This book has been a best seller for more than a decade, currently in its 13th edition it is thoroughly updated and revised with current trend in competitive examinations across various domains. The contents are broadly divided into four sections World, Science, India and Current affairs. Each chapter contains more than 100 MCQs with answer keys. A key feature of this book is the 30 page colorful maps, provided with fact files from authentic sources. The maps also include some added information on geography, population, and economy of the entire continent. Designed and developed for both classroom use and self learning, this updated edition is a

Fermentation is unique in that brewing fermentation and yeast biotechnology are covered in detail from a commercial perspective. Now available for the first time in paperback, the book is aimed at commercial brewers and their ingredient and equipment suppliers (including packaging manufacturers). It is also an essential reference source for students on brewing courses and workers in research and academic institutions. Definitive reference work and practical guide for the industry. Highly commercially relevant yet academically rigorous. Authors from industry leading brewers.

The present volume contains the proceedings of the Seventh International East-West Symposium of New Testament Scholars in Moscow 2016. Its contributions are devoted to different aspects of the question of the relation between history and theology in New Testament and extracanonical Gospel literature. They deal with problems regarding the impact of critical historical approaches

of the European Union over half a million Polish migrants have registered to work in the United Kingdom, constituting one of the largest migration movements in contemporary Europe. Drawing on research undertaken across a wide range of disciplines - history, economics, sociology, anthropology, film studies and discourse analysis - and focusing on both the Polish and British aspects of this phenomenon - both emigration and immigration - this edited collection investigates what is actually new about this migration flow, what its causes and consequences are,

This text properly considers the most recent and relevant advances in molecular RB of GB, taking into account the related topics of pathobiology, and underscores the most promising translational perspectives from the preclinical to the clinical domain. Section I (From Bedside to Bench) discusses conditions associated with RT resistance of GB and the consequent RB hints, technology improvements intended to overcome RT-

resistance of GB, mathematical modeling of RB parameters from clinical studies, the present impact of molecular prognostic factors in therapy of GB, and RT tolerance of normal brain.

Section II (Preclinical Research and Pathobiology Topics) presents the traditional and mechanistic/molecular approaches to RB of GB, genetic and epigenetic studies on GB, issues of cell-death pathways, stem-like cells, invasiveness, tumor microenvironment, hypoxia, mi-RNA manipulations, and nanoparticle technology.

Section III (Translational Perspectives) presents RB

A303 is more than a road. It is a story. One of the essential routes of English motoring and the road of choice to the West Country for thousands of holidaymakers, the A303 recalls a time when the journey was an adventure and not simply about getting there. Tom Fort gives voice to the stories this road has to tell, from the bluestones of Stonehenge to Roman roads and drovers paths, to turnpike tollhouses, mad vicars, wicked Earls and solstice seekers, the history, geography and culture of this road tells a story of an English way of life. It is arranged chronologically with the first section covering the beginning of illustration; the second moves from the illuminated manuscript to the advent of printing; the third and fourth takes the reader from the earliest woodcut illustrations to the beginning of the 20th century; and the final part is concerned with children's books. An annotated bibliography follows which will lead the reader to additional delights and discoveries. The contributors are distinguished art historians as well as well known anthropologists, members of Classics and English departments, librarians, historians, and

organic reactions which are highly efficient, regioselective and allow for mild reaction conditions. The archetypal click reaction of Cu(I)-catalyzed azide-alkyne cycloaddition (CuAAC) is used in many diverse areas and has been extensively developed for polymer synthesis, leading to the term of click polymerization. This technique enables the preparation of functional polymers with linear and topological structures

that have the potential to be used in optoelectronics and biological fields. Edited by world renowned experts, Click Polymerization is the first book to comprehensively summarize this approach to polymer synthesis consolidating all the different reaction types in one resource. From the basic knowledge through to the latest developments in synthesis, chapters include transition-metal catalysed and metal-free

azide-alkyne click polymerizations as well as thiol-ene, thiol-yne and thiol-epoxy click polymerizations. The book provides an authoritative guide to click polymerization techniques for graduate students and researchers interested in polymer chemistry and materials science.

Recent advances in cellular and molecular biology have markedly increased our understanding of normal and abnormal hypothalam

ic-pituitary-testicular function. Like other volumes in the Contemporary Endocrinology series, the goal of Male Hypogonadism: Basic, Clinical, and Therapeutic Principles is to link current knowledge of basic biology to the practice of medicine. The development of new methods for testosterone replacement has substantially increased the number of men who are seeking to determine whether they are

hypogonadal, and who are using testosterone replacement therapy, thus mandating a broader understanding of testosterone deficiency. The chapters of this book were contributed by authors from around the world, and from various scientific and clinical disciplines, who have devoted their careers to the study of the physiology and pathophysiology of the male. Thus, this comprehensive and focused volume is

Taking the time to acquire the skills for upholstery restoration may feel like a daunting task, but what if an experienced upholsterer presented every skill you needed to restore upholstery yourself? Starting with a list of necessary tools, author Fred Mattson guides you through all the required tasks, including seat restoration;
