Perilus is a Roman boy who is crazy about chariot racing. He loves to practise in his own homemade chariot (pulled by the family goat) and dreams of riding in the Circus Maximus himself one day. But when Perilus's hero, the brilliant charioteer Scorcha , goes missing on the day of the big race, Perilus finds his wish coming true sooner than he'd imagined!

A bright, science-minded boy goes to the beach equipped to collect and examine flotsam--anything floating that has been washed ashore. Bottles, lost toys, small objects of every description are among his usual finds.

But there's no way he could have prepared for one particular discovery: a barnacle-encrusted underwater camera, with its own secrets to share . . . and to keep. Each of David Wiesner's amazing picture books has revealed the magical possibilities of some ordinary thing or happening--a frog on a lily pad, a trip to the Empire State Building, a well-known nursery tale. In this Caldecott Medal winner, a day at the beach is the springboard into a wildly imaginative exploration of the mysteries of the deep, and of the qualities that enable us to witness these wonders and delight in them.

This is a fascinating and vividly portrayed story of life nearly 3,000 years ago. Kali and Brockan are in trouble. They have been using their stone axes to chip limpets off the rocks, but they've gone too far out and find themselves trapped by the tides. Then, an unexpected rescuer appears, a strange boy in a strange boat, carrying a strangely sharp axe of a type they have never seen before. Conflict arises as the village of Skara must decide what to do with the new ideas and practices that the boy brings. As a deadly storm threatens, the very survival of the village is in doubt. Step back into the Stone Age and learn about the daily life and rituals of the ancient village of Skara Brae in this compelling, fictional account of the famous Orkney settlement. Vivid descriptions and accurate historical details bring the village to life and make this an ideal choice for those studying the Stone Age curriculum.

To the dismay of his parents and friends, a prehistoric boy continually thinks of making things softer, warmer, and nicer, rather than being content in a world of stone.
