
stakeholders, allow  
quicker approval of  
the system, and  
which are important  
in the light of rapidly  
changing  
technology. In  
addition, it  
discusses the

# Bookmark File PDF Iso 17020 2012

necessity of  
frequently updating  
software due to  
market

requirements,  
changes in  
requirements and  
increased cyber-  
security threats.

After a general  
introduction to SCs  
and agile thinking in  
chapter 1, chapter 2

# Bookmark File PDF Iso 17020 2012

describes the majority of the roles that are relevant when developing railway-signaling systems. Next, chapter 3 provides information related to the assessment of signaling systems, to certifications based on IEC 61508 and

Bookmark File  
PDF Iso 17020  
2012

to the authorization of signaling systems. Chapter 4 then explains how an agile safety plan satisfying the requirements given in EN 50126-1:1999 can be developed, while chapter 5 provides a brief introduction to safety case patterns

# Bookmark File PDF Iso 17020 2012

and notations.

Lastly, chapter 6 combines all this and describes how an (agile) SC can be developed and what it should include. To ensure that infrastructure managers, suppliers, consultants and others can take full

Bookmark File  
PDF Iso 17020  
2012

advantage of the agile mind-set, the book includes concrete examples and presents relevant agile practices. Although the scope of the book is limited to signaling systems, the basic foundations for (agile) SCs are

Bookmark File  
PDF Iso 17020  
2012

clearly described so that they can also be applied in other cases.
