Learn to communicate with your dog—using their language "Good reading for dog lovers and an immensely useful manual for dog owners."—The Washington Post

An Applied Animal Behaviorist and dog trainer with more than twenty years' experience, Dr. Patricia McConnell reveals a revolutionary new perspective on our relationship with dogs—sharing insights on how "man's

friend" might interpret our behavior, as well as essential advice on how to interact with our four-legged friends in ways that bring out the best in them. After all, humans and dogs are two entirely different species, each shaped by its individual evolutionary heritage. Quite simply, humans are primates and dogs are canids (as are wolves, coyotes, and foxes). Since we each speak a different native tongue, a lot gets lost in the translation. This marvelous guide demonstrates how even the slightest changes in our voices and in the ways we stand can help dogs understand what we mean. Inside you will discover:

- How you can get your dog to come when called by acting less like a primate and more like a dog
- Why the advice to "get dominance" over your dog can cause problems
- Why "rough and tumble primate play" can lead to trouble—and how to play with your dog in ways that are fun and keep him out of mischief
- How dogs and humans share personality types—and why most dogs want to live with benevolent leaders rather than "alpha wanna-be"

Fascinating, insightful, and compelling, *The Other End of the Leash* is a book that strives to help you connect with your dog in a completely new way—so as to enrich that most rewarding of relationships.

Twenty-five years of study and experience went into the making of this one-of-a-kind reference. Veterinarians, animal scientists, dog owners, trainers, consultants, and counsellors will find this book a benchmark reference and handbook concerning positive, human management and control of dogs. Written by experienced author and dog owner Vanessa Richie, *The Complete Guide to the Shiba Inu* is an excellent overview of this beautiful breed and contains information, tips, and advice from some of the top Shiba breeders in the world. Don't let their adorable appearance fool you though — they will certainly use it to their advantage if you let them. Notorious escape artists and unapologetic alpha canines, a Shiba Inu can quickly learn to dominate your home if you aren't ready to lay down the law from day one. Be prepared to tackle the challenge of owning a Shiba Inu by reading about: Finding Your Shiba Inu Preparing your Family and House Shina Health and Wellness Bringing your Shiba Inu Home The Multipet Household Housetraining Shiba Socialization Training your Shiba Inu

Nutrition Grooming — Productive Bonding Genetic Health Concerns Common to Shiba Inu The Aging Shiba Inu The Shiba Inu was made a Japanese national treasure during the 1930s, and for very good reasons. With a fox like appearance, this breed is also the most easily recognizable of the six dog breeds indigenous to Japan. These adorable little dogs are full of energy and intellect that will keep you both entertained and on your toes. When it comes to people, Shiba Inu are incredibly affectionate and charming, but don't expect that to translate into easy training. They can be quite headstrong if you don't take a firm and consistent approach to training them. They can also be very vocal, so you will need to plan to train a puppy to be quiet. They have an average life expectancy of between 12 and 16 years, so bringing one of these little guys into your home is likely to give you a long-term companion that can entertain you, and may demand a bit of entertainment in return. It is hard to imagine that these sturdy, affectionate dogs were once on the brink of extinction. Over the last 60 years, they have become an extremely popular breed because of the combination of easy-care, adorable appearance, and charming personality.

The Kennel Club's Breed Standards form the basis for judging dogs at all licensed breed shows. This fully revised edition of the authoritative guide outlines the descriptive 'standards' for each of the 201 pure breeds of dog now recognised by the Kennel Club. The book has been completely updated by a panel of experts to incorporate the latest standards for all breeds in each of the principal categories - Hound, Gundog, Terrier, Utility, Working, Pastoral and Toy. As well as providing a beautiful colour photograph of each dog, each entry contains a history of the breed, including its origins and function, as well as a full description outlining its essential features. There is also useful advice on the nature of each breed and practical information to help guide anyone who is buying a dog, as well as a glossary of canine terms. This book is essential reading for anyone who owns, or hopes to own, a pedigree dog and is indispensable for breeders, judges and those professionally involved with dogs.

Committed trainers and owners can solve this problem!

Treating separation anxiety in dogs is not quick or easy—but it can be done. The successful ingredients are cooperation, commitment and time on the part of the dog trainer and the owners. In this important new book, author Malena DeMartini-Price shares her 5 Phase Treatment Protocol and related strategies to help dogs overcome the fear of being left alone and addresses the trauma it can inflict on both the dog and their owners. Trainer handouts, detailed step-by-step training tips and a sample initial interview questionnaire are included.

Learn about:

- The critical role that “suspending absences” plays in the early part of the treatment plan and how owners and trainers can make this more manageable.
- How dog trainers can make the treatment of separation anxiety in dogs a specialized business.
- The role that management techniques and medications can play to help support the recommended behavior modification strategies.
- How technology, including remote feeding devices and web cams, can be used to monitor a dog's progress in overcoming his fear of being left alone.

Cesar Millan—nationally recognized dog expert—helps you see the world through the eyes of your dog so you can finally eliminate problem behaviors. From his appearances on The Oprah Winfrey Show to his roster of celebrity clients to his reality television series, Cesar Millan is America's most sought-after dog-behavior expert. But Cesar is not a trainer in the traditional sense—his expertise lies in his unique ability to comprehend dog psychology. Tracing his own amazing journey from a clay-walled farm in Mexico to the celebrity palaces of Los Angeles, Cesar recounts how he learned what makes dogs tick. In *Cesar's Way*, he shares this wisdom, laying the groundwork for you to have stronger, more satisfying relationships with your canine companions. Cesar's formula for a contented and balanced dog seems impossibly simple: exercise, discipline, and affection, in that order. Taking readers through the basics of dog psychology and behavior, Cesar shares the inside details of some of his most fascinating cases, using them to illustrate how common behavior issues develop and, more important, how they can be corrected. You'll learn:

- What your dog really needs may not be what you're giving him
- Why a dog's natural pack instincts are the key to your happy relationship
- How to relate to your dog on a canine level
- There are no "problem breeds," just problem owners
- How to choose a dog who's right for you and your family
- The difference between discipline and punishment
- And much more!

Filled with fascinating anecdotes about Cesar's longtime clients, and including forewords by the president of the International Association of Canine Professionals and Jada Pinkett Smith, this is the only book you'll need to forge a stronger, more rewarding connection with your four-legged companion.

Bioethics in the 21st Century

The Definitive Visual Guide

Bioethics is primarily an applied ethics of health related issues. It is considered an important guide for health care and its discourses and practices. Health related technology, such as information technology, is changing rapidly. Bioethics should arguably address such change as well as continue to address more established areas of health care and emerging areas of social concern such as climate change and its relation to health. This book illustrates the range of bioethics in the 21st century. The book is intentionally not comprehensive but rather illustrative of established, emerging and speculative bioethics, such as ethics of mental health care, ethics of nano-technology in health care, and ethics of cryogenics, respectively. Hopefully the book will motivate readers to reflect on health care as a work in progress that requires continuous ethical deliberation and guidance.

Raise that new puppy successfully with this understandable and user-friendly primer! Includes socialization, how to raise a confident puppy, children and puppies, basic obedience/manners, how to praise or correct, crate training, play biting, housetraining, through adolescence and problem-solving (submissive urination, home alone, barking, car sickness, more)

AFTER You Get Your Puppy covers the last three developmental deadlines that your puppy

needs to meet before he is five months old: 1. Your puppy should be socialized to a wide variety of people, especially children, men, and strangers, before he is twelve weeks old. 2. Your puppy must learn to inhibit the force of his bites and develop a "soft mouth" before he is eighteen weeks old. 3. You must prevent predictable adolescent problems. Veterinarian and animal behaviorist Dr. Ian Dunbar is the original creator of off-leash puppy classes, which sparked the revolution for positive, reward-based, dog-friendly dog training.

From the author of *The World of Fighting Dogs* and *Pit Bulls and Tenacious Guard Dogs* comes this third and most impressive book to date, *Gladiator Dogs*. Bringing to life 13 breeds originally used as fighting dogs, Dr. Carl Semencic illustrates the history, characteristics and abilities of the world's toughest canines, and shares hundreds of great color photographs of top dogs sent by owners around the globe. The author does not fight dogs and does not condone dogfighting, but he is fascinated with the qualities and instincts of these fearless gladiator breeds. *Gladiator Dogs* is a valuable book that represents years of experience and research on these remarkable historical dogs. In addition to the author's favorite breed, the American Pit Bull Terrier, Dr. Semencic discusses other related breeds, such as the Staffordshire Bull Terrier, Bull Terrier and American Staffordshire Terrier, covering the differences and similarities between these bully cousins. A respected rare-breed authority and an accomplished world traveler, Dr. Semencic shares his firsthand experience with these dogs from his trips to the Canary Islands, South Africa, Europe, and more. *Gladiator Dogs* profiles many breeds that the author has introduced, mentored and promoted, including the American Bulldog, Canary Dog, South African Boerboel and Korean Jindo.

The Science of Making Your Dog Happy

The Korean Jindo is a breed of hunting dog that originates from the Jindo Island, which is located in South Korea. The breed is celebrated throughout South Korea for having an extremely brave and loyal nature. The Korean Jindo was traditionally used for hunting purposes due to its courage, intelligence and pack sensibility. The breed was normally used to hunt medium to large sized game, such as deer and boar, but there is actually a South Korean legend that tells of how three Korean Jindos killed a Siberian Tiger during a hunt! Despite this legend seeming unrealistic, there are multiple reports of Korean Jindo killing deer or coyotes without the knowledge or direction of their owners. During a hunt, a pack of Korean Jindo will use their combined strength to take down the prey and then will send a single Jindo back to the hunter to lead him to the prey. The Korean Jindo is a breed of double coated spitz-type dog. The breed is split into two typing: Tonggot (which have a more

muscular body) and Hudu (which have more slender and agile bodies). The breed's coat normally comes in white, fawn, grey, black and brindle. The temperament of dogs is normally affected by the following factors: individual personality, heredity, training and socialization. It is therefore important to make sure that you meet the puppy's mother before purchasing a Korean Jindo. It is also important to make sure to thoroughly socialize your Korean Jindo with strangers, children and other animals during its puppyhood. Generally speaking, the Korean Jindo is an incredibly energetic, affectionate and loyal breed of dog. It is important to note that when keeping a Korean Jindo it is important to have a fenced garden (a fence of at least 6ft is recommended), as the Korean Jindo is likely to explore its surroundings due to its innate hunting instinct. It is important to note that as a working breed, the Korean Jindo has a high amount of energy which needs to be expended. If the Korean Jindo has a buildup of energy it is likely to develop destructive behaviors due to boredom or hyperactivity. Before purchasing any pet it is important to understand that as a pet owner you are responsible for the care and wellbeing of your pet. It is important to try and learn as much as you can about the animal you are considering to keep as a pet to make sure that your lifestyle, household and financial status are suited to provide your pet with the best possible care. This guide has been designed to provide you with both precise and concise information about a Korean Jindo's basic needs to help you provide your pet with the best quality care practices. This guide will give an in-depth explanation on training your Korean Jindo, raising your Korean Jindo from a puppy, grooming, health care and everything in between! "The Korean Jindo: A Complete and Comprehensive Owners Guide to: Buying, Owning, Health, Grooming, Training, Obedience, Understanding and Caring for Your Korean Jindo," by Michael Stonewood is the perfect purchase or gift for a first time Korean Jindo owner. This guide includes sections on caring for a puppy, breeding, health care, training, the basic cost of owning a Korean Jindo and much more. “An informative, well-written book on the evolution of all canids, including the wild types (wolves, coyotes, jackals, and dingoes)...Recommended.”—Choice Of the world’s dogs, fewer than two hundred million are pets, living with humans who provide food, shelter, squeaky toys, and fashionable sweaters. But roaming the planet are four times as many dogs who are their own masters—neighborhood dogs, dump dogs, mountain dogs. They are dogs, not companions, and these dogs, like pigeons or squirrels, are highly adapted scavengers who have evolved to fit particular niches in the vicinity of humans. This book present an eye-opening analysis of the evolution and adaptations of these unleashed dogs and what they can reveal about the species as a whole. Exploring the natural history of these animals, canine behavior experts Raymond and Lorna Coppingers explain how the village dogs of Vietnam, India, Africa, and Mexico are strikingly similar. These feral dogs, argue the Coppingers, are in fact the truly archetypal dogs, nearly uniform in size and shape and incredibly self-sufficient. Drawing on nearly five decades of research, they show how dogs actually domesticated themselves in order to become such efficient scavengers of human refuse. The Coppingers also examine the behavioral characteristics that enable dogs to live successfully and to reproduce, unconstrained by humans, in environments that we ordinarily do not think of as dog friendly. A fascinating exploration of what it actually means, genetically and behaviorally, to be a dog, What Is a Dog? is likely to change the way beagle or bulldog owners reflect on their four-legged friends.

This lovable new series introduces a little dog with a GIANT personality! Fenway is an excitable and endlessly energetic Jack Russell terrier. He lives in the city with Food Lady, Fetch Man, and—of course—his beloved short human and best-friend-in-the-world, Hattie. But when his family moves to the suburbs, Fenway faces a world of changes. He's pretty pleased with the huge Dog Park behind his new home, but he's not so happy about the Evil Squirrels that taunt him from the trees, the super-slippery

Wicked Floor in the Eating Room, and the changes that have come over Hattie lately. Rather than playing with Fenway, she seems more interested in her new short human friend, Angel, and learning to play baseball. His friends in the Dog Park next door say Hattie is outgrowing him, but that can't be right. And he's going to prove it! Get a dog's-eye view of the world in this heartwarming, enthusiastic "tail" about two best friends.

When cameras roll and directors call, "Action," some of the most dependable, funniest, and most enthusiastic actors stand poised on four legs, with ears alert. From Joey in War Horse to the wolves in Game of Thrones, what we see on screen is the result of meticulous preparation and professional teamwork. The eye-popping, heartwarming stories in these pages reveal the trainers, actors, directors, and, of course, dogs, cats, horses, penguins, deer, and other animals in all their behind-the-scenes glory. You'll discover that some animal actors have diva tendencies and others have rags-to-riches backstories. American Humane Association certified animal safety representatives work carefully to ensure that no animals are harmed, as they have been doing for decades. Animal stars have done it all – convinced us to eat more tacos, broken our hearts in war dramas, inspired us with enduring love and loyalty, kept us at the edge of our seats as they snarled in the shadows, mirrored human antics to make us roar with laughter, and, like Uggie (from The Artist), stolen the show on the red carpet. Who besides a monkey named Crystal could impress a brilliant comedian like Robin Williams in Night at the Museum? And animal stars will work for food, including only KFC original recipe for Casey the bear – no other fried chicken will do! These charming and sometimes hilarious stories will give you a new appreciation for the skill and patience it takes to teach nonhuman actors to perform on camera. Training tips from the pros and personal recollections of celebrities such as Julia Roberts, Hailee Steinfeld, and Steven Spielberg make this insider's look at the lives and work of these incomparable stars as irresistible as the animals themselves. A portion of the publisher's proceeds from this book will aid American Humane Association.

When the complexities of modern living demanded that, for his own protection as well as his master's convenience, the dog be made controllable, the average owner sought advice from the most available source, which was, too often, some local dog-show exhibitor. Not realizing that, excepting a few praiseworthy individuals, these exhibitors were only superficially concerned with the qualities of use and companionship, an unfortunate dog owner would accept the sight of trophies or ribbons as the credits of an expert. Growing numbers of people and dogs

continued to emphasize the advantages of proper dog-behavior and when, in 1935, The American Kennel Club instituted its obedience trials, the competition necessary to focus attention on results and improvement of methods was provided. And something else was observed. It was evident that thorough obedience training does more than assure a dog's response to his master's command; capacities for learning and emotional stability could be increased and integrated as permanent qualities of character. Recently, leading magazines of both general and specialized nature have made the public aware of the trained dog's potential, and of the recreational possibilities of dog training as a hobby. Interest in dog-training classes and other activities where dogs are dignified by usefulness, rather than merely looked at, is evidence that the dog-training public has outgrown the "make a game" and "tid-bit tossing" techniques that, by not being founded on positive and proper motivations, demonstrate the inadequacy of the master, thus promoting failure of response at those times when control is most needed, as well as contributing to the dog's feeling of insecurity. Dog owners of perspective have come to want the type of obedience upon which a blind person might stake his life, and the emotional stability that is vital to dogs in the presence of small, unpredictable children.
