substitutable resource. As the foundation of life, societies and economies, it carries multiple values and benefits. But unlike most other natural resources, it has proven extremely difficult to determine its true 'value'. The 2021 edition of the United Nations World Water Development Report, titled "Valuing Water" assesses the current status of and challenges to the valuation of water across different sectors and perspectives and identifies ways in which valuation can be promoted as a tool to help improve its management and achieve global sustainable development.

quietly poisoning us. Air pollution prematurely kills seven million people every year, including more than one hundred thousand Americans. It is strongly linked to strokes, heart attacks, many kinds of cancer, dementia, and premature birth, among other ailments. In *Choked*, Beth Gardiner travels the world to tell the story of this modern-day plague, taking readers from the halls of power in Washington and the diesel-fogged London streets she walks with her daughter to Poland's coal heartland and India's gasping capital. In a gripping narrative that's alive with powerful voices and personalities, she exposes the political decisions and economic forces that have kept so many of us breathing dirty air. This is a moving,

up-close look at the human toll, where we meet the scientists who have transformed our understanding of pollution's effects on the body and the ordinary people fighting for a cleaner future. In the United States, air is far cleaner than it once was. But progress has failed to keep up with the science, which tells us that even today's lower pollution levels are doing real damage. And as the Trump administration rips up the regulations that have brought us where we are, decades of gains are now at risk. Elsewhere, the problem is far worse, and choking nations like China are scrambling to replicate the achievements of an American agency—the EPA—that until recently was the envy of the world. Choked shows us that we hold the power to build a cleaner, healthier future: one in which breathing, life's most basic function, no longer carries a hidden danger.

achievement and happiness, and a formula for making it work. Everyone who engages in FIFO work, whether it be for a few years or an entire career, gets to make the most of it and to make it a most loved part of their life. In the FIFO system, companies transport workers to and from the site in great comfort, they provide comfortable and private accommodation, plenty of freshly prepared food, recreational facilities, internet access, excellent pay, perhaps the safest working conditions in the world and they are governed by fair and equitable laws. On the other hand, FIFO work does not guarantee long term job security. Markets fluctuate, mineral deposits, oil reserves diminish, large infrastructure projects finish, economies often slow down, and demand often changes. Some projects

have a definite length, like construction jobs, while others are subject to these off-unpredictable factors. All of this means that working FIFO can be unpredictable and lacking in security. It can mean months off work with no pay, losing money on real estate investments and being forced to relocate to different parts of the country. It can be a rocky ride. This book looks at the "nitty gritty" of FIFO whilst keeping an eye on a much bigger picture. It helps the reader prepare for FIFO work and life so that they can optimise their experience, whether they are going solo, leaving a family, or if they are the partner or family member left at home.

Fader advocates that in the world of customer centricity, there are good customers ... and then there is pretty much everybody else. In a new preface and afterword to Customer Centricity, Fader reflects on how the landscape has changed over nearly a decade since he first proposed that businesses radically rethink how they relate to customers. Using examples from Starbucks, Nordstrom, and more, Fader provides insights to help you understand: Why customer centricity is the new model for success in today's data-driven environment.
