

La Ma C Canique Des Sectes

This volume contains the written versions of the lectures delivered by the participants of the Colloquium Origenianum Nonum held in Pecs (Hungary, 29 August - 2 September 2005). The main topic of the conference was Origen and the religious practice of his time. Here 49 scholars from some 18 countries publish their newest findings on the greatest and most influential Christian thinker before Augustine, who laid the foundation of the Biblical textual studies, created systematic and was regarded as an authentic spiritual leader of Christianity. The papers not only provide the best overview on a lively field of studies but also demonstrate how Origen's heritage in Christian history, theology and spirituality carried with it the imprint of one of the most vital traditions of our civilization. Similarly to the volumes of the earlier conferences (Boston 1989, Chantilly 1993, Hofgeismar-Marburg 1997 and Pisa 2001), the contributions are published by the series Bibliotheca Ephemeridum Theologiarum Lovaniensium.

La Sainte Bible, Ou L'Ancien Et Le Nouveau Testament

Historica, Biblica, Asctica Et Hagiographica

The essays collected here illustrate aspects of recent research conducted by graduate students in Canadian studies at various European universities. The methodological diversity displayed points to the very essence of the culture the contributors explore - what has been commonly termed the Canadian mosaic or, more recently, the Canadian kaleidoscope (Janice Kulyk-Keefer). In analysing the many facets of this mosaic, the numerous images of this kaleidoscope, the contributors offer fresh and youthful reappraisals of traditional visions of Canadianness.

La Sainte Bible ... Revue sur les originaux et retouchée dans le langage: avec de petites notes ... par David Martin

The design of mechanical structures with predictable and improved durability cannot be achieved without a thorough understanding of the mechanisms of fatigue damage and more specifically the relationships between the microstructure of materials and their fatigue properties. Written by leading researchers in the field, this book, along with the complementary books Fatigue of Materials and Structures: Fundamentals and Application to Damage and Design (both also edited by Claude Bathias and André Pineau), provides an authoritative, comprehensive and unified treatment of the mechanics and micromechanisms of fatigue in metals, polymers and composites. Each chapter is devoted to one of the major classes of materials or to different types of fatigue damage, thereby providing overall coverage of the field. This book deals with multiaxial fatigue, thermomechanical fatigue, fretting-fatigue, influence of defects on fatigue life, cumulative damage and damage tolerance, and will be an important and much used reference for students, practicing engineers and researchers studying fracture and fatigue in numerous areas of materials science and engineering, mechanical, nuclear and aerospace engineering.

Papers presented at the Fourteenth International Conference on Patristic Studies held in Oxford 2003 (see also Studia Patristica 40, 41, 42 and 43). The successive sets of Studia Patristica contain papers delivered at the International Conferences on Patristic Studies, which meet for a week once every four years in Oxford; they are held under the aegis of the Theology Faculty of the University. Members of these conferences come from all over the world and most offer papers. These range over the whole field, both East and West, from the second century to a section on the Nachleben of the Fathers. The majority are short papers dealing with some small and manageable point; they raise and sometimes resolve questions about the authenticity of documents, dates of events, and such like, and some unveil new texts. The smaller number of longer papers put such matters into context and indicate wider trends. The whole reflects the state of Patristic scholarship and demonstrates the vigour and popularity of the subject.
