This paper describes the situation of bank distress which developed in Bangladesh since 1983-84. Since the key problem banks are state-owned, there has been no banking crisis, although costs to the economy have been high. Main causes of distress included preferential and directed lending, and administered interest rates. Inadequate supervision and managerial weaknesses were other contributory factors. Macroeconomic trends played a small role only. The authorities have recently taken major corrective measures. The paper calls for determination in the implementation of these measures to swiftly restore financial stability and limit the overall cost of this long-running distress situation.

India needs to spend close to Rs43 trillion (about \$646 billion) on infrastructure through to 2022. Such a staggering requirement cannot be met though traditional sources such as public sector bank loans. India must immediately explore and quickly ramp up financing from alternative investment sources. This paper explores the securitization of existing infrastructure assets by public sector banks in India, as a means to (i) strengthen their capital position to meet Basel III requirements, (ii) free up capital to help fund new credit growth opportunities, and (iii) ultimately improve fund flow to the infrastructure sector by enhancing its access to institutional investors.

Expanding Access to Finance

“The Reserve Bank of India would like to assure the General public that Indian Banking system is safe and stable.” – RBI Statement, 1 October 2019 Why did India’s central Bank have to issue an unprecedented statement to that effect? In Pandemonium: The Great Indian Banking Tragedy, bestselling author Tamal Bandyopadhyay takes you in search for the answer. It is a definitive insider story on the rot in India’s banking system – how many promoters easily swapped equity with debt as bank managements looked the other way to protect their balance sheets, until the RBI began waging a war against ballooning bad loans. The same troubles quickly spilled over to India’s mushrooming non-banking financial companies, which were quick to spot the post-demonetisation easy liquidity and banks’ reluctance to lend, prompting them to make the cardinal sin of borrowing short to lend long. What really ails public sector banks, the backbone of India’s financial system? Is it the government ownership itself, or how this owner actually behaves? And just when many were rooting for privatisation as a way out, powerful bankers such as Chanda Kochhar and Rana Kapoor exposed the soft underbelly of seemingly more efficient and profitable private banks of India. A timely and insider look at dramatic forces reshaping banking in Asia’s third-largest economy, this book is a bird’s-eye view of Indian banking and also a fly-on-wall documentary. A must-read to understand contemporary India’s challenges and economic potential.
