Great as a gift, this book will dumfound friends and family and have them on their knees begging for the secret behind these mind-boggling tricks. Includes an introductory essays on magic tricks and card manipulation. If you practice any sort of magic—or plan on giving it a try—you probably know that for most people, card tricks are often the starting point. If you have a deck of cards readily available, as many common households do, the only things required to wow an audience are a little sleight of hand and a magician's secrets. In spite of the timeless credo "good magicians never reveal their secrets," renowned magicians Jean Hugard and Frederick Braué generously divulged theirs in *Card Tricks: The Royal Road to Card Magic*. Published originally in the 1940s, this classic guide contains more than one hundred spectacular tricks allowing anyone to pick up a deck and dazzle an audience—whether their performance is in a theatre, at a

party, or even on the street! With more than 120 illustrations to accompany trick instructions and the addition of a new foreword by Steven Cohen, a master of sleight of hand, this edition of Card Tricks is one of the leading authoritative books on card magic.

Mathematical card effects offer both beginning and experienced magicians an opportunity to entertain with a minimum of props. Featuring mostly original creations, *Mathematical Card Magic: Fifty-Two New Effects* presents an entertaining look at new mathematically based card tricks. Each chapter contains four card effects, generally starting with simple applications of a particular mathematical principle and ending with more complex ones. Practice a handful of the introductory effects and, in no time, you'll establish your reputation as a "mathemagician." Delve a little deeper into each chapter and the mathematics gets more interesting. The author explains the mathematics as needed in an easy-to-follow way. He also provides additional details, background, and suggestions for further
