A Guide to Their Establishment and Operation

The ostensible purpose of a library is to preserve the printed word. But for fifty years our country's libraries—including the Library of Congress—have been doing just the opposite, destroying hundreds of thousands of historic newspapers and replacing them with microfilm copies that are difficult to read, lack all the color and quality of the original paper and illustrations, and deteriorate with age. With meticulous detective work and Baker's well-known explanatory power, Double Fold reveals a secret history of microfilm lobbyists, former CIA agents, and warehouses where priceless archives are destroyed with a machine called a guillotine. Baker argues passionately for preservation, even cashing in his own retirement account to save one important archive—all twenty tons of it. Written the brilliant narrative style that Nicholson Baker fans have come to expect, Double Fold is a persuasive and often devastating book that may turn out to be The Jungle of the American library system.

With a focus on political corruption, the 2004 edition of Transparency International's Global Corruption Report (GCR) identifies some of today's most pressing issues in the fight against corruption around the world. Essays examine the role of money in politics -- assessing the regulation of political party financing, suggesting ways to "rewire" the arms and oil trades for greater transparency and analysing the problem of vote buying. Reports consider attempts to repatriate assets stolen by politicians, disclosure regulations, the nexus between the media, politics and business as well as the issue of immunity from prosecution -- with special insight into extradition efforts in the Fujimori case in Peru. The GCR's global and regional reports explore recent developments such as the African Union convention against corruption, the EU accession process and the UN convention against corruption. Thirty-five country reports provide a critical assessment of new national anti-corruption legislation, institutional reform and the most important corruption-related issues of the last 12 months. This year's GCR also features special contributions by Jimmy Carter and former UN human rights commissioner Mary Robinson, who argues that "corruption hits hardest at the poorest in society". Their messages are reinforced by those of Luis Moreno Ocampo, chief prosecutor at the International Criminal Court, and Gherardo Colombo, whose efforts to prosecute Italian premier Silvio Berlusconi for bribery have drawn substantial media attention. Rounding out the report, a data and research section presents Transparency International's own Corruption Perceptions Index as well as other recent empirical research, including links between corruption, gender and poverty.

A discussion of how elementary school teachers and librarians can collaborate to provide rich and fulfilling literary and literacy experiences for the children they teach. It includes The Magic Library, a story that students wrote collaboratively based on what they learned from this method. Fiona Sweeney wants to do something that matters, and she chooses to make her mark in the arid bush of northeastern Kenya. By helping to start a traveling library, she hopes to bring the words of Homer, Hemingway, and Dr. Seuss to far-flung tiny communities where people live daily with drought, hunger, and disease. Her intentions are honorable, and her rules are firm: due to the limited number of donated books, if any one of them is not returned, the bookmobile will not return. But, encumbered by her Western values, Fi does not understand the people she seeks to help. And in the impoverished small community of Mididima, she finds herself caught in the middle of a volatile local struggle when the bookmobile's presence sparks a dangerous feud between the proponents of modernization and those who fear the loss of traditional ways.

What is the future of libraries? This question is frequently posed, with widespread research into the social and economic impact of libraries. Newspapers play an important role in forming public perceptions, but how do newspapers present libraries, their past, present and future? Nobody has yet taken the press to task on the quantity and quality of articles on libraries, however Libraries and Public Perception does just this, through comparative textual analysis of newspapers in Europe. After a comprehensive and useful introductory chapter, the book consists of the following five chapters: Wondering about the future of libraries; Measuring the value of libraries; Libraries in the newspapers; Contemporary challenges and public perception; Which library model from the newspapers: a synthesis. Provides an alternative means to evaluate the impact of libraries Compares different countries and societies regarding their representation of libraries Pursues its subject through active research, rather than self reflection

Cecilia Valdés is arguably the most important novel of 19th century Cuba. Originally published in New York City in 1882, Cirilo Villaverde's novel has fascinated readers inside and outside Cuba since the late 19th century. In this new English translation, a vast landscape emerges of the moral, political, and sexual depravity caused by slavery and colonialism. Set in the Havana of the 1830s, the novel introduces us to Cecilia, a beautiful light-skinned mulatta, who is being pursued by the son of a Spanish slave trader, named Leonardo. Unbeknownst to the two, they are the children of the same father. Eventually Cecilia gives in to Leonardo's advances: she becomes pregnant and gives birth to a baby girl. When Leonardo, who gets bored with Cecilia after a while, agrees to marry a white upper class woman, Cecilia vows revenge. A mulatto friend and suitor of hers kills Leonardo, and Cecilia is thrown into prison as an accessory to the crime. For the contemporary reader Helen Lane's masterful translation of Cecilia Valdés opens a new window into the intricate problems of race relations in Cuba and the Caribbean. There are the elite social circles of European and New World Whites, the rich culture of the free people of color, the class to which Cecilia herself belonged, and then the slaves, divided among themselves between those who were born in

Africa and those who were born in the New World, and those who worked on the sugar plantation and those who worked in the households of the rich people in Havana. Cecilia Valdés thus presents a vast portrait of sexual, social, and racial oppression, and the lived experience of Spanish colonialism in Cuba. Popular marriage counselor and seminar leader John Gray provides a unique, practical and proven way for men and women to communicate and relate better by acknowledging the differences between them. Once upon a time Martians and Venusians met, fell in love, and had happy relationships together because they respected and accepted their differences. Then they came to earth and amnesia set in: they forgot they were from different planets. Using this metaphor to illustrate the commonly occurring conflicts between men and women, Gray explains how these differences can come between the sexes and prohibit mutually fulfilling loving relationships. Based on years of successful counseling of couples, he gives advice on how to counteract these differences in communication styles, emotional needs and modes of behavior to promote a greater understanding between individual partners. Gray shows how men and women react differently in conversation and how their relationships are affected by male intimacy cycles ("get close", "back off"), and female self-esteem fluctuations ("I'm okay", "I'm not okay"). He encourages readers to accept the other gender's particular way of expressing love, and helps men and women learn how to fulfill each other's emotional needs. With practical suggestions on how to reduce conflict, crucial information on how to interpret a partner's behavior and methods for preventing emotional "trash from the past" from invading new relationships, Men Are from Mars, Women Are from Venus is a valuable tool for couples who want to develop deeper and more satisfying relationships with their partners.
