When Christopher Rowe's code-breaking uncovers the true target of an assassination attempt, he and his friends are ordered to Paris to investigate a centuries-old curse on the French throne.

Can you remember being impressed by a clear starry sky? Look at the Milky Way through binoculars and it will reveal its many hundreds of thousands of stars, double stars, stellar clusters, and nebulae. If you are a new observer, it is not that easy to find your way in this swarm of stars, but this atlas tries to make it as easy as possible. So now it is not just experienced amateurs that can enjoy looking at the heavens. Two additional observing aids are recommended. The first is a planisphere, where one can dial in the time and day in order to see which constellations are visible and where they are in the sky. The second is an astronomical yearbook. It lists the current positions of the planets and all important phenomena. So, let us begin our journey around the night sky, and see what the universe can reveal to us! Facing page, top: The constellation Cygnus (Swan) in the midst of the northern Milky Way. The photograph gives an impression of the uncountable stars in our Milky Way. This becomes more conspicuous when you sweep through Cygnus with binoculars. Under a very dark sky, one can try to find the North America Nebula, Pelican Nebula, and Veil Nebula (see p. 47). These are difficult nebulae and are only barely visible on this photograph as well.

Milan, 1966: When Dr. Duca Lamberti is released from prison, he's lost his medical license and his options are few. But thanks to an old connection, he lands a job, although it's a tricky one: guarding the alcoholic son of a plastics millionaire. But Lamberti soon discovers that the young man has a terrible secret, rooted in the mysterious death of a beautiful woman on the gritty side of town. The fast cars, high fashion, and chic nightclubs of glitzy and swinging Milan conceal a dirty reality . . . This is no dolce vita. A Private Venus marks the beginning of Italian noir: Giorgio Scerbanenco pioneered a new type of novel that trained its gaze on the crime and desperation that roiled under prosperous Italian society in the 1960s. Never disobey the Changers Council. And never, ever fall in love with another Changer. And she can't even confide in her best friend Audrey, who can never know the real her, without risking both of their lives. Fans of the books of John Green, the *Joss Whedonverse* - and empathy between humans - will find much to love in this first of a four-part series that tracks the journey of an average suburban boy who becomes an incredible young woman...who becomes a reluctant hero...who becomes the person she was meant to be. Because, while changing the world can kinda suck, it sure beats never knowing who you really are.

Cursed Bunny is a genre-defying collection of short stories by Korean author Bora Chung. Blurring the lines between magical realism, horror, and science-fiction, Chung uses elements of the fantastic and surreal to address the very real horrors and cruelties of patriarchy and capitalism in modern society. Anton Hur's translation skilfully captures the way Chung's prose effortlessly glides from being terrifying to wryly humorous.

We learn about the giant city towers where most people live, work and play inside – where it's safe from natural disasters and viral outbreaks. And between these interviews, we learn more about Billy, whose interest in the history that has been erased from the official record is causing trouble in 2050.
