This text provides a

**high level,
comprehensive but
concise review of
adult surgical critical
care. It can be used
to review complex
topics of critical
illness in surgical
patients, as a
reference tool, or as
preparation for a
board examination.
It is focused on the**

surgical patient including high yield facts, evidence-based guidelines, and critical care principles. To remain succinct, it concentrates on surgically relevant care. Further, the text is written with an expectation that reader already

possesses a basic understanding of critical care pathophysiology and clinical practices such as those acquired during residency. Organized by organ system, each section contains several chapters addressing relevant disorders,

**monitoring and
treatment modalities,
and outcomes.**

**Principles of Adult
Surgical Critical
Care will be of use to
intensivists caring
for surgical patients
regardless of parent
training domain.**

**Additionally, this
work is intended to
be used by surgical**

**critical care
fellowship trainees
as well as other
advanced practice
providers such as
nurse practitioners
and physician
assistants who
provide care in ICUs
and emergency
departments alike.
