When child language began to be studied in the sixties, what interested researchers most was what could be considered language per se. Holophrases were excluded as seemingly having no syntax and research work was carried out as of the two-word stage. Language development was studied up to around age seven, the age at which natural acquisition processes were considered to be contaminated by formal schooling in language. In opposition to such an attitude, this volume has ignored this heavily studied area of language development preferring to present research being carried out at the two ends of the development process that had been rejected: that of prelinguistic speech skills, at the one end, and the development of discourse at the other. This book thus begins with the physical properties in human development necessary for language to occur. It also offers studies on a child's initial equipment, i.e. intra-uterine skills and skills acquired before first words. At the other end are studies on the development of discourse, i.e. the child's acquisition of the ability not only to

juxtapose ideas, but to link them into cohesive, coherent texts and to use argumentation, skills that are not fully acquired until the child is well into adolescence and nearing adulthood.

Developed to follow on from the increasingly popular Expo for Key Stage 3, this motivating new course offers fresh approaches and seamless progression from Year 9 for optimal results at GCSE.

Le premier mai 1876 Louis Riel écrivait à Mgr Courget: "Le Saint-Esprit m'a dit: Tu es le Messie de Gloire humaine que la Maison de Jacob s'attendait à trouver dans le Verbe incarné". A la suite de quel cheminement psychologique et sous la pression de quels facteurs sociaux Louis Riel en arriva-t-il à cette conviction? Quelle fut l'évolution de cette idéologie messianique et millénariste tout au long de sa vie? Enfin quel rôle joua cette idéologie dans ses actions politiques entre 1869 et 1885? Utilisant abondamment des sources manuscrites souvent inédites, la présente analyse de sociologie historique entend situer la personne de Riel dans l'histoire collective du peuple métis. La description circonstanciée des bouleversements socioéconomiques du peuple métis et l'analyse détaillée des traumatismes psychologiques de Louis Riel se conjuguent pour éclairer d'un jour nouveau cette page controversée de l'histoire canadienne.

[a new language] in a handful of days for a TV interview. I asked Benny for help and his advice was invaluable." - Tim Ferriss What if you could skip the years of study and jump right to speaking French? Sound crazy? No, it's language hacking. It's about learning what's indispensable, skipping what's not - and using what you've learned to have real conversations in French - from day one! Unlike most traditional language courses that try to teach you the rules of a language, Language Hacking French shows you how to learn and speak French immediately through proven memory techniques, unconventional shortcuts and conversation strategies perfect by one of the world's greatest language learners, Benny Lewis, aka the Irish Polyglot. The Method Language Hacking takes a modern approach to language learning, blending the power of online social collaboration and the 80/20 principle of learning (Benny's ten #languagehacks show you how to achieve more with less!). It focuses on the conversations and language that learners need to master right away, rather than presenting language in the order of difficulty like most courses. This means you can start having conversations immediately.

Course Features Each of the 10 units culminates with a speaking mission that you can choose to share on the italki Language Hacking learner community (www.italki.com/languagehacking) where you can give and get feedback and extend your learning beyond the

Language Bases ... Discourse Bases
This series of HANDBOOKS OF LINGUISTICS AND COMMUNICATION SCIENCE is designed to illuminate a field which not only includes general linguistics and the study of linguistics as applied to specific languages, but also covers those more recent areas which have developed from the increasing body of research into the manifold forms of communicative action and interaction.

For "classic" linguistics there appears to be a need for a review of the state of the art which will provide a reference base for the rapid advances in research undertaken from a variety of theoretical standpoints, while in the more recent branches of communication science the handbooks will give researchers both an overview and orientation. To attain these objectives, the series will aim for a standard comparable to that of the leading handbooks in other disciplines, and to this end will strive for comprehensiveness, theoretical explicitness, reliable documentation of data and findings, and up-to-date methodology. The editors, both of the series and of the individual volumes, and the individual contributors, are committed to this aim. The languages of publication are English, German, and French. The main aim of the series is to provide an appropriate account of the state of the art in the various areas of linguistics and communication science covered by each of the various handbooks; however no inflexible pre-set limits will be imposed on the scope of each volume. The series is open-ended, and can thus take account of further developments in the field. This conception, coupled with the necessity of allowing adequate time for each volume to be prepared with the necessary care, means that there is no set time-table for the publication of the whole series. Each volume will be a self-contained work, complete in itself. The order in

which the handbooks are published does not imply any rank ordering, but is determined by the way in which the series is organized; the editor of the whole series enlist a competent editor for each individual volume. Once the principal editor for a volume has been found, he or she then has a completely free hand in the choice of co-editors and contributors. The editors plan each volume independently of the others, being governed only by general formal principles. The series editor only intervene where questions of delineation between individual volumes are concerned. It is felt that this (*modus operandi*) is best suited to achieving the objectives of the series, namely to give a competent account of the present state of knowledge and of the perception of the problems in the area covered by each volume.

Hexagonie is a unique scheme for introducing Key Stage 2 pupils to French. Language elements are introduced in a logical, easy-to-understand way, so that children quickly communicate with confidence. Language is broken down into manageable chunks and presents them in a methodical manner enabling pupils to feel that they can converse in French.

The Dictionary of Louisiana French (DLF) provides the richest inventory of French vocabulary in Louisiana and reflects precisely the speech of the period from 1930 to the present. This dictionary describes the current usage of French-speaking peoples in the five broad regions of South Louisiana: the coastal marshes, the banks of the Mississippi River, the central area, the north, and the western prairie. Data were collected during interviews from at least five persons in each of twenty-four areas in these regions. In addition to the data collected from fieldwork, the dictionary contains material compiled from existing lexical inventories, from texts published after 1930, and from archival recordings. The new authoritative resource, the DLF not only contains the largest number of words and expressions but also provides the most complete information available for each entry. Entries include the word in the

conventional French spelling, the pronunciation (including attested variants), the part of speech classification, the English equivalent, and the word's use in common phrases. The DLF features a wealth of illustrative examples derived from fieldwork and textual sources and identification of the parish where the entry was collected or the source from which it was compiled. An English-to-Louisiana French index enables readers to find out how particular notions would be expressed in la Louisiane.

LANGUAGE HACKING FRENCH (Learn How to Speak French - Right Away)

A Scottish Metrical Romance, (about 1490-1500 A.D.) Re-edited from a Manuscript in the Cambridge University Library

School success in the 21st century requires proficiency with expository discourse -- the use and understanding of informative language in spoken and written modalities. This occurs, for example, when high school students read their textbooks and listen to their teachers' lectures, and later are asked to demonstrate their knowledge of this complex topic through oral reports and essay examinations. Although many students are proficient with the expository genre, others struggle to meet these expectations. This book is designed to provide information on the use and understanding of expository discourse in school-age children, adolescents, and young adults. Recently, researchers from around the world have been investigating the development of this genre in typical students and in those with language disorders.

Although many books have addressed the development of conversational and narrative discourse, by comparison, books devoted to the topic of expository discourse are sparse. This crossdisciplinary volume fills that gap in the literature and makes a unique contribution to the study of language development and disorders. It will be of interest to a range of professionals, including speech-language pathologists, teachers, linguists, and psychologists who are concerned with language development and disorders.
