This book is structured with the aim of providing English language teaching materials for college students in second semester. Learning materials and assignments in this book are developed with the principles of the Communicative Approach to develop students' competencies in the four language skills, namely listening, speaking, reading and writing. the learning materials and tasks integrally develop life skills in a broad sense and increase awareness of diversity. In addition, for the purpose of enrichment and evaluation, each unit is equipped with structured tasks in the form of evaluation or student's activity. To provide opportunities for students to evaluate themselves independently, a self-evaluation format is also provided.

**Reading, Writing, and Studying Strategies:** An Integrated Curriculum is a review manual that combines the teaching of reading and writing and makes the relationship between the two activities explicit for students. This unique program has been field-tested and effectively implemented in secondary classrooms. It also provides instructors with a teacher's script to support the effective presentation of new content. The skills and strategies that are taught in each instructional unit are fully explained, illustrated, modeled, and then reinforced with examples that students work out by following a step-by-step approach. This easy-to-follow text uses the same format in all of the units--lesson script, handouts, controlled practice set, and answer keys.

This volume represents a beginning effort to compile a history of educational psychology The project began, innocuously enough, several years ago when we decided to add mon material about the history of educational psychology to the undergraduate course we were teaching. What seemed like a simple task became very complex as we searched in vain for a volume dealing with the topic. We ended up drawing on various histories of psychology that devoted anywhere from a few paragraphs to several pages to the topic and on a very few articles addressing the issue. We were startled, frankly, by the apparent lack of interest in the history of our field and decided to attempt to compile a history ourselves. As is the case with any edited volume, the contributing authors deserve credit for its positive features. They uniformly made every effort asked of them and taught us much about educational psychology. Any errors or omissions are our responsibility alone.
