The UK is perhaps unique globally in that it presents the full spectrum of geological time, stratigraphy and associated lithologies within its boundaries. With this wide range of geological assemblages comes a wide range of geological hazards, whether they be geophysical (earthquakes, effects of volcanic eruptions, tsunami, landslides), geotechnical (collapsible, compressible, liquefiable, shearing, swelling and shrinking soils), geochemical (dissolution, radon and methane gas hazards) or georesource related (coal, chalk and other mineral extraction). An awareness of these hazards and the risks that they pose is a key requirement of the engineering geologist. The Geological Society considered that a Working Party Report would help to put the study and assessment of geohazards into the wider social context, helping the engineering geologist to better communicate the issues concerning geohazards in the UK to the client and the public. This volume sets out to define and explain these geohazards, to detail their detection, monitoring and management and to provide a basis for further research and understanding.

Intellectual property can be a powerful tool for indigenous peoples and local communities (IPLCs). Used strategically, it can help you promote your own products and services, and prevent the misappropriation of your traditional knowledge and culture. This short guide explains how, with plenty of examples of IPLCs who have made the most of their intellectual property rights.

Maps organize us in space, but they also organize us in time. Looking around the world for the last five hundred years, Time in Maps shows that today's digital maps are only the latest effort to insert a sense of time into the spatial medium of maps. Historians Kären Wigen and Caroline Winterer have assembled leading scholars to consider how maps from all over the world have depicted time in ingenious and provocative ways. Focusing on maps created in Spanish America, Europe, the United States, and Asia, these essays take us from the Aztecs documenting the founding of Tenochtitlan, to early modern Japanese reconstructing nostalgic landscapes before Western encroachments, to nineteenth-century Americans grappling with the new concept of deep time. The book also features a defense of traditional paper maps by digital mapmaker William Rankin. With more than one hundred color maps and illustrations, Time in Maps will draw the attention of anyone interested in cartographic history.

Diversity in Nature and Culture

A History of Rome in Maps

*With an incredible wealth of detail, DeLorme's Atlas & Gazetteer is the perfect companion for exploring the Tennessee outdoors. Extensively indexed, full-color topographic maps provide information on everything from cities and towns to historic sites, scenic drives, trailheads, boat ramps and even prime fishing spots. With a total of 59 map pages, the Atlas & Gazetteer is your most comprehensive navigational guide to Tennessee's backcountry. Full-color topographic maps provide information on everything from cities and towns to historic sites, scenic drives, recreation areas, trailheads, boat ramps and prime fishing spots. Extensively indexed. Handy latitude/longitude overlay grid for each map allows you to navigate with GPS. Inset maps provided for major cities as well as all state lands. Product Details: Tennessee State Dimensions: 15.5" x 11" AVAILABLE FOR ALL 50 STATES!*

*Mapping has been one of the most fertile areas of exploration for architecture and landscape in the past few decades. While documenting this shift in representation from the material and physical description toward the depiction of the unseen and often immaterial, Cartographic Grounds takes a critical view toward the current use of data mapping and visualization and calls for a return to traditional cartographic techniques to reimagine the manifestation and manipulation of the ground itself. Each of the ten chapters focuses on a single cartographic technique—sounding/spot elevation, isobath/contour, hachure/hatch, shaded relief, land classification, figure-ground, stratigraphic column, cross-section, line symbol, conventional sign—and illustrates it through beautiful maps and plans from notable designers and cartographers throughout history, from Leonardo da Vinci to James Corner Field Operations. Mohsen Mostafavi, dean of the Harvard Graduate School of Design, introduces the book.*

*This guidebook contains over 60 walks which explore the best of the Julian Alps of Slovenia. The walks and treks in this guidebook are organised around five bases in the Julian Alps – Kranjska Gora, Bovec, Kobarid, Bled and Bohinj – all of which have a range of accommodation and public transport facilities. There is something here for everyone – from easy valley walks and rougher forest trails to high-mountain protected routes, including multiple routes up Triglav, Slovenia's highest peak. Several possibilities for multi-day walks are included. The Julian Alps are situated in the small independent republic of Slovenia, at the south-eastern end of the Alpine chain. Their highest peak, Triglav, at 2864m, may be smaller than some of the better-known western giants, but what the mountains lack in stature they make up for in interest and accessibility. The dramatic limestone peaks drop steeply through forests to flower meadows, and will give you a feast for the eyes no matter which direction you turn.*

*Their Occurrence, Monitoring and Mitigation*

Intellectual property is everywhere! This colorful little booklet introduces the main types of IP, with plenty of interesting facts and examples. It is designed to appeal in particular to adolescents and young people.

Als Jubiläumspublikation zum 10-jährigen Bestehen bietet das Buch einen reich illustrierten Einblick in die Vielfalt des Kunstprojektes SOHO IN OTTAKRING. Der Spielort im Wiener Bezirk Ottakring ist exemplarischer Ort globaler gesellschaftlicher Transformationen durch Migration und Ökonomisierung. Das Leitthema der Publikation sind die Möglichkeiten von Kunst im Spannungsfeld der verschiedenen Interessen am öffentlichen urbanen Raum. Namhafte Autoren setzen sich mit der Entwicklung des Gebietes und internationalen Vergleichsbeispielen auseinander.

'Amazing. It would be my desert island choice' Martin Rees 'Fascinating, beautiful, alarming and revelatory use of mapping and infographics' Stephen Fry on EarthTime maps 'An indispensable read' Arianna Huffington From the global impact of the Coronavirus to exploring the vast spread of the Australian bushfires, join authors Ian Goldin and Robert Muggah as they trace the ways in which our world has changed and the ways in which it will continue to change over the next hundred years. Map-making is an ancient impulse. From the moment homo sapiens learnt to communicate we have used them to make sense of our surroundings. But as Albert Einstein once said, 'you can't use old maps to explore a new world.' And now, when the world is changing faster than ever before, our old maps are no longer fit for purpose. Welcome to Terra Incognita. Based on decades of research, and combining mesmerising, state-of-the-art satellite maps with enlightening and passionately argued analysis, Ian and Robert chart humanity's impact on the planet, and the ways in which we can make a real impact to save it, and to thrive as a species. Learn about: fires in the arctic; the impact of sea level rise on cities around the world; the truth about immigration - and why fears in the West are a myth; the counter-intuitive future of population rise; the miracles of health and education that are waiting around the corner, and the reality about inequality, and how we end it. The book traces the paths of peoples, cities, wars, climates and technologies, all on a global scale. Full of facts that will confound you, inform you, and ultimately empower you, Terra Incognita guides readers to a new place of understanding, rather than to a physical location.

The Interactive Book

Time in Maps

The Correspondence of C. G. Jung and Erich Neumann

Canada: Road Atlas

Cartographic Grounds

Pam Stucky, a native of the Seattle area, loves this city and all it has to offer. And she knows that part of what makes the region spectacular is not just the city itself, but all the fantastic destinations within a two- or three-hour drive. In the ten day trips in Pam on the Map: Seattle Day Trips, Pam offers complete full-day itineraries, taking the guesswork out of where to go, what to do when you get there, and what to do along the way. She also includes optional side trips for those who like to veer from the prescribed path, or who might want to take a trip more than once with different variations. Included in each description is a list of miles traveled, start time, and end time, to give the traveler an idea of how long this trip will be. What's more, Pam has included important information about where to get gas, how to time your trip to your best advantage, what passes you might need on the trip, cell phone and internet considerations, and much more. Whether you take each trip exactly as described, or use the itineraries as mere outlines to get you out and exploring, Pam on the Map: Seattle Day Trips is a treasure of discovery and adventure.

"Cool Escapes Maldives" is a multimedia publication. It includes an interactive coffee table book with additional app and website : [www.cool-escapes.com/maldives](http://www.cool-escapes.com/maldives). The interactive mix of print and digital publications showcases in-depth and innovative inside views on the natural beauty of the country with its tropical islands and fascinating underwater world. In connection with the app the book will open a complete new reading experience and extend beyond the pages with interactive features such as videos, photogalleries, weblinks, recipes, ingredient lists, and more. Also you can easily locate each of the resorts on the map. The publication presents 32 individual resorts in this unique country of tropical Islands. Furthermore, it will take you behind the scenes to cultural, artistic, and natural highlights, with additional portraits of people such as marine biologists, diving instructors, resort managers, chefs de cuisine, photographers, musicians, and artists. See how to setup, real romantic events, honeymoon & wedding special, experience the most indulgent spa treatments, and receive expert information about the ocean life, underwater world, nature, and so much more !

One of the most visited places in the world, Rome attracts millions of tourists each year to walk its storied streets and see famous sites like the Colosseum, St. Peter's Basilica, and the Trevi Fountain. Yet this ancient city's allure is due as much to its rich, unbroken history as to its extraordinary array of landmarks. Countless incarnations and eras merge in the Roman cityscape. With a history spanning nearly three millennia, no other place can quite match the resilience and reinventions of the aptly nicknamed Eternal City. In this unique and visually engaging book, Jessica Maier considers Rome through the eyes of mapmakers and artists who have managed to capture something of its essence over the centuries. Viewing the city as not one but ten "Romes," she explores how the varying maps and art reflect each era's key themes. Ranging from modest to magnificent, the images comprise singular aesthetic monuments like paintings and grand prints as well as more popular and practical items like mass-produced tourist plans, archaeological surveys, and digitizations. The most iconic and important images of the city appear alongside relatively obscure, unassuming items that have just as much to teach us about Rome's past. Through 140 full-color images and thoughtful overviews of each era, Maier provides an accessible, comprehensive look at Rome's many overlapping layers of history in this landmark volume. The first English-language book to tell Rome's rich story through its maps, *The Eternal City* beautifully captures the past, present, and future of one of the most famous and enduring places on the planet.

The Global Innovation Index provides detailed metrics about the innovation performance of 127 countries and economies around the world. Its 81 indicators explore a broad vision of innovation, including political environment, education, infrastructure and business sophistication. This year's report reviews the state of innovation in agriculture and food systems across sectors and geographies. Chapters of the report provide more details on this year's theme from academic, business, and particular country perspectives from leading experts and decision makers.

Lonely Planet Indonesia is your passport to the most relevant, up-to-date advice on what to see and skip, and what hidden discoveries await you. Take in a traditional gamelan performance, laze on hidden beaches, or hike volcanic peaks; all with your trusted travel companion.

DeLorme's Atlas and Gazetteer Series is America's most popular line of recreational maps! Each atlas covers an individual state in its entirety with detailed, full-color topographic maps. Detail includes back roads, hidden lakes, boat ramps, hiking trails, campgrounds, public lands, forests, wetlands and more. And, the Gazetteer sections feature page after page of information on places to go and things to do. These atlases are year-round favorites with outdoors enthusiasts and anyone who likes to leave the main roads behind.

Geological Hazards in the UK

***C. G. Jung and Erich Neumann first met in 1933, at a seminar Jung was conducting in Berlin. Jung was fifty-seven years old and internationally acclaimed for his own brand of psychotherapy. Neumann, twenty-eight, had just finished his studies in medicine. The two men struck up a correspondence that would continue until Neumann's death in 1960. A lifelong Zionist, Neumann fled Nazi Germany with his family and settled in Palestine in 1934, where he would become the founding father of analytical psychology in the future state of Israel. Presented here in English for the first time are letters that provide a rare look at the development of Jung's psychological theories from the 1930s onward as well as the emerging self-confidence of another towering twentieth-century intellectual who was often described as Jung's most talented student. Neumann was one of the few correspondence partners of Jung's who was able to challenge him intellectually and personally. These letters shed light on not only Jung's political attitude toward Nazi Germany, his alleged anti-Semitism, and his psychological theory of fascism, but also his understanding of Jewish psychology and mysticism. They affirm Neumann's importance as a leading psychologist of his time and paint a fascinating picture of the psychological impact of immigration on the German Jewish intellectuals who settled in Palestine and helped to create the state of Israel. Featuring Martin Liebscher's authoritative introduction and annotations, this volume documents one of the most important intellectual relationships in the history of***

**After his last book Escapes, Stefan Bogner returns to the Alps again with this illustrated book. This time not only did he photograph particular routes, but he looked for the ideal tour through the Alps: 3 countries, 14 passes - the perfect little escape for 4 days. Different from Bogner's photographs in Escapes or Curves, where Bogner just presents dreamlike empty streets, Porsche Drive focuses on the journey in Porsche models such as Porsche 906, Porsche 911, Porsche 918 and more. Stefan Bogner drives his own Porsche 911 1970 ST. Apart from Bogner's photographs, Porsche Drive offers information on each route and height profile. Thus you can follow Bogner's itinerary on a long weekend. Text in English and German.**

In 2005, Pam Stucky toured the Republic of Ireland by bus for seventeen days, logging dozens of hours on public transportation as she traveled to Galway, Inishmore, Doolin, Dingle, Kinsale, Cashel, Kilkenny, Glendalough, and Dublin. In this short travelogue, Pam shares the tales of her adventures, from nearly losing her wallet in Galway, to being mistaken for a local on Inishmore, to swaying home from a pub late at night, supporting three drunkenly singing senior citizens in Doolin. In Inishmore, she conspired with a local to rent a bike for free; in Cashel, she managed to get herself locked inside her B&B room; at Newgrange, she peered back through the veil of time. She chatted with locals, braved a haunted fort, and bore witness to some of the country's most important history. Through it all, she was always on the hunt for internet cafés from which to send home her stories. Filled with wit and wanderlust, Pam on the Map: Ireland offers one woman's perspective on her first solo foray into the world of travel. Pam on the Map: Ireland is one of the "retrospective" books in the Pam on the Map series. About the Pam on the Map series: In the Pam on the Map series, author and traveler Pam Stucky offers her own engaging twist on the modern travelogue genre. Pam is curious. She's curious about the world, and curious about people. In her Pam on the Map series, Pam sets out to discover and connect with people and places, and to take readers along on her adventures through her almost real-time reports. Raw and real, Pam's tales are infused with candid honesty, humorous observations, and perceptive insights. Pam's descriptive, entertaining, conversational style brings her trips alive, making readers feel as though they're traveling right along with her. Though they're not guidebooks, the Pam on the Map books are still informative and illuminating, providing useful tips and plentiful ideas for people who might want to follow along in Pam's footsteps.

The landscape of the Netherlands has been changing constantly since the end of the last ice age, some 11,700 years ago. Where we walk today was once a polar desert, a river delta or a shallow sea. The end of the last ice age marked the beginning of a new geological period - the Holocene, the relatively warm geological epoch in which we are still living today. The Atlas of the Holocene Netherlands contains special maps, supplemented by archaeological and historical information. These maps show the geographical situation for thirteen different points in time since the last ice age, based on tens of thousands of drill samples and the latest geological, soil and archaeological research. This magnificent atlas also paints a surprising picture of the position we humans have occupied in the landscape. It addresses such questions as: How did we take advantage of the opportunities offered by the landscape? And how did we mould the landscape to suit our own purposes? The Atlas of the Holocene Netherlands will change once and for all the way you look at the Dutch landscape.

**The relational complexity of urban and rural landscapes in space and in time The development of historical geographical information systems (HGIS) and other methods from the digital humanities have revolutionised historical research on cultural landscapes. Additionally, the opening up of increasingly diverse collections of source material, often incomplete and difficult to interpret, has led to methodologically innovative experiments. One of today's major challenges, however, concerns the concepts and tools to be deployed for mapping processes of transformation—that is, interpreting and imagining the relational complexity of urban and rural landscapes, both in space and in time, at micro- and macro-scale. Mapping Landscapes in Transformation gathers experts from different disciplines, active in the fields of historical geography, urban and landscape history, archaeology and heritage conservation. They are specialised in a wide variety of space-time contexts, including regions within Europe, Asia, and the Americas, and periods from antiquity to the 21st century. Contributors: Karl Beelen (Karlsruhe IT), John Bintliff (Leiden University / Edinburgh University), Bieke Cattoor (TU Delft), Jill Desimini (Harvard University), Cecilia Furlan (TU Delft / KU Leuven), Ian Gregory and Christopher Donaldson (Lancaster University), Joanna Taylor (University of Manchester), Piraye Hacigüzeller, Frank Vermeulen and Devi Taelman (Ghent University), Ralf Vandam and Jeroen Poblome (KU Leuven), Reinout Klaarenbeek (KU Leuven), Sanne Maekelberg (KU**
