This stylish and highly entertaining account of the origins of the Franco-Dutch War of 1672 is based on massive archival researches covering twelve countries. Contrary to the accepted historical opinion that there was a meeting of minds within Louis XIV's conseil d'en haut over the desirability of the war, Professor Sonnino chronicles a story of bitter division, in the course of which the contrasting personalities of the king and of his most intimate advisors emerge in vivid detail. The executed venture which put the insolent Dutch in their place. Saint-Simon, on the other hand, saw it as the disastrous result of endemic jealousies, in which Le Tellier and Louvois sought to displace Colbert in Louis' affections. From these early views the modern consensus, in spite of occasional dissenters, has gradually evolved. Professor Sonnino, however, breaks through the maze of interpretations with decisive new evidence, and in an unusually clear and lively evocation of the events explains the many agonizing decisions that preceded one of the most dramatic conflicts of the seventeenth century.

This is not your ordinary how-to book! Austin TX based authors and polymer clay artists Kim Schlinke and Rande M. Ketzler artfully mix a clever mystery with 20 how-to projects that show step-by step photographs and instructions to create your own "ancient artifacts." These polymer clay masterpieces are beautiful enough to grace a museum collection-or yours! At 206 pages, this lavishly photographed book is stuffed with a multitude of projects that can be done just as presented or used as starting points to make faux gems for use in all sorts of designs. Priced retail at \$30, the hefty book's how-to projects weigh in at the mere cost of \$1.50 each. Animal lovers will be pleased to note that our authors also give us the secrets of making replicas of ivory and tiger claw that involve no cruelty towards elephants or wild cats whatsoever! Projects featured in this compendium include: Celtic Bronze Fibula, Navajo Silver Pendant, Art Nouveau Golden Gingko Brooch, Cabochons and Nugget Beads, Amethyst Silver Art Nouveau Pendant, Black Opal Cabochons, Barbarian Bracelet, Chrysoprase Cabochons (A and B Grade), Hammered Cuff Bracelet, Ancient Limestone Fossil Pebbles, Cycladic Goddess, Leopardskin Jasper, Primitive Pebble Bracelet, Faux Twigs, Fantastical Forgeries Bracelet, Blue Lace Agate Tile Bracelet, Copper & Rhodochrosite Tiered Necklace, Snowflake Jades, Qin Dynasty Bangles, Amber Caravan Necklace, Primeval Coral Rock Hound B Cabochons, Gothic Revival Pendant, Victorian Mourning Brooch, Faux Tiger Claw, Victorian Raj Brooch, Faux Tiffany Glass Scarabs, Faux Ivory Cuff Bracelet Find out how it is all done-and "who done it"-along with our intrepid protagonists, Parker and Peele. "What is this stuff?" wondered Parker, and her companion pointed her umbrella to the drawings that plastered the walls. "The raw materials for the best forgeries ever seen" replied her friend. "This is where they were created." T Parker exclaimed softly as they recognized several objects from the Museum. Parker picked up one of the colorful lumps and frowned. "What is this, Peele? It's soft like clay, but I've never seen these colors before." "No," said her friend, "nor have I-at least in this form. I suspect it requires a catalyst of some type to render it into the false gems-ah, here!" Peele uncovered an array of electric ovens. "Heat-how charming. This must be some type of polymer, which, when brought to the proper temperature, becomes soft like clay." "I see," said Parker, "but I don't see how you can make these colors so easily."

Butterfly's Tongue" tells of the friendship between a boy and an anarchist schoolmaster, born of their mutual interest in animal and insect life, and destroyed by the start of the Spanish Civil War. "A Saxophone in the Mist" and "Carmina" also tell of first experiences with the adult world.

In this provocative book, David Calleo surveys German history - not to present new material but to look afresh at the old. He argues that recent explanations for Germany's external conflicts have focused on flaws in the country's traditional political institutions and culture. These German-centred explanations are convenient Calleo notes, for they tend to exonerate others from their responsibilities in bringing about two world wars, namely the American and Russian hegemonies in Europe. As a result of this approach the big questions in German history are still answered with the ageing clichés of a generation ago despite the proliferation of German historical studies. Throughout Professor Calleo examines with some scepticism the concept of Germany's uniqueness and its consequences. In effect, his study stresses the continuing relevance of traditional issues among the Western states. This book, he asserts, should be regarded as a modest dissent from the prevailing view that history either began or ended in 1945.

A course which develops all-round competence in English.

The relative status of native and non-native speaker language teachers within educational institutions has long been an issue worldwide but until recently, the voices of teachers articulating their own concerns have been rare. This innovative volume explores language-based forms of prejudice against native-speaker teachers.

The application of the Fourier transform is being seen to an increasing extent in all branches of chemistry, but it is in the area of chemical analysis that the greatest activity is taking place. Fourier transform infrared and nuclear magnetic resonance spectrometry are already routine methods for obtaining high-sensitivity IR and NMR spectra. Analogous methods are now being developed for mass spectrometry (Fourier transform ion cyclotron resonance spectrometry) and microwave spectroscopy, and Fourier transform techniques have been successfully applied in several areas of electrochemistry. In addition the fast Fourier transform algorithm has been used for smoothing, interpolation, and more efficient storage of data, and has been studied as a potential method for more efficient identification of samples using pattern recognition techniques. Linear transforms have also been shown to be useful in analytical chemistry. Probably the most important of these is the Hadamard transform, which has been applied in alternative methods for obtaining IR and NMR data at high sensitivity. Even though measurements involving this algorithm will probably not be applied as universally as their Fourier transform analogs, in the area of pattern recognition application of the Hadamard transform will in all probability prove more important than application of the Fourier transform.

Louis XIV is one of history's most notorious rulers. Ruling for three quarters of a century, the King of France had the longest reign in European history, and the effects of his rule would create the conditions that would lead to the French Revolution. Written by an authority on 17th century Europe, Pierre Goubert not only outlines the life the famous "Sun King," but the millions of subjects under his rule, and the effects his choices had on the them. Praise for Louis XIV and Twenty Million Frenchman " . . . It is safe to recommend the work as the best book available on the subject for the educated layman."--Kirkus Reviews "This masterful work . . . should serve a generation of student and general readers as the essential introduction to the France of Louis XIV."--The American Historical Review "In this field M. Goubert is a past master, and his subtle portrayal of the great social trends of the age deserves to be widely read."--Times Literary Supplement
