

### Le Jour De Gra Ce Domaine A C Tranger T 9

*This volume illustrates the research not only of French accountants (Colasse, Durand, Jouanique, Lemarchand, Nikitin, Richard, Tessier) but also the work of Belgian authors writing in French (Stevelinck, Haulotte) and of French non-accountants (de Swarte, Durdilly, Sauvy). The work of British and North American academics, writing in English on French accounting history is also illustrated from the 1930s (Howard, Edwards), through to the 1960s (Parker) and the more recent research of Standish, Fortin and Bhimani. The contributions to this volume have been arranged both chronologically and thematically as follows: the earliest business accounting records; the first French accounting authors; Colbert, Savbary and the Ordonnance de Commerce; the eighteenth and nineteenth centuries; cost accounting; the national accounting plan; national income accounting; government accounting and accounting theory. An abstract of each contribution is given in both English and French.*

The government, the media, HMOs, and individual Americans have all embraced programs to promote disease prevention. Yet obesity is up, exercise is down, teenagers continue to smoke, and sexually transmitted disease is rampant. Why? These intriguing essays examine the ethical and social problems that create subtle obstacles to changing Americans' unhealthy behavior. The contributors raise profound questions about the role of the state or employers in trying to change health-related behavior, about the actual health and economic benefits of even trying, and about the freedom and responsibility of those of us who, as citizens, will be the target of such efforts. They ask, for instance, whether we are all equally free to live healthy lives or whether social and economic conditions make a difference. Do disease prevention programs actually save money, as is commonly argued? What is the moral legitimacy of using economic and other incentives to change people's behavior, especially when (as with HMOs) the goal is to control costs? One key issue explored throughout the book is the fundamental ambivalence of traditionally libertarian Americans about health promotion programs: we like the idea of good health, but we do not want government or others posing threats to our personal lifestyle choices. The contributors argue that such programs will continue to prove less than wholly successful without a fuller examination of their place in our national values.

*Rerum Britannicarum Medii Aevi Scriptores, Or, Chronicles and Memorials of Great Britain and Ireland During the Middle Ages*

Le roman d'Irina Muravyova, « Jour de grâce », retrace la vie d'une famille russe, les Ouchakoff, sur trois générations, de la révolution de 1917 à nos jours : l'exil pour la première , la vie en France et en Grande-Bretagne pour la seconde, et la découverte de l'« homo sovieticus » pour la troisième. Les moments de la vie, dramatiques ou heureux, s'enchaînent, s'entrecroisent, côtoyant des événements politiques ou historiques tragiques, mais toujours empreints de la prose particulièrement poétique qu'est celle d'Irina Muravyova.

*Memorials of the Order of the Garter, from Its Foundation to the Present Time*

*The Newberry Library in Chicago possesses one of the most distinguished collections of medieval and Renaissance manuscript books in North America. Based on two major private collections of the late nineteenth century—those of Henry Probasco and Edward E. Ayer—and scrupulously added to in this century, the holdings include late medieval bibles and breviaries, books of hours and books of homilies, and seminal texts on astronomy. Some of the books, such as those from the lbraries of Philip the Good and Anne of Brittany, are beautifully illuminated. But the collection also includes an unusual array of "typical" medieval books, chosen not for their beauty but for their paleographical, codicological, and textual interest. Such codices include an eleventh-century Carthusian monk, and numerous books of hours adapted for feminine use. Paul Saenger has painstakingly identified the text, illumination, physical structure, and provenance for each of the more than 200 books in the collection to provide an exemplary guide to literate culture in the late Middle Ages. This catalogue, carefully researched and handsomely illustrated, will be an invaluable resource for historians, art historians, paleographers, bibliographers, and collectors.*
