More than three decades after its first publication, Edward Said's groundbreaking critique of the West's historical, cultural, and political perceptions of the East has become a modern classic. In this wide-ranging, intellectually vigorous study, Said traces the origins of "orientalism" to the centuries-long period during which Europe

dominated the Middle and Near East and, from its position of power, defined "the orient" simply as "other than" the occident. This entrenched view continues to dominate western ideas and, because it does not allow the East to represent itself, prevents true understanding. Essential, and still eye-opening, Orientalism remains one of the most important books written about our divided world.

She was a poor Southern tobacco farmer who worked the same land as her slave ancestors, yet her cells—taken without her knowledge—became one of the most important tools in

*medicine: The first “immortal” human cells grown in culture, which are still alive today, though she has been dead for more than sixty years. HeLa cells were vital for developing the polio vaccine; uncovered secrets of cancer, viruses, and the atom bomb’s effects; helped lead to important advances like in vitro fertilization, cloning, and gene mapping; and have been bought and sold by the billions. Yet Henrietta Lacks remains virtually unknown, buried in an unmarked grave. Henrietta’s family did not learn of her “immortality” until more than twenty years after her death, when scientists investigating HeLa began using her husband and children in research without informed consent. And though the cells had launched a multimillion-dollar industry that sells human biological materials, her family never saw any of the profits. As Rebecca Skloot so brilliantly shows, the story of the Lacks family—past and present—is inextricably connected to the dark history of experimentation on African Americans, the birth of bioethics, and the legal battles over whether we control the stuff we are made of. Over the*

Deborah was consumed with questions: Had scientists cloned her mother? Had they killed her to harvest her cells? And if her mother was so important to medicine, why couldn’t her children afford health insurance? Intimate in feeling, astonishing in scope, and impossible to put down, The Immortal Life of Henrietta Lacks captures the beauty and drama of scientific discovery, as well as its human consequences.*

*William Sydney Porter, better known as O. Henry, was an American writer who lived in the late 19th century. He gains wide popularity with his short stories which often take place either in New York or some small American towns. The plot twists and the surprise endings are a typical and integral part of O. Henry's short stories. Some of his best known works are "The Gift of the Magi", "The Cop and the Anthem", "A Retrieved Reformation". His stories often deal with ordinary people and the individual aspects of life. As a result of the outstanding literature legacy that O. Henry left behind, there is an American annual award after his name, given to exceptional short stories.*

**Modern life is often described as an iron cage from which there is no escape. But popular culture venerates leisure and travel as authentic escape routes from routine and monotony. However what kind of escape is tolerated in modern society? How is it shaped by historical expectations of leisure and travel? And what do we actually experience when we engage in leisure or travel activity? This fascinating and accomplished book tries to supply answers to these questions. A major scholarly contribution to the sociological analysis of leisure, pleasure and travel, Dr Rojek's study is a radical challenge to the existing paradigmatic orthodoxy. Bryan S. Red is the neighborhood "wishtree"—people write their wishes on pieces of cloth and tie them to Red's branches. Along with a crow named Bongo and other animals who seek refuge in Red's hollows, this wishtree watches over the neighborhood. When a new family moves in, not everyone is welcoming, and Red's experience as a wishtree is more important than ever. Because he spends so much time perfecting his flying form instead of concentrating on getting food, a seagull is ostracized by the rest of the flock.

There are two kinds of families: the ones we are born into and the ones we create. Walk has never left the coastal California town where he grew up. He may have become the chief of police, but he's still trying to heal the old wound of having given the testimony that sent his best friend, Vincent King, to prison decades before. Now, thirty years later, Vincent is being released. Duchess is a thirteen-year-old self-proclaimed outlaw. Her mother, Star, grew up with Walk and Vincent. Walk is in overdrive trying to protect them, but Vincent and Star seem bent on sliding deeper into self-destruction. Star always burned bright, but recently that light has dimmed, leaving Duchess to parent not only her mother but her five-year-old brother. At school the other kids make fun of Duchess—her clothes are torn, her hair a mess. But let them throw their sticks, because she'll throw stones. Rules are for other people. She's just trying to survive and keep her family together. A fortysomething-year-old sheriff and a thirteen-year-old girl may not seem to have a lot in common. But they both have come to expect that people will disappoint you, loved ones will leave you, and if you open your heart it will be broken. So when trouble arrives with Vincent King, Walk and Duchess find they will be unable to do anything but usher it in, arms wide closed. Chris Whitaker has written an extraordinary novel about people who deserve so much more than life serves them. At times devastating, with flashes of humor and hope

throughout, it is ultimately an inspiring tale of how the human spirit prevails and how, in the end, love—in all its different guises—wins.

The Elements of Style is an American English writing style guide in numerous editions. The original was composed by William Strunk Jr. in 1918, and published by Harcourt in 1920, comprising eight "elementary rules of usage", ten "elementary principles of composition", "a few matters of form", a list of 49 "words and expressions commonly misused", and a list of 57 "words often misspelled". E. B. White greatly enlarged and revised the book for publication by Macmillan in 1959. That was the first edition of the so-called Strunk & White, which Time named in 2011 as one of the 100 best and most influential books written in English since 1923.

A notable contribution to our understanding of ourselves. This book explores the realm of human behavior in social situations and the way that we appear to others. Dr. Goffman uses the metaphor of theatrical performance as a framework. Each person in everyday social intercourse presents himself

and his activity to others, attempts to guide and control the impressions they form of him, and employs certain techniques in order to sustain his performance, just as an actor presents a character to an audience. The discussions of these social techniques offered here are based upon detailed research and observation of social customs in many regions.
