Margaret Roach worked at Martha Stewart Living Omnimedia for 15 years, serving as Editorial Director for the last 6. She first made her name in gardening, writing a classic gardening book among other things. She now has a hugely popular gardening blog, "A Way to Garden." But despite the financial and professional rewards of her job, Margaret felt unfulfilled. So she moved to her weekend house upstate in an effort to lead a more authentic life by connecting with her garden and with nature. The memoir she wrote about this journey is funny, quirky, humble--and uplifting--an Eat, Pray, Love without the travel--and allows readers to live out the fantasy of quitting the rat race and getting away from it all.

In Amber's Summer, a young teen girl had hoped to escape her divorcing parents by spending the summer of 08 at her best friend's beach house, but instead struggles through a greater tragedy and is both betrayed and helped by two boys. Why is our sense of smell so under-appreciated? We tend to think of smell as a vestigial remnant of our pre-human past, doomed to gradual extinction, and we go to great lengths to eliminate smells from our environment, suppressing body odour, bad breath and other smells. Living in a relatively odour-free environment has numbed us to the importance that smells have always had in human history and culture. In this major new book Robert Muchembled restores smell to its rightful place as one of our most important senses and examines the transformation of smells in the West from the Renaissance to the beginning of the 19th century. He shows that in earlier centuries, the air in towns and cities was often saturated with nauseating emissions and dangerous pollution. Having little choice but to see and smell faeces and urine on a daily basis, people showed little revulsion; until the 1620s, literature and poetry delighted in excreta which now disgust us. The smell of excrement and body odours were formative aspects of eroticism and sexuality, for the social elite and the popular classes alike. At the same time, medicine explained outbreaks of plague by Satan's poisonous breath corrupting the air. Amber, musk and civet came to be seen as vital bulwarks against the devil's breath: scents were worn like armour against the plague. The disappearance of the plague after 1720 and the sharp decline in fear of the devil meant there was no longer any point in using perfumes to fight the forces of evil, paving the way for the olfactory revolution of the 18th century when softer, sweeter perfumes, often with floral and fruity scents, came into fashion, reflecting new norms of femininity and a gentler vision of nature. This rich cultural history of an under-appreciated sense will be an appeal to a wide readership.

Anna is a freshly divorced poet of moderate success. But thanks to her ex, she's facing a huge stack of bills, and she's in over her head. She needs a job. The only offer she's gotten is to teach a poetry class over the summer. It won't earn her much money, and when she arrives for the first class, she learns that her students are mostly older people looking for something to do. But when Anthony—a strong, sexy man with dark hair and captivating eyes—walks into the classroom, she feels an instant connection to him. His relaxed manner and genuine honesty put her at ease, but the intensity lurking underneath is what really draws her in. She knows it's too soon after her divorce, and she knows she should get her life in order before she plunges herself into another relationship—but with a man like Anthony, she's finding it his fiery passion very hard to resist. Smell is the most emotional and evocative of our senses: it can bring back memories faster and with more immediacy than a photograph – so why is it so little understood? Armed with a hungry curiosity and a willingness to self-experiment, author Barney Shaw goes in search of the hidden meanings of smells. Using plain words to describe what he finds, he investigates the chemistry, psychology, history and future of this underappreciated sense. Journeying around boatyards, perfume shops and memories, Shaw opens your nose to the world, breaking down “chords” of smells into their component notes and through them revealing new ways of understanding the spaces through which we move. An investigation into the biology, psychology and history of smell, and a search for effective ways to put into words scents that we instantly relate to, but find strangely ineffable, *THE SMELL OF FRESH RAIN* includes a 200-entry thesaurus of succinct descriptions of common smells.

"Some people practice Tough Love," Mike Preston says. "I practice Tough Apathy. Which means, I don't care. But, I don't care very deeply." That was the spark that started the fire that would eventually rage out of control and turn into the bold new cure for Personality Disorders—"Shut The Hell Up Therapy." It's like Denial, only more aggressive," Preston says. "Rather than ignoring the problem, you hose it down and send it running." (Preston is not currently a Mental Health Professional. Hunter's Moon

We didn't always get it right or love each other at the same time. But we got it right every blue moon. This is my thank you letter, apology letter, love letter, and good bye letter. Sometimes the journey of life takes a few strange turns. Meg Jennings used to be a reporter, but now she's a fugitive hiding out at a lakefront rental in the small town of Alpine Grove, waiting for the heat to die down. Meg shares the house with Riley O'Shea, who may or may not be her stepbrother, and his dog, Zelda. When Meg is zapped by a woman with a stun gun and thrown into a van, everything changes. Although getting to Alpine Grove was complicated, getting out might be worse. Faced with difficult choices, Meg and Riley end up on a journey to find a mysterious retreat located somewhere in the Northwest. The trip takes them from tiny hamlets to big cities where they encounter everything from digestively challenged buzzards to tone-deaf musicians dressed like Klingons having a fashion disaster.

Divorced, in debt and unemployed, Olivia Clarke figured she had nothing to lose if she left California. She was sick of the plastic lifestyle and her family's lifelong casting her as its scapegoat. Nearly some thirty-five years after her father's murder she was still haunted by guilt. It was the best time to leave anyway, because all she had left was her dissertation.

Actually if she'd felt like she had a choice, she would have just walked away, disillusioned and despairing. In Kansas City she found peace, spending six months finishing her dissertation, healing, and taking ballet classes--all the while praying for a teaching position. Over forty, female and black, if she opened another letter that told her how qualified she was but she didn't get the job she would scream. At what seemed to be the eleventh hour, Western State University in Roadims, Arkansas, offered her an assistant professor position in the school of business. Trepidation pulsed in Olivia's veins since the university only had five professors of color but she went anyway. Five years hence with the granting of tenure and promotion, the faculty elected Olivia as Senate President. At nearly the same instant, the Board unexpectedly ousted university President Fonticello who'd been in that role for over twenty-five years. Nobody was prepared for the impact. Without President Fonticello, the guns of university and Republican state politics were drawn, loaded, and aimed at Olivia. In this novel you'll experience the real world "faculty versus administration" zero-sum game of public university life exacerbated by the worst economic downturn in US history. Following Olivia's lead, how would you cast your Vote of No Confidence? CARLA STALLING HUNTINGTON, PhD received her doctorate from the University of California, Riverside. She has published scholarly monographs and articles on dance and consumer behavior. A California native, she resides with her husband in Woodland Hills.

From flowers and perfumes to urban sanitation and personal hygiene, smell—a sense that is simultaneously sublime and animalistic—has played a pivotal role in western culture and thought. Greek and Roman writers and thinkers lost no opportunity to connect the smells that bombarded their senses to the social, political and cultural status of the individuals and environments that they encountered: godly incense and burning sacrifices, seductive scents, aromatic cuisines, stinking bodies, pungent farmyards and festering back-streets. The cultural study of smell has largely focused on pollution, transgression and propriety, but the olfactory sense came into play in a wide range of domains and activities: ancient medicine and philosophy, religion, botany and natural history, erotic literature, urban planning, dining, satire and comedy—where odours, aromas, scents and stench were rich and versatile components of the ancient sensorium. The first comprehensive introduction to the role of smell in the history, literature and society of classical antiquity, *Smell and the Ancient Senses* explores and probes the ways that the olfactory sense can contribute to our perceptions of ancient life, behaviour, identity and morality. The Persian Sufi poet Hafiz (1326 – 1390) is a towering figure in Islamic literature—and in spiritual attainment as well. Known for his profound mystical wisdom combined with a sublime sensuousness, Hafiz was the supreme master of a poetic form known as the ghazal (pronounced "guzzle"), an ode or song consisting of rhymed couplets celebrating divine love. In this selection of his poems, wine and the intoxication it brings are the image that expresses this love in all its joyful abandon, painful longing, bewilderment, and surrender. Through ninety-five free-verse renditions, we gain entry into the mystical world of Hafiz's *Winehouse*, with its happy minstrels, its bewitching *Winebringer*, and its companions in drunken longing whose hearts cry out, "More wine!" Thomas Rain Crowe brings a new dimension to our growing appreciation of Hafiz and his wise drunkard's advice to the seekers of God: In this world of illusion, take nothing other than this cup of wine; In this playhouse, don't play any games but love.

In the movie The Matrix, the character Morpheus offers two pills to Neo—if he takes the blue pill, he will go on with life as he has before, believing what he has always believed. If he takes the red pill, he will find out what the “matrix” really is, and many of his earlier beliefs will be shattered. When it comes to taking a hard look at a specific set of beliefs about parenthood and reproduction that has driven our society for generations, The Baby Matrix is the red pill. The Baby Matrix looks at long-held beliefs about parenthood and reproduction, and unravels why we believe what we believe. It lays out: We commonly think our desire to have children boils down to our biological wiring, but author Laura Carroll says it's much more than that. Unlike other books on parenthood, The Baby Matrix: Why Freeing Our Minds From Outmoded Thinking About Parenthood & Reproduction Will Create a Better World takes a serious look at powerful social and cultural influences that drive the desire for the parenthood experience, and lays out why we need to be very aware of these influences to make the most informed decisions about parenthood. -the historical origins of beliefs about parenthood and reproduction -why many of these beliefs no longer work for society or were never true in the first place -why we continue to believe them anyway -the prices society pays as a result The Baby Matrix shows us how we got here, brings to light what is true, which includes knowing about the powerful influence of “pronatalism,” and explains why society can no longer afford to leave pronatalism unquestioned. “This is not a book about convincing people not to have children,” says Carroll. “I want people to be very aware of the long-held social and cultural pressures, and be able to free themselves from those pressures when making parenthood choices. This will result in more people making the best decisions for themselves, will foster a society in which those who are best suited to become parents are the ones who have children and one that knows what it means to bring a child into the world today.” This book will make you examine your own intentions and beliefs, will rile you, and might just change your mind. Whether you are already a parent, want to become a parent, are still making up your mind, or know you don't want children, you'll never think about parenthood in the same way. The Baby Matrix is a must-read for anyone interested in psychology, sociology, anthropology, parenting issues, environmentalism, and social justice. But most of all, it's for anyone, parent or not, who reveres the truth and wants the best for themselves, their families, and our world.

Nabokov's Shakespeare is a comprehensive study of an important and interesting literary relationship. It explores the many and deep ways in which the works of Shakespeare, the greatest writer of the English language, penetrate the novels of Vladimir Nabokov, one of the finest English prose stylists of the twentieth century. As a Russian youth, Nabokov read all of Shakespeare, in English. He claimed a shared birthday with the Bard, and some of his most highly regarded novels (Lolita, Pale Fire and Ada) are infused with Shakespeare and Shakespeareanisms. Nabokov uses

Shakespeare and Shakespeare's works in a surprisingly wide variety of ways, from the most casual references to deep thematic links. Schuman provides a taxonomy of Nabokov's Shakespeareanisms; a quantitative analysis of Shakespeare in Nabokov; an examination of Nabokov's Russian works, his early English novels, the non-novelistic writings (poetry, criticism, stories), Nabokov's major works, and his final novels; and a discussion of the nature of literary relationships and influence. With a Foreword by Brian Boyd.

Every day, we hear news from around the world about war and violence. But who could hope to make a difference in these tragic conflicts? The idea of peacemaking seems impossible—unless you're Daniel Buttry. An ordained minister and seasoned peacemaker, Dan has traveled to some of the most dangerous places in the world to conduct conflict resolution, train clergy and elders, and transform conflict into peace.

The New York Times bestselling author of *On Dublin Street* returns to the bar where it all began with Braden and Joss for a white-hot new novella full of passion and drama. When he's not working at the club, Craig Lanaghan looks out for his mother and little sisters. So when it comes to women, all he wants is a good time. But once Rain Alexander walks into his life, there's no denying that this woman could be worth much more than a one-night stand. Rain's lifelong regret is having left her sister Darcy alone years ago with a guardian who turned out to be abusive. So when Darcy's boyfriend publicly humiliates her in a cruel way, Rain's overprotective instincts kick in and she follows him to Club 39—where she meets a guy who just might be her perfect match. The chemistry between Rain and Craig is explosive, but Rain is out for revenge, and refuses to be sidetracked by flirtation. As things between them heat up, she'll have to make a heartbreaking choice between giving in to the man of her dreams or putting her sister's happiness first. He wants to hurt me - just to bring down my evil father. But I can't hate him. I just can't. Because Spike Macklin is the devil I've been dreaming of since I was a little girl.
