

Kontrolni Rad Za 5 Razred

This is the first attempt to synthesize current understanding of biodiversity in the great European hot spot. A diverse group of international researchers offers perspective on biodiversity at the level of the gene, species and ecosystem, including contributions on temporal change. Biological groups include plants, mammals, spiders and humans, cave-dwelling organisms, fish, aquatic invertebrates and algae.

Rad Matice srpske

This book explores how school history textbooks are used to perpetuate nationalistic policies within divided regions. Exploring the 'divide and rule' politics across ex-Yugoslav successor states, the editors and contributors draw upon a wide range of case studies from across the region. Textbooks and other educational media provide the foundations upon which the new generation build understanding about their own context and the events that are creating their present. By promoting nationalistic politics in such media, textbooks themselves can be used as tools to further promote and preserve ongoing hostility between ethnic groups following periods of conflict. This edited collection will appeal to scholars of educational media, history education and post-conflict societies.
