The Book of Squares by Fibonacci is a gem in the mathematical literature and one of the most important mathematical treatises written in the Middle Ages. It is a collection of theorems on indeterminate analysis and equations of second degree which yield, among other results, a solution to a problem proposed by Master John of Palermo to Leonardo at the Court of Frederick II. The book was dedicated and presented to the Emperor at Pisa in 1225. Dating back to the 13th century the book exhibits the early and continued fascination of men with our number system and the relationship among numbers with special properties such as prime numbers, squares, and odd numbers. The faithful translation into modern English and the commentary by the translator make this book accessible to professional mathematicians and amateurs who have always been intrigued by the lure of our number system.

*In this updated, second edition of the highly acclaimed international best seller, The Dollar Crisis: Causes, Consequences, Cures, Richard Duncan describes the flaws in the international monetary system that have destabilized the global economy and that may soon culminate in a deflation-induced worldwide economic slump. The Dollar Crisis is divided into five parts: Part One describes how the US trade deficits, which now exceed US\$1 million a minute, have destabilized the global economy by creating a worldwide credit bubble. Part Two explains why these giant deficits cannot persist and why a US recession and a collapse in the value of the Dollar are unavoidable. Part Three analyzes the extraordinarily harmful impact that the US recession and the collapse of the Dollar will have on the rest of the world. Part Four offers original recommendations that, if implemented, would help mitigate the damage of the coming worldwide downturn and put in place the foundations for balanced and sustainable economic growth in the decades ahead. Part Five, which has been newly added to the second edition, describes the extraordinary evolution of this crisis since the first edition was completed in September 2002. It also considers how the Dollar Crisis is likely to unfold over the years immediately ahead, the likely policy response to the crisis, and why that response cannot succeed. The Dollar Standard is inherently flawed and increasingly unstable. Its collapse will be the most important economic event of the 21st Century. Class 4F is a mighty challenge for any teacher, with One-Eyed Eileen's gang of freaks and their naughty antics. But Miss Corker (alias Miss Schnorkel) works out a clever way to handle them. The Bomb Tick

This book is a critical study of South African literature, from colonial and pre-colonial times onwards. Christopher Heywood discusses selected poems, plays and prose works in five literary traditions: Khoisan, Nguni-Sotho, Afrikaans, English, and Indian. The discussion includes over 100 authors and selected works, including poets from Mqhayi, Marais and Campbell to Butler, Serote and Krog, theatre writers from Boniface and Black to Fugard and Mda, and fiction writers from Schreiner and Plaatje to Bessie Head and the Nobel prizewinners Gordimer and Coetzee. The literature is explored in the setting of crises leading to the formation of modern South Africa, notably the rise and fall of the Emperor Shaka's Zulu kingdom, the Colenso crisis, industrialisation, the colonial and post-colonial wars of 1899, 1914, and 1939, and the dissolution of apartheid society. In Heywood's study, South African literature emerges as among the great literatures of the modern world.
