

Le Saint Coran 1ca C Da C Rom 1 Cd Audio

This book offers comparative ontologies of both Islam and liberalism as discourses more broadly construed. The author argues that, despite recent efforts to speak of overlapping consensus and discursive congruence, the fundamental categories that constitute "Islam" and "Liberalism" remain very different, and that these differences should be taken seriously. Thus far, no recent scholarly works have explicitly or meticulously broken down where these differences lie. The author rigorously explores questions related to rights, moral epistemologies, the role of religion in the public sphere, and more general approaches to legal discourse, via primary and canonical sources constitutive of both Islam and liberalism. He then goes on to articulate why communitarian modes of thought are better suited for engaging with Islam and contemporary socio-political modes of organization than liberalism is. This book will be of great interest to students and scholars of politics and international relations, Islam, liberalism, and communitarianism.

The First Book of Moses, Called Genesis

Bibliothèque orientale, ou Dictionnaire universel,

CONTENANT GENERALEMENT Tout ce qui regarde la connoissance des Peuples de l'Orient. LEURS HISTOIRES ET TRADITIONS VERITABLES OU FABULEUSES. LEURS RELIGIONS, SECTES ET POLITIQUE. Leurs Gouvernemens, Loix, Coutumes, Moeurs, Guerres, & les Révolutions de leurs Empires. LEURS SCIENCES, ET LEURS ARTS, Leurs théologie, Mythologie, Magie, Physique, Morale, Médecine, Mathématiques, Histoire naturelle, Chronologie, Géographie, Observations Astronomiques, Grammaire, & Rétorique. LES VIES ET ACTIONS REMARQUABLES DE TOUS LEURS SAINTS, Docteurs, Philosophes, Historiens, Poètes, Capitaines, & de tous ceux qui se sont rendus illustres parmi eux, par leur Vertu, ou par leur savoir. DES JUGEMENS CRITIQUES, ET DES EXTRAITS DE TOUS LEURS OUVRAGES, De leurs Traitez, Traductions, Commentaires, Abrezés, Recueils de Fables, de Sentences, de Maximes, de Proverbes, de Contes, de bons Mots, & de tous leurs Livres écrits en Arabe, en Persan, ou en Turc, sur toutes sortes de Sciences, d'Arts, & de Professions

Political History of a Religious Movement

This concise overview of the perception of Islam in eight of the most important German thinkers of the eighteenth and nineteenth centuries allows a new and fascinating investigation of how these thinkers, within their own bodies of work, often espoused contradicting ideas about Islam and their nearest Muslim neighbors. Exploring a variety of 'neat compartmentalizations' at work in the representations of Islam, as well as distinct vocabularies employed by these key intellectuals (theological, political, philological, poetic), Ian Almond parses these vocabularies to examine the importance of Islam in the very history of German thought. Almond further demonstrates the ways in which German philosophers such as Hegel, Kant, and Marx repeatedly ignored information about the Muslim world that did not harmonize with the particular landscapes they were trying to paint – a fact which in turn makes us reflect on what it means when a society possesses 'knowledge' of a foreign culture.

Le parfait notaire apostolique et procureur des officialitez, contenant les règles et les formules de toute sorte d'actes ecclésiastiques, qui sont passez tant par les notaires, que par les secrétaires des prélats & supérieurs ecclésiastiques, par les curez & vicaires, par les patrons & collateurs des benefices, par les universitez, par les greffiers des chapitres, & autres en matière ecclésiastique ; avec une instruction sur la procédure des officialitez ; le tout conformément aux nouveaux édits, declarations, arrêts & reglemens, à la jurisprudence, & à l'usage moderne. Augmenté du Traité de la réception des testamens par les curez & les vicaires; Par Me Jean-Louis Brunet, avocat au parlement

Vivid, dramatic portraits of Muslims in America in the years after 9/11, as they define themselves in a religious subculture torn between moderation and extremism There are as many as six million Muslims in the United States today. Islam (together with Christianity and Judaism) is now an American faith, and the challenges Muslims face as they reconcile their intense and demanding faith with our chaotic and permissive society are recognizable to all of us. From West Virginia to northern Idaho, American Islam takes readers into Muslim homes, mosques, and private gatherings to introduce a population of striking variety. The central characters range from a charismatic black imam schooled in the militancy of the Nation of Islam to the daughter of an Indian immigrant family whose feminist views divided her father's mosque in West Virginia. Here are lives in conflict, reflecting in different ways the turmoil affecting the religion worldwide. An intricate mixture of ideologies and cultures, American Muslims include immigrants and native born, black and white converts, those who are well integrated into the larger society and those who are alienated and extreme in their political views. Even as many American Muslims succeed in material terms and enrich our society, Islam is enmeshed in controversy in the United States, as thousands of American Muslims have been investigated and interrogated in the wake of 9/11. American Islam is an intimate and vivid group portrait of American Muslims in a time of turmoil and promise.

A Critical Re-evaluation

Authorized King James Version

L'illustration

An international literary phenomenon, The Elementary Particles is a frighteningly original novel—part Marguerite Duras and part Bret Easton Ellis—that leaps headlong into the malaise of contemporary existence. Bruno and Michel are half-brothers abandoned by their mother, an unabashed devotee of the drugged-out free-love world of the sixties. Bruno, the older, has become a raucously promiscuous hedonist himself, while Michel is an emotionally dead molecular biologist wholly immersed in the solitude of his work. Each is ultimately offered a final chance at genuine love, and what unfolds is a brilliantly caustic and unpredictable tale. Translated from the French by Frank Wynne.

Nuclear Science Abstracts

Carbonic anhydrases (CAs; EC 4.2.1.1) are metalloenzymes present in all kingdoms of life, as they equilibrate the reaction between three simple but essential chemical species: CO₂, bicarbonate, and protons. Discovered more than 80 years ago, in 1933, these enzymes have been extensively investigated due to the biomedical application of their inhibitors, but also because they are an extraordinary example of convergent evolution, with seven genetically distinct CA families that evolved independently in Bacteria, Archaea, and Eukarya. CAs are also among the most efficient enzymes known in nature, due to the fact that the uncatalyzed hydration of CO₂ is a very slow process and the physiological demands for its conversion to ionic, soluble species is very high. Inhibition of the CAs has pharmacological applications in many fields, such as antiglaucoma, anticonvulsant, antiobesity, and anticancer agents/diagnostic tools, but is also emerging for designing anti-infectives, i.e., antifungal, antibacterial, and antiprotozoan agents with a novel mechanism of action. Mitochondrial CAs are implicated in de novo lipogenesis, and thus selective inhibitors of such enzymes may be useful for the development of new antiobesity drugs. As tumor metabolism is diverse compared to that of normal cells, ultimately, relevant contributions on the role of the tumor-associated isoforms CA IX and XII in these phenomena have been published and the two isoforms have been validated as novel antitumor/antimetastatic drug targets, with antibodies and small-molecule inhibitors in various stages of clinical development. CAs also play a crucial role in other metabolic processes connected with urea biosynthesis, gluconeogenesis, and so on, since many carboxylation reactions catalyzed by acetyl-coenzyme A carboxylase or pyruvate carboxylase use bicarbonate, not CO₂, as a substrate. In organisms other than mammals, e.g., plants, algae, and cyanobacteria, CAs are involved in photosynthesis, whereas in many parasites (fungi, protozoa), they are involved in the de novo synthesis of important metabolites (lipids, nucleic acids, etc.). The metabolic effects related to interference with CA activity, however, have been scarcely investigated. The present Special Issue of Metabolites aims to fill this gap by presenting the latest developments in the field of CAs and their role in metabolism.

Enarrationes Epistolarvm Et Evangeliorvm, Qvas Postillas Vocant D. Martini Lvtheri VVittembergens

The publication of the King James version of the Bible, translated between 1603 and 1611, coincided with an extraordinary flowering of English literature and is universally acknowledged as the greatest influence on English-language literature in history. Now, world-class literary writers introduce the book of the King James Bible

in a series of beautifully designed, small-format volumes. The introducers' passionate, provocative, and personal engagements with the spirituality and the language of the text make the Bible come alive as a stunning work of literature and remind us of its overwhelming contemporary relevance.
