According to the people of the Mueda plateau in northern Mozambique, sorcerers remake the world by asserting the authority of their own imaginative visions of it. While conducting research among these Muedans, anthropologist Harry G. West made a revealing discovery—for many of them, West's efforts to elaborate an ethnographic vision of their world was itself a form of sorcery. In *Ethnographic Sorcery*, West explores the fascinating issues provoked by this equation. A key theme of West's research into sorcery is that one sorcerer's claims can be challenged or reversed by other sorcerers. After West's attempt to construct a metaphorical interpretation of Muedan assertions that the lions prowling their villages are fabricated by sorcerers is disputed by his Muedan research collaborators, West realized that ethnography and sorcery indeed have much in common. Rather than abandoning ethnography, West draws inspiration from this connection, arguing that anthropologists, along with the people they study, can scarcely avoid interpreting the world they inhabit, and that we are all, inescapably, ethnographic sorcerers.

Includes 16 maps, photos and plans “The Battle of Wanat occurred on July 13, 2008, when about 200 Taliban guerrillas attacked NATO troops near the Quam,(large clan village), of Wanat in the Waygal district in Afghanistan's far eastern province of Nuristan. The position was defended primarily by U.S. Army soldiers of the 2nd Platoon, Chosen Company, 2nd Battalion, 503rd Infantry Regiment (Airborne), 173rd Airborne Brigade Combat Team. “The Taliban surrounded the remote base and its observation post and attacked it from the Quam and the surrounding farmland. They destroyed much of the Americans' heavy munitions, broke through U.S. lines, and entered the main base before being repelled by artillery and aircraft. American casualties included nine killed and 27 wounded, while four Afghan National Army (ANA) soldiers were wounded. The U.S. combat deaths represent the most in a single battle since the start of U.S. operations in 2001. “The Battle of Wanat has been described as the "Black Hawk Down" of the War in Afghanistan, as one of the bloodiest attacks of the war and one of several attacks on remote outposts. In contrast to previous roadside bombs and haphazard attacks and ambushes, this attack was well coordinated with fighters from many insurgent and terrorist groups with an effort that was disciplined and sustained which was able to target key assets such as the TOW launcher with precision. “The battle became the focus of widespread debate, generating "a great deal of interest and scrutiny among military professionals and from outside observers." mainly due to the relatively "significant number of coalition casualties".

"It Just Broke!" Breaking the Silence of Trauma, the author gives a candid, transparent, raw, and unadulterated truth into Angelia Jimenez's life from her childhood filled with trauma until her early adulthood. This book informs the reader that every person has a story to tell and they should do it unapologetically. She wants everyone to know that their story is not their story to keep, but it's God's story used to glorify Him and to show that He is there the whole time. This is a story of resiliency and victory as Angelia breaks and leaped over each obstacle that was thrown her way. Her pain produced her purpose. Her mission of faith and perseverance was the way that she was able to push past what others placed on her life. Her motto is, "I AM NOT WHO THEY (OTHER PEOPLE) SAID ABOUT ME!"

Finding Your Voice, Living Out Loud For over a decade, millions of Canadians started their day with Marci Ien. As a Black female news anchor and, later, the first Black woman in Canada to co-host a national morning show, Marci felt the pressure to stay “on script”—with little room for error. She had to be great. She had to show, every day, that she deserved to be there. When her career veered sharply away from the news, Marci embraced her new role “off script.” With a greater opportunity to speak her mind on the air, Marci now bravely shares experiences from her own life with viewers and pursues more ways to make a difference in her community. In Off Script, Marci shares personal milestones, tales of resilience and kindness, dramatic moments from her career as a journalist and insights from the many unforgettable people that she’s met and interviewed. Living off script means having the courage to speak up, trust your voice and follow your own formula for what matters most.

Approaches to Disaster Management regards critical disaster management issues. Ten original research reports by international scholars centered on disaster management are organized into three general areas of hazards and disaster management. The first section includes discussions of perspectives on vulnerability and on evolving approaches to mitigation. The second section highlights approaches to improve data use and information management in several distinct applications intended to promote prediction and communication of hazard. The third section regards the management of crises and post-event recovery in the private sector, in the design of urban space and among the victims of disaster. This volume contributes both conceptual and practical commentary to the disaster management literature.

"Gripping . . . the narrative is smooth and immediate, almost effortless in its detail, if occasionally breathless, like a good fast run . . ." --The New York Times Book Review Visionary American running coach Bob Larsen assembled a mismatched team of elite California runners . . . the start of his decades-long quest for championships, Olympic glory, and pursuit of "the epic run." In the dusty hills above San Diego, Bob Larsen became America's greatest running coach. Starting with a ragtag group of high school cross country and track runners, Larsen set out on a decades-long quest to find the secret of running impossibly fast, for longer distances than anyone thought possible. Himself a former farm boy who fell into his track career by accident, Larsen

worked through coaching high school, junior college, and college, coaxing talented runners away from more traditional sports as the running craze was in its infancy in the 60's and 70's. On the arid trails and windy roads of California, Larsen relentlessly sought the 'secret sauce' of speed and endurance that would catapult American running onto the national stage. *Running to the Edge* is a riveting account of Larsen's journey, and his quest to discover the unorthodox training secrets that would lead American runners (elite and recreational) to breakthroughs never imagined. New York Times Deputy Sports Editor Matthew Futterman interweaves the dramatic stories of Larsen's runners with a fascinating discourse of the science behind human running, as well as a personal running narrative that follows Futterman's own checkered love-affair with the sport. The result is a narrative that will speak to every runner, a story of Larsen's triumphs--from high school cross-country meets to the founding of the cult-favorite 70's running group, the Jamul Toads, from national championships to his long tenure as head coach at UCLA, and from the secret training regimen of world champion athletes like Larsen's protégé, American Meb Keflezighi, to victories at the New York and Boston Marathons as well as the Olympics. *Running to the Edge* is a page-turner . . . a relentless crusade to run faster, farther.

Auto Repair For Dummies, 2nd Edition (9781119543619) was previously published as Auto Repair For Dummies, 2nd Edition (9780764599026). While this version features a new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product. The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs. "The purpose of this book is to present relevant questions on diagnostic testing that arise in everyday emergency medicine practice and to comment on the best available evidence"--Provided by publisher.

No background or training in music? No problem. This shorter version of WORLDS OF MUSIC: AN INTRODUCTION TO THE MUSIC OF THE WORLD'S PEOPLES is written to make music accessible. Using the case-study approach, the text presents in-depth explorations of music of several cultures from around the world. The authors all ethnomusicologists working in their fields of expertise base their discussions of music-cultures on their own fieldwork and give you a true sense of both the music and culture that created it. Two CDs accompany every copy of the book and cover a wide range of music-cultures, including authentic recordings from the authors' fieldwork. Leading off is the long-standing jewel in the Worlds of Music crown - James Koetting's magnificent recording of postal workers canceling stamps at the University of Ghana post office. A Western-sounding hymn tune performed against African rhythms, this piece, more than any other, lets you hear contrasting music-cultures.

For over 25 years Rob Siegel has written a monthly column called "The Hack Mechanic" for the BMW Car Club of America's magazine Roundel. In Memoirs of a Hack Mechanic, Rob Siegel shares his secrets to buying, fixing, and driving cool cars without risking the kids' tuition money or destroying his marriage. And that's something to brag about considering the dozens of cars, including twenty-five BMW 2002s, that have passed through his garage over the past three decades. With a steady dose of irreverent humor, Memoirs of a Hack Mechanic blends car stories, DIY advice, and cautionary tales in a way that will resonate with the car-obsessed (and the people who love them).

An epic, immersive debut, *Damnation Spring* is the deeply human story of a Pacific Northwest logging town wrenched in two by a mystery that threatens to derail its way of life. For generations, Rich Gundersen's family has chopped a livelihood out of the redwood forest along California's rugged coast. Now Rich and his wife, Colleen, are raising their own young son near Damnation Grove, a swath of ancient redwoods on which Rich's employer, Sanderson Timber Co., plans to make a killing. In 1977, with most of the forest cleared or protected, a grove like Damnation—and beyond it 24-7 Ridge—is a logger's dream. It's dangerous work. Rich has already lived decades longer than his father, killed on the job. Rich wants better for his son, Chub, so when the opportunity arises to buy 24-7 Ridge—costing them all the savings they've squirreled away for their growing family—he grabs it, unbeknownst to Colleen. Because the reality is their family isn't growing; Colleen has lost several pregnancies. And she isn't alone. As a midwife, Colleen has seen it with her own eyes. For decades, the herbicides the logging company uses were considered harmless. But Colleen is no longer so sure. What if these miscarriages aren't isolated strokes of bad luck? As mudslides take out clear-cut hillsides and salmon vanish from creeks, her search for answers threatens to unravel not just Rich's plans for the 24-7, but their marriage too, dividing a town that lives and dies on timber along the way. Told from the perspectives of Rich, Colleen, and Chub, in prose as clear as a spring-fed creek, this intimate, compassionate portrait of a community clinging to a vanishing way of life amid the perils of environmental degradation makes *Damnation Spring* an essential novel for our time.

This open access book explores the global challenges and experiences related to digital entrepreneurial activities, using carefully selected examples from leading companies and economies that shape world business today and tomorrow. Digital entrepreneurship and the companies steering it have an enormous global impact; they promise to transform the business world and change the way we communicate with each other. These companies use digitalization and artificial intelligence to enhance the quality of decisions and augment their business and customer operations. This book demonstrates how cloud services are continuing to evolve; how cryptocurrencies are traded in the banking industry; how platforms are created to commercialize business, and how, taken together, these developments provide new opportunities in the digitalized era. Further, it discusses a wide range of digital factors changing the way businesses operate, including artificial intelligence, chatbots, voice search, augmented and virtual reality, as well as cyber threats and data privacy management. "Digitalization mirrors the Industrial Revolution's

impact. This book provides a complement of perspectives on the opportunities emanating from such a deep seated change in our economy. It is a comprehensive collection of thought leadership mapped into a very useful framework. Scholars, digital entrepreneurs and practitioners will benefit from this timely work." Gina O'Connor, Professor of Innovation Management at Babson College, USA "This book defines and delineates the requirements for companies to enable their businesses to succeed in a post-COVID19 world. This book deftly examines how to accomplish and achieve digital entrepreneurship by leveraging cloud computing, AI, IoT and other critical technologies. This is truly a unique "must-read" book because it goes beyond theory and provides practical examples." Charlie Isaacs, CTO of Customer Connection at Salesforce.com, USA "This book provides digital entrepreneurs useful guidance identifying, validating and building their venture. The international authors developed new perspectives on digital entrepreneurship that can support to create impact ventures." Felix Staeritz, CEO FoundersLane, Member of the World Economic Forum Digital Leaders Board and bestselling author of FightBack, Germany

In the tradition of Wild and H Is for Hawk, an Outside magazine writer tells her story—of fathers and daughters, grief and renewal, adventure and obsession, and the power of running to change your life. NAMED ONE OF THE BEST BOOKS OF THE YEAR BY REAL SIMPLE I'm running to forget, and to remember. For more than a decade, Katie Arnold chased adventure around the world, reporting on extreme athletes who performed outlandish feats—walking high lines a thousand feet off the ground without a harness, or running one hundred miles through the night. She wrote her stories by living them, until eventually life on the thin edge of risk began to seem normal. After she married, Katie and her husband vowed to raise their daughters to be adventurous, too, in the mountains and canyons of New Mexico. But when her father died of cancer, she was forced to confront her own mortality. His death was cataclysmic, unleashing a perfect storm of grief and anxiety. She and her father, an enigmatic photographer for National Geographic, had always been kindred spirits. He introduced her to the outdoors and took her camping and on bicycle trips and down rivers, and taught her to find solace and courage in the natural world. And it was he who encouraged her to run her first race when she was seven years old. Now nearly paralyzed by fear and terrified she was dying, too, she turned to the thing that had always made her feel most alive: running. Over the course of three tumultuous years, she ran alone through the wilderness, logging longer and longer distances, first a 50-kilometer ultramarathon, then 50 miles, then 100 kilometers. She ran to heal her grief, to outpace her worry that she wouldn't live to raise her own daughters. She ran to find strength

in her weakness. She ran to remember and to forget. She ran to live. Ultrarunning tests the limits of human endurance over seemingly inhuman distances, and as she clocked miles across mesas and mountains, Katie learned to tolerate pain and discomfort, and face her fears of uncertainty, vulnerability, and even death itself. As she ran, she found herself peeling back the layers of her relationship with her father, discovering that much of what she thought she knew about him, and her own past, was wrong. *Running Home* is a memoir about the stories we tell ourselves to make sense of our world—the stories that hold us back, and the ones that set us free. Mesmerizing, transcendent, and deeply exhilarating, it is a book for anyone who has been knocked over by life, or feels the pull of something bigger and wilder within themselves. “A beautiful work of searching remembrance and searing honesty . . . Katie Arnold is as gifted on the page as she is on the trail. *Running Home* will soon join such classics as *Born to Run* and *Ultramarathon Man* as quintessential reading of the genre.”—Hampton Sides, author of *On Desperate Ground* and *Ghost Soldiers*
