Hybrid Renaissance introduces the idea that the Renaissance in Italy, elsewhere in Europe, and in the world beyond Europe is an example of cultural hybridization. The two key concepts used in this book are ?hybridization? and ?Renaissance?.

## File Type PDF Ma Renaissance

Roughly speaking, hybridity refers to something new that emerges from the combination of diverse older elements. (The term "hybridization" is preferable to "hybridity" because it refers to a process rather than to a state, and also because it encourages the writer and the readers alike to think in terms

## File Type PDF Ma Renaissance

of degree: where there is more or less, rather than presence versus absence.) The book begins with a discussion of the concept of cultural hybridization and a cluster of other concepts related to it. Then comes a geography of cultural hybridization focusing on three locales: courts, major cities (whether

## File Type PDF Ma Renaissance

ports or capitals) and frontiers. The following seven chapters describe the hybridity of the Renaissance in different fields: architecture, painting and sculpture, languages, literature, music, philosophy and law and finally religion. The essay concludes with a brief account of attempts to resist

## File Type PDF Ma Renaissance

hybridization or to purify cultures or domains from what was already hybridized.

Manufacturing's central role in global innovation Companies compete on the decisions they make. For years—even decades—in response to intensifying global competition, companies decided

## File Type PDF Ma Renaissance

to outsource their manufacturing operations in order to reduce costs. But we are now seeing the alarming long-term effect of those choices: in many cases, once manufacturing capabilities go away, so does much of the ability to innovate and compete. Manufacturing, it turns out, really

## File Type PDF Ma Renaissance

matters in an innovation-driven economy. In *Producing Prosperity*, Harvard Business School professors Gary Pisano and Willy Shih show the disastrous consequences of years of poor sourcing decisions and underinvestment in manufacturing capabilities. They reveal how today's

## File Type PDF Ma Renaissance

undervalued manufacturing operations often hold the seeds of tomorrow's innovative new products, arguing that companies must reinvest in new product and process development in the US industrial sector. Only by reviving this "industrial commons" can the world's largest economy build the

## File Type PDF Ma Renaissance

expertise and manufacturing muscle to regain competitive advantage.

America needs a manufacturing renaissance—for restoring itself, and for the global economy as a whole. This will require major changes. Pisano and Shih show how company-level choices are key to the sustained success of

## File Type PDF Ma Renaissance

industries and economies, and they provide business leaders with a framework for understanding the links between manufacturing and innovation that will enable them to make better outsourcing decisions. They also detail how government must change its support of basic and applied scientific

## File Type PDF Ma Renaissance

research, and promote collaboration between business and academia. For executives, policymakers, academics, and innovators alike, Producing Prosperity provides the clearest and most compelling account yet of how the American economy lost its competitive edge—and how to get it
