107 In this way the absolute values of the structure factors may be found, not the phases (6. 8). The problem to find these phases is the phase problem. The present article will treat the following topics. At first the description of the ideal crystal will be given in Chap. B. The underlying principles of this description are the concepts of reciprocal lattice, FOURIER synthesis and sym metry. The evaluation of the intensity will then follow in Chap. C and D. Chap. E is concerned with the phase problem and related topics. Though this article treats the analysis of crystal structures, the fundamental concepts for other structures will here be found too. But these topics, and the experimental methods, will I find their place elsewhere . B. Description of the crystalline state. 1. Lattice theory. a) The direct lattice. 8. Introduction. In Sect. 3, a description of the ideal crystal was given: The space, occupied by a crystal, is divided into congruent parallelepipeds, each with the same orientation. This parallelepiped is defined by the three basic vectors, a, a band c, drawn from an origin O (Fig. 2), and is called the primitive cell. This cell is filled with atoms (or ions), and the same configuration of atoms is repeated in space. It has been aptly called a three-dimensional wallpaper, as on a wallpaper the same pattern is repeated again and again.

This book combines the Holy Bible English Edition (King James Version) and French Edition (Louis Segond 1910 Version) into one. The Holy Bible - King James Version (KJV) is an English translation of the Christian Bible for the Church of England that began in 1604 and was completed in 1611. It is also known as the Authorized Version (AV) or King James Bible (KJB). The King James Version has been called "the most influential version of the most influential book in the world, in what is now its most influential language". This tranlation and its subsequent distribution was instrumental in opening the door to the spread of the truth. It is an excellent resource for bible study and spiritual fellowship. The Dictionary of Louisiana French (DLF) provides the richest inventory of French vocabulary in Louisiana and reflects precisely the speech of the period from 1930 to the present. This dictionary describes the current usage of French-speaking peoples in the five broad regions of South Louisiana: the coastal marshes, the banks of the Mississippi River, the central area, the north, and the western prairie. Data were collected during interviews from at least five persons in each of twenty-four areas in these regions. In addition to the data collected from fieldwork, the dictionary contains material compiled from existing lexical inventories, from texts published after 1930, and from archival recordings. The new authoritative resource, the DLF not only contains the largest number of words and expressions but also provides the most complete information available for each entry. Entries include the word in the conventional French spelling, the pronunciation (including attested variants), the part of speech classification, the English equivalent, and the word's use in common phrases. The DLF features a wealth of illustrative examples derived from fieldwork and textual sources and identification of the parish where the entry was collected or the source from which it was compiled. An English-to-Louisiana French index enables readers to find out how particular notions would be expressed in la Louisiane.

The eighth volume in the monumental series The Old French Crusade Cycle, The Jerusalem Continuats recounts the legendary and semi-historical events in the Holy Land after the death of Godfrey, leader of the First Crusade, and continuing up to the arrival of Salah ed-Din. Published in the original old French text, the project began in 1965 and will be completed with three forthcoming volumes. The series will put into one standard format the entire collection of text that tells the story of the First Crusade--texts that are dispersed among 11 manuscripts written during the 13th-15th centuries.
