“Crichton fuses with 'True Detective’ in a hammering hard-science thriller where the heart of darkness lies not in the soul, but in the genes. Thilliez engineers a winner.” –Scott Sigler, New York Times–bestselling author of the Infected trilogy
New from Mark Polizzotti, translator of 2014 Nobel Prize–winning author Patrick Modiano: the gripping sequel to runaway international bestseller Syndrome E
In the shocking sequel to runaway international bestseller Syndrome E, Lucie Henebelle and Inspector Sharko have reunited to take on the case of the brutal murder of Eva Louts, a promising graduate student who was killed while working at a primate research center outside Paris. But what first appears to be a vicious animal attack soon proves to be something more sinister. What was Eva secretly researching? Was she tracking three fanatical scientists who control a thirty-thousand-year-old virus with plans to unleash it into the world? With his unmatched ability to inject cutting-edge science into his novels, Thilliez draws on genetics, paleontology, and the dark side of human nature to create this smart, adrenaline-fueled thriller. Bred to Kill moves from the rain-slicked streets of Paris to the heart of the Alps to the remote Amazon jungle as Lucie and Sharko work to solve the murder–before whoever killed Eva comes for them.

Geronimo Stilton visits Australia where he has an adventurous time dodging sharks and snakes, and getting lost in the Outback. Geronimo Stilton series #29.

The 3-Minute series offers the essence of the world's most important figures with all the padding removed. It divides up their lives into 60 three-minute chunks, each presented as an easily digestible visual snack. Divided into three thematic sections on Life, Works, and Influence–each containing an hour's worth of fascinating facts–the 3-Minute series is a whole new style of biography. So, who do you get to follow Einstein, the first of our 3-Minute wonders? Who else could it be but Stephen Hawking, the world's best-known living theoretical physicist, who celebrates his 70th birthday in January 2012. Professor Hawking is one of the great geniuses of our time, but how much do you really know about him and his work. He not only explores the frontiers of space-time, but takes the trouble to come back and try to explain it to us non-science brains down here (A Brief History of Time, 1988). His intellect and enthusiasm undimmed by the motor neurone disease that hampers his body, his work on gravitational singularities (black holes), the nature of time, and the attempt to reconcile quantum mechanics with Einstein's general relativity is genuinely brain-bending.We are proud that we have condensed it into 3 minute chunks.

In this "immersive, densely reported, and altogether remarkable first book [with] the texture and color of a first-rate novel" (New York Times), journalist Doug Bock Clark tells the epic story of the world's last subsistence whalers and the threats posed to a tribe on the brink. A New York Times Notable Book A New York Times Editors' Choice Winner of Lowell Thomas Travel Book Award Silver Medal Finalist for William Saroyan International Writing Prize Longlisted for Mountbatten Award for Best Book Telegraph Best Travel Books of the Year Hampshire Gazette Best Books of 2019 One of the favorite books of Yuval Noah Harari, author of the classic bestseller Sapiens, "on the subject of humanity's place in the world." (via Airmail) On a volcanic island in the Savu Sea so remote that other Indonesians call it "The Land Left Behind" live the Lamalerans: a tribe of 1,500 hunter-

*gatherers who are the world's last subsistence whalers. They have survived for half a millennium by hunting whales with bamboo harpoons and handmade wooden boats powered by sails of woven palm fronds. But now, under assault from the rapacious forces of the modern era and a global economy, their way of life teeters on the brink of collapse. Award-winning journalist Doug Bock Clark, one of a handful of Westerners who speak the Lamaleran language, lived with the tribe across three years, and he brings their world and their people to vivid life in this gripping story of a vanishing culture. Jon, an orphaned apprentice whaler, toils to earn his harpoon and provide for his ailing grandparents, while Ika, his indomitable younger sister, is eager to forge a life unconstrained by tradition, and to realize a star-crossed love. Frans, an aging shaman, tries to unite the tribe in order to undo a deadly curse. And Ignatius, a legendary harpooner entering retirement, labors to hand down the Ways of the Ancestors to his son, Ben, who would secretly rather become a DJ in the distant tourist mecca of Bali. Deeply empathetic and richly reported, The Last Whalers is a riveting, powerful chronicle of the collision between one of the planet's dwindling indigenous peoples and the irresistible enticements and upheavals of a rapidly transforming world.*
