In the fourteen years of NDTV’s Walk The Talk Shekhar Gupta has interviewed more than 600 stellar guests-an outstanding feature for one of Indian TV news channel’s most respected shows is the wide diversity of its guests. These range from heads of states to national, regional and international politicians and public figures, from Indian and global film stars to Nobel Laureates, scientists, economists, sports stars (not limited to cricket), spiritual gurus, business tycoons, philanthropists and, of course, activists. This book focuses exclusively on political leaders and public figures. Many of these conversations are path-breaking, and some extremely rare. For example, leaders like Sonia Gandhi and former prime minister P.V. Narasimha Rao have never before engaged in freewheeling, recorded conversations in such detail. Others have broken new ground since-Narendra Modi, L.K. Advani, Pranab Mukherjee, Mayawati and even M. Karunanidhi. There are also global thought leaders and heads of state: David Cameron, Henry Kissinger, and Pusp̄h Kamal Dahal ‘Prachanda’, among others. There is also the rarest of rare interviews with the former RSS chief K.S. Sudarshan. It was challenging to choose just twenty-five political personalities and voices to feature in this selection. And one criterion has been to try and pick those conversations that mark political shifts and change. Hopefully, these will help provide an understanding of recent political history, and how we have reached the point we are at today, in the words of these very significant and interesting people.

Coloured by poverty and horrifying brutality, Gorky’s childhood equipped him to understand - in a way denied to a Tolstoy or a Turgenev - the life of the ordinary Russian. After his father, a paperhanger and upholsterer, died of cholera, five-year-old Gorky was taken to live with his grandfather, a polecat-faced tyrant who would regularly beat him unconscious, and with his grandmother, a tender mountain of a woman and a wonderful storyteller, who would kneel beside their bed (with Gorky inside it pretending to be asleep) and give God her views on the day’s happenings, down to the last fascinating details. She was, in fact, Gorky’s closest friend and the epic heroine of a book swarming with characters and with the sensations of a curious and often frightened little boy. My Childhood, the first volume of Gorky’s autobiographical trilogy, was in part an act of exorcism. It describes a life begun in the raw, remembered with extraordinary charm and poignancy and without bitterness. Of all Gorky’s books this is the one that made him ‘the father of Russian literature’.

"A literary masterpiece... at once erudite and intimate, reflective and funny... it has the grit and pace of a thriller" Daily Telegraph
A novel of high adventure, great storytelling and moral purpose, based on an extraordinary true story of eight years in the Bombay underworld. In the early 80s, Gregory David Roberts, an armed robber and heroin addict, escaped from an Australian prison to India, where he lived in a Bombay slum. There, he established a health clinic and also joined the mafia, working as a money launderer, forger and street soldier. He found there to learn Hindi and Marathi, fall in love, and spend time being worked over in an Indian jail. Then, in case anyone thought he was slacking, he acted in Bollywood and fought with the Mujahadeen in Afghanistan... Amazingly, Roberts wrote Shantaram three times after prison guards trashed the first two versions. It's a profound tribute to his willpower... At once a high-kicking, eye-gouging adventure, a love saga and a savage yet tenderly lyrical fugitive vision." Time Out

Extraordinary shock wave lithotripsy (ESWL) arrived in the United States in February of 1994 with explosive impact in the field of urology. The first ESWL treatment in the United States with the Dornier H- device occurred at the Methodist Hospital of Indiana, and by the end of 1984, in spite of the rapidly the United StatesESWL study group had accrued over2.5(1) ESWL treatments, accumulated experience at the six institutions involved in the FDA trial of the Dornier HMI device, other urologists in this country and around the world had little opportunity to gain knowledge about the utilization of this revolutionary technique. For this reason, the Methodist Hospital of Indiana organized the first symposium on shock wave lithitripsy in February of1985. Interest in this meeting was intense, as approval of the Dornier device had occurred only a few weeks earlier in December of 1984. Because of the success of this initial meeting, subsequent meetings have been held annually in Indianapolis. Following the third annual symposium on extracorporeal shock wave lithotripsy in March of 1987, a number of participants and attendees requested that the information presented at the meeting be made available. Therefore, plans were made to publish the proceedings of the next meeting which occurred March 5 and 6, 1988. Counter Saudi Arabia is a wealthy and powerful country which wields influence in the West and across the Islamic world. Yet it remains a closed society. Its history in the twentieth century is dominated by the story of state formation. After the collapse of the Ottoman Empire, Ibn Sa’ud fought a long campaign to bring together a disparate people from across the Arabian peninsula. In 1932 the Kingdom of Saudi Arabia was born. Madawi al-Rasheed traces its extraordinary history from the age of emirates in the nineteenth century, through the 1990 Gulf War, to the present day. She fuses chronology with analysis, personal experience with oral histories, and draws on local and foreign documents to illuminate the social and cultural life of the Saudis. This is a rich and rewarding book which will be invaluable to students, and to all those trying to understand the enigma of Saudi Arabia—from publisher description at http://catdir.loc.gov/catdir/description/cam022/2001043609.html

One of the most popular Indian novels of all ages, ‘Ananda Math’ was translated innumerable times into Indian and English languages. Five editions were published in Bengali and Hindi during the author’s lifetime, the first in 1882. The novel has the backdrop of the 18th century famine in Bengal, infamous as ‘Chhyiattorer Manvanter’ (famine) of 76th Bengali year, 1276), to narrate the saga of armed uprising of the ascetics and their disciples against the pillaging East India Company rulers. The uprising is historically known as ‘Santan Vidroha’, the ascetics being the children of Goddess Jagadambe. The saga of ‘Ananda Math’ is thrilling and best epitomised in the patriotic mass-puller song ‘Bande Mataram’ (‘Hail thee, O My Motherland’). The song is still a mantra that stirs imagination of millions of Hindus. The ascetics robbed the tormentors of the British rulers and the greedy zamindars — distributed the looted wealth to poverty-stricken people but kept nothing for themselves. Their targets were most Company armoury and supplies. And had a highly organised setup, spread throughout Bengal. It was also India’s first battle for freedom, and not the Sipahi Vidroha of 1857.

Doing well with money isn’t necessarily about what you know. It’s about how you behave. And behavior is hard to teach, even to really smart people. Money—investing, personal finance, and business decisions—is typically taught as a math-based field, where data and formulas tell us exactly what to do. But in the real world people don’t make financial decisions on a spreadsheet. They make them at the dinner table, or in a meeting room, where personal history, your own unique view of the world, ego, pride, marketing, and odd incentives are scrambled together. In The Psychology of Money, award-winning author Morgan Housel shares 19 short stories exploring the strange ways people think about money and teaches you how to make better sense of one of life’s most important topics.

The aim of this book is to expand the subject and matter of architecture, and to explore their interdependence. There are now many architectures. This book acknowledges architecture far beyond the familiar boundaries of the discipline and reassesses the object at its centre: the building. Architectural matter is not always physical or building fabric. It is whatever architecture is made of, whether words, bricks, blood calls, sounds or pixels. The fifteen chapters are divided into three sections - on buildings, spaces and bodies - which each deal with a particular understanding of architecture and architectural matter. The richness and diversity of subjects and materials discussed in this book locates architecture firmly in the world as a whole, not just the domain of architects. In stating that architecture is far more than the work of architects, this book aims not to deny the importance of architects in the production of architecture but to see their role in more balanced terms and to acknowledge other architectural producers. Architecture can, for example, be found in the incisions of a surgeon, the instructions of a choreographer or the movements of a user. Architecture can be made of anything and by anyone.
