"e;Nobody in our family ever got divorced."e; - In the words of my dad."e;So there is always a first time for everything."e; - Those would be my words.Early in the 1990s, the Czech Republic was changing, desperately trying to enter a western capitalistic lifestyle. But the change was slow motion compared to the turbulent life of a young female journalist trying to do it all - end her first marriage, mother two kids, while drowning in lots of work. One could also say - divorcing chin first, pulling new jobs while juggling old jobs, surrounding herself with loyal friends, and marrying a new man, the love of her life, who was - ooohh my god! - a foreigner ... how scandalous!She is forced to fight with old traditional thinking, the socialistic school system, and a judgemental society. But she is never alone - with the help of her faithful friends, family and a refreshing dose of humour, she finally wins her life game of Czech Mate. And finally, a fresh start. Canada - here they come!If you enjoyed this book, try the prequel: Somersault

The 2019 edition of the International Migration Outlook analyses recent developments in migration movements and policies in OECD countries and some non-OECD economies. It also examines the evolution of labour market outcomes of immigrants in OECD countries.

Juvenile Delinquency in Europe and Beyond: Results of the Second International Self-Report Delinquency Study presents the status of juvenile crime and delinquency and its backgrounds in many of the European Union member states as well as in the United States, Canada, Venezuela and Surinam. The book includes information on key issues in juvenile delinquency such as victimization of young people, alcohol and drug use and its relation to juvenile crime, involvement in youth gangs, immigration, family and school and neighborhood situations. It provides insight into different views on what can be considered juvenile crime; what acts are subsumed in its definition and when we can speak about structural delinquent behavior. These insights are based on self-reported information systematically and simultaneously collected from about 70,000 12-15 year old youths in 28 countries. Until recently, the self-report methodology has not been applied on such a large scale in an international context. The results of this survey provide new and unexpected data about those young people who structurally commit criminal acts, as well as on the frequency of the behavior and the conditions that have an impact on offending. The wealth of descriptions and insights in delinquency of all these countries will be of great interest to scholars, students and practitioners because of the special character of the publication; it is a book of reference to everyone interested in the backgrounds of juvenile delinquency.

The Rough Guide to Czech Republic is the ultimate travel guide, with detailed coverage of all the best attractions the Czech Republic has to offer. Discover the magnificent art galleries and museums in the Czech Republic, visit one of the Czech Republic's world-class concerts or festivals, view Prague's spectacular architecture on a walking tour, or taste the flavours of Czech cuisine, while exploring all the corners of the enchanting Czech Republic with clear maps and stunning photography. Fully updated

and expanded, with descriptions and recommendations of the best hotels in Czech Republic and the best restaurants and bars throughout the Czech Republic. Whether you're looking for expert tips for exploring the Czech Republic's varied landscapes, an authoritative background on the history of the Czech Republic, or the low-down on the Czech Republic's sensational festivals, The Rough Guide to Czech Republic is the definitive guide to this enchanting region. Make the most of your holiday with The Rough Guide to the Czech Republic!

The European Union (EU) is attempting to integrate the science and engineering (S&E) research community and make the region's high concentration of science resources even more productive by encouraging greater cooperation and collaboration across borders. Data in this report describes growth in academic degrees, R&D, and gross domestic product (GDP). A high concentration of the world's scientific resources continue to reside in the European region. The current levels and projected growth of financial and human resources devoted to S&T in Europe pose some emerging issues that will be important in S&T policy discussions in the U.S. Charts and tables.

This three-volume set LNAI 8188, 8189 and 8190 constitutes the refereed proceedings of the European Conference on Machine Learning and

Knowledge Discovery in Databases, ECML PKDD 2013, held in Prague, Czech Republic, in September 2013. The 111 revised research papers presented together with 5 invited talks were carefully reviewed and selected from 447 submissions. The papers are organized in topical sections on reinforcement learning; Markov decision processes; active learning and optimization; learning from sequences; time series and spatio-temporal data; data streams; graphs and networks; social network analysis; natural language processing and information extraction; ranking and recommender systems; matrix and tensor analysis; structured output prediction, multi-label and multi-task learning; transfer learning; bayesian learning; graphical models; nearest-neighbor methods; ensembles; statistical learning; semi-supervised learning; unsupervised learning; subgroup discovery, outlier detection and anomaly detection; privacy and security; evaluation; applications; and medical applications.

The Meeting of Opposites?

In August 1938 George F. Kennan was assigned as Secretary of Legation in Prague. After the Germans occupied Czechoslovakia in March 1939, he stayed on in that country when most other Western observers had left. These diplomatic papers, letters, and notes are on-the-spot observations by a skilled and sensitive historian and diplomat. They offer a unique record of one of the tragic events in modern European history. Depicted here are the attempts at Germanization of Czech life, the cynical exploitation of various native organizations, the German insistence on a program of anti-Semitism, the take-over of Czech business and industry, the problems of currency and inflation. Originally published in 1968. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Can there be a spiritually rich engagement between Hindus and Christians?

In India there is a long history of interaction between them. In this helpful book, Andrew Wingate shares something of that from his direct experience of living in Tamil Nadu. But the growing economic power of India and of the Indian diaspora throughout the world, reveal how little written material is available about Hindus and Christians as they encounter each other outside India. *The Meeting of Opposites?* is founded upon experience and research, as well as recent meetings with Hindus, especially in the UK, the United States, and Sweden. The author gives many examples of dialogue and focuses on theological, spiritual, and missiological questions.

Taking the perspective of institutions and the system, *Education Policy Outlook 2019: Working Together to Help Students Achieve their Potential*, analyses the evolution of key education priorities and key education policies in 43 education systems. It compares more recent developments in education policy ecosystems (mainly between 2015 and 2019) with various education policies adopted between 2008 and 2014.

Education Policy Outlook 2019 Working Together to Help Students Achieve their Potential

On behalf of the NDT 2010 conference, the Program Committee and Charles University in Prague, Czech Republic, we welcome you to the proceedings of the Second International Conference on 'Networked Digital Technologies' (NDT 2010). The NDT 2010 conference explored new advances in digital and Web technology applications. It brought together researchers from various areas of computer and information sciences who addressed both theoretical and applied aspects of Web technology and Internet applications. We hope that the discussions and exchange of ideas that took place will contribute to advancements in the technology in the near future. The conference received 216 papers, out of which 85 were accepted, resulting in an acceptance rate of 39%. These accepted papers are authored by researchers from 34 countries covering many significant areas of Web applications. Each paper was evaluated by a minimum of two reviewers. Finally, we believe that the proceedings document the best research in the studied areas. We express our thanks to the Charles University in Prague, Springer, the authors and the

organizers of the conference.

Keys to building a new generation of courses and schools While many futurists tout the value of teaching students 21st-century skills, bridging the concept with the practice is best accomplished by professional educators. Authors Bruce Joyce and Emily Calhoun know how to actualize the critical reforms that enable schools to prepare students for today's workforce. Specific steps include: Providing technology access to all students to promote equity and engagement Developing hybrid courses that prepare students to meet 21st-century needs Designing professional development that connects technology to teaching Improving literacy instruction Involving teachers, parents, and community members in school leadership This book constitutes the thoroughly refereed post-proceedings of the 4th International Workshop on Machine Learning for Multimodal Interaction, MLMI 2007, held in Brno, Czech Republic, in June 2007. The 25 revised full papers presented together with 1 invited paper were carefully selected during two rounds of reviewing and revision from 60 workshop presentations. The papers are organized in topical sections on multimodal processing, HCI, user studies and applications, image and video processing, discourse and dialogue processing, speech and audio processing, as well as the PASCAL speech separation challenge.

Provides an overview of the Czech Republic's tertiary education system, including an account of recent trends and developments, an analysis of strengths and challenges, and recommendations for future policy development.

This publication analyses recent developments in migration movements and policies in OECD countries and selected non-OECD countries. It also includes two special chapters on the skills of immigrants and their use in the labour market as well as on the management of labour migration.

WINNER OF THE LAURA SHANNON PRIZE 2021 SHORTLISTED FOR THE LIONEL GELBER PRIZE 2020 A TIMES LITERARY SUPPLEMENT BOOK OF THE

**YEAR 2019 Migrants have stood at the heart of modern Europe's experience, whether trying to escape danger, to find a better life or as a result of deliberate policy, whether moving from the countryside to the city, or between countries, or from outside the continent altogether. Peter Gatrell's powerful new book is the first to bring these stories together into one place. He creates a compelling narrative bracketed by two nightmarish periods: the great convulsions following the fall of the Third Reich and the mass attempts in the 2010s by migrants to cross the Mediterranean into Europe. The Unsettling of Europe is a new history of the continent, charting the ever-changing arguments about the desirability or otherwise of migrants and their central role in Europe's post-1945 prosperity. Gatrell is as fascinating on the giant movements of millions (such as the epic waves of German migration) to that of much smaller groups, such as the Karelians, Armenians, Moluccans or Ugandan Asians. Above all he has written a book that makes the reader deeply aware of the many extraordinary journeys taken by countless individuals in pursuit of work, safety and dignity, all the time. This is a landmark book on a subject that, decade by decade, will always haunt Europe. 'Peter Gatrell has produced a tour de force ... This important and timely work on one of the most challenging issues in modern Europe deserves to be widely read' Ian Kershaw

This report, the final output of the Valuation of Environment-Related Health Impacts (VERHI) project, presents new findings on whether the value of reducing environmental impacts is greater for children than for adults.

Over the past decade, the healthcare industry has adopted games as a powerful tool for promoting personal health and wellness. Utilizing principles of gamification to engage

patients with positive reinforcement, these games promote stronger attention to clinical self-care guidelines, and offer exciting possibilities for primary prevention. Targeting an audience of academics, researchers, practitioners, healthcare professionals, and even patients, the Handbook of Research on Holistic Perspectives in Gamification for Clinical Practices reviews current studies and empirical evidence, highlights critical principles of gamification, and fosters the increasing application of games at the practical, clinical level.
