Graves is ready to walk down the aisle and start a new life - despite the fact her father is still on the loose, blood money is stashed in her closet, and an unidentified body is missing from her parents' bunker. But it isn't her personal life that's threatening her chance to say "I Do." It's the remains of a family of four that were killed in an ordinary house fire. But once JJ and Jack start investigating, they find there's nothing "ordinary" about murder.

She and Savage have a complicated history, and Savage could make the preacher disappear forever if it served his own agenda. From New York Times and USA Today bestselling author Liliana Hart comes a new story in her MacKenzie Family series... Mia Russo spent ten years working undercover, entrenched in the dregs of society before handing in her shield. Opening her own pawn shop is a piece of cake in comparison. All she needs is the bad attitude she developed on the streets and the shotgun under her counter to keep law and order. Until the day Zeke McBride walks into her shop. Zeke knows Mia has every right not to trust him. He was the one who chose the next op instead of her. And all he can hope is that somewhere under the snarl and cynicism is a woman who can forgive. Because whether she trusts him or not, they're going to have to work together to bring down the gang that's decided Mia is their next target. ****Every 1001 Dark Nights novella is a standalone story. For new readers, it's an introduction to an author's world. And for fans, it's a bonus book in the author's series. We hope you'll enjoy each one as much as we do.****

A Bad Karma Special Ops Novella

The global biodiversity and climate emergencies demand transformative changes to human activities. For example, food production relies on synthetic, industrial and non-sustainable products for managing pests, weeds and diseases of crops. Sustainable farming requires approaches to managing these agricultural constraints that are more environmentally benign and work with rather than against nature. Increasing pressure on synthetic products has reinvigorated efforts to identify alternative pest management options, including plant-based solutions that are environmentally benign and can be tailored to different farmers' needs, from commercial to small holder and subsistence farming. Botanical insecticides and pesticidal plants can offer a novel, effective and more sustainable alternative to synthetic products for controlling pests, diseases and weeds. This Special Issue reviews and reports the latest developments in plant-based pesticides from identification of bioactive plant chemicals, mechanisms of activity and validation of their use in horticulture and disease vector control. Other work reports applications in rice weeds, combination biopesticides and how chemistry varies spatially and influences the effectiveness of botanicals in different locations. Three reviews assess wider questions around the potential of plant-based pest management to address the global challenges of new, invasive and established crop pests and as-yet underexploited pesticidal plants.
