

Man From The South 1948 Roald Dahl

The extraordinary story of the lifeboat service on the south coast of England.

*In his new book *The Strange Case of the Rickety Cossack*, human paleoanthropologist Ian Tattersall argues that a long tradition of "human exceptionalism" in paleoanthropology has distorted the picture of human evolution. Drawing partly on his own career—from young scientist in awe of his elders to crotchety elder statesman—Tattersall offers an idiosyncratic look at the competitive world of paleoanthropology, beginning with Charles Darwin 150 years ago, and continuing through the Leakey dynasty in Africa, and concluding with the latest astonishing findings in the Caucasus. The book's title refers to the 1856 discovery of a clearly very old skull cap in Germany's Neander Valley. The possessor had a brain as large as a modern human, but a heavy low braincase with a prominent brow ridge. Scientists tried hard to explain away the inconvenient possibility that this was not actually our direct relative. One extreme interpretation suggested that the preserved leg bones were curved by both rickets, and by a life on horseback. The pain of the unfortunate individual's affliction had caused him to chronically furrow his brow in agony, leading to the excessive development of bone above the eye*

sockets. The subsequent history of human evolutionary studies is full of similarly fanciful interpretations. With tact and humor, Tattersall concludes that we are not the perfected products of natural processes, but instead the result of substantial doses of random happenstance. This book demonstrates that transformative processes occurred in Chinese religions during the last decade of the Qing dynasty and the entire Republican period. Focusing on Shanghai and Zhejiang, it delves into the workings of social structures, religious practices, and personal commitments as they evolved during this period of wrenching changes.

An African Story is a short, gripping story of life in wartime from Roald Dahl, the master of the shocking tale. In An African Story, Roald Dahl, one of the world's favourite authors, tells us the twisted tale of the dog killer, the missing milk, the old man and the snake. An African Story is taken from the short story collection Over to You, which includes nine other dramatic and terrifying tales of life as a wartime fighter pilot, and is drawn from Dahl's own experiences during the Second World War. This story is also available as a Penguin digital audio download read by Cillian Murphy. Roald Dahl, the brilliant and worldwide acclaimed author of Charlie and the Chocolate Factory, James and the Giant Peach, Matilda, and many more classics for children, also wrote scores of short stories for adults. These delightfully

disturbing tales have often been filmed and were most recently the inspiration for the West End play, Roald Dahl's Twisted Tales by Jeremy Dyson. Roald Dahl's stories continue to make readers shiver today.

This Companion authoritatively points to the main areas of enquiry within the subject of African American art history. The first section examines how African American art has been constructed over the course of a century of published scholarship. The second section studies how African American art is and has been taught and researched in academia. The third part focuses on how African American art has been reflected in art galleries and museums. The final section opens up understandings of what we mean when we speak of African American art. This book will be of interest to graduate students, researchers, and professors and may be used in American art, African American art, visual culture, and culture classes.

The Landlady is a brilliant gem of a short story from Roald Dahl, the master of the sting in the tail. If the nation as a whole during the 1940s was halfway between the Great Depression of the 1930s and the postwar prosperity of the 1950s, the South found itself struggling through an additional transition, one bound up in an often violent reworking of its own sense of history and regional identity. Examining the changing nature of racial politics in the 1940s, McKay Jenkins measures its impact on white Southern literature, history, and culture. Jenkins focuses on four white Southern writers--W. J. Cash, William Alexander Percy, Lillian Smith, and Carson McCullers--to show how they constructed images of race and race relations within works that professed to have little, if anything, to do with race. Sexual isolation further complicated these authors' struggles with issues of identity and repression, he argues, allowing them to occupy a space between the privilege of whiteness and the alienation of blackness. Although their views on race varied tremendously, these Southern writers' uneasy relationship with their own dominant racial group belies the idea that "whiteness" was an unchallenged, monolithic racial identity in the region.

Starting at the turn of the century, most African American midwives in the South were gradually excluded from reproductive health care. Gertrude Fraser shows how physicians, public health personnel, and state legislators mounted a campaign ostensibly to improve maternal and infant health, especially in rural areas. They brought traditional midwives under the control of a supervisory body, and eventually

eliminated them. In the writings and programs produced by these physicians and public health officials, Fraser finds a universe of ideas about race, gender, the relationship of medicine to society, and the status of the South in the national political and social economies. Fraser also studies this experience through dialogues of memory. She interviews members of a rural Virginia African American community that included not just retired midwives and their descendants, but anyone who lived through this transformation in medical care--especially the women who gave birth at home attended by a midwife. She compares these narrations to those in contemporary medical journals and public health materials, discovering contradictions and ambivalence: was the midwife a figure of shame or pride? How did one distance oneself from what was now considered superstitious or backward and at the same time acknowledge and show pride in the former unquestioned authority of these beliefs and practices? In an important contribution to African American studies and anthropology, *African American Midwifery in the South* brings new voices to the discourse on the hidden world of midwives and birthing.

African American Midwifery in the South

You're in the American South now, a proud region with a distinctive history and culture. A place that echoes with names like Thomas Jefferson and Robert E. Lee, Scarlett O'Hara and Uncle Remus, Martin Luther King and William Faulkner, Billy Graham, Mahalia Jackson, Muhammad Ali, Elvis Presley. Home

of the country blues and country music, bluegrass and Dixieland jazz, gospel music and rock and roll. Where menus offer both down-home biscuits and gravy and uptown shrimp and grits. Where churches preach against "cigarettes, whiskey, and wild, wild women" (all Southern products) and where American football is a religion. For more than thirty years John Shelton Reed has been "minding" the South--watching over it, providing commentary upon it. He is the author or editor of thirteen books about the South, and despite his disclaimer regarding formal study of Southern history, Reed has read widely and in depth about the South. His primary focus is upon Southerners' present-day culture and consciousness, but he knows that one must approach the South historically in order to understand the place and its people. Why is the South so different from the rest of the country? Rupert Vance, Reed's predecessor in sociology at Chapel Hill, once observed that the very existence of the South is a triumph of history over geography and economics. The South has resisted being assimilated by the larger United States and has kept a

personality that is distinctly its own. That is why Reed celebrates the South. His essays cover everything from great thinkers about the South--Eugene D. Genovese, C. Vann Woodward, M. E. Bradford--to the uniqueness of a region that was once a hotbed of racism, but has recently attracted hundreds of thousands of blacks transplanted from the North. There are even a few chapters about Southerners who have devoted their talents to different subjects altogether, from politics or soft drinks to rock and roll or the design of silver jewelry. Reed writes with wit and Southern charm, never afraid to speak his mind, even when it comes to taking his beloved South to task. While readers may not share all his opinions, most will agree that John Shelton Reed is one of the best "South watchers" there is.

"At a time when race, class, and gender dominate historical writing, Leuchtenburg argues that place is no less significant. In a period when America is said to be homogenized, he shows that sectional distinctions persist. And in an era when political history is devalued, he demonstrates that government can

profoundly affect people's lives and that presidents can be change-makers."--Jacket.

Man from the South is a short, sharp, chilling story from Roald Dahl, the master of the shocking tale. In Man from the South, Roald Dahl, one of the world's favourite authors, tells a sinister story about the darker side of human nature. Here, a man takes part in a very unusual bet, one with appalling consequences . . . Man from the South is taken from the short story collection Someone Like You, which includes seventeen other devious and shocking stories, featuring the wife who serves a dish that baffles the police; a curious machine that reveals the horrifying truth about plants; the man waiting to be bitten by the venomous snake asleep on his stomach; and others. 'The absolute master of the twist in the tale.' (Observer) This story is also available as a Penguin digital audio download read by Stephen Mangan. Roald Dahl, the brilliant and worldwide acclaimed author of Charlie and the Chocolate Factory, James and the Giant Peach, Matilda, and many more classics for children, also wrote scores of short stories for adults. Ethnicity in American Feature Films, 1911-1960

American students vary in educational achievement, but white students in general typically have better test scores and grades than black students. Why is this the case, and what can school leaders do about it? In The Color of Mind, Derrick Darby and John L. Rury answer these pressing questions and show that we cannot make further progress in closing the achievement gap until we understand its racist origins. Telling the story of what they call the Color of Mind—the idea that there are racial differences in intelligence, character, and

behavior—they show how philosophers, such as David Hume and Immanuel Kant, and American statesman Thomas Jefferson, contributed to the construction of this pernicious idea, how it influenced the nature of schooling and student achievement, and how voices of dissent such as Frederick Douglass, Frances Ellen Watkins Harper, and W. E. B. Du Bois debunked the Color of Mind and worked to undo its adverse impacts. Rejecting the view that racial differences in educational achievement are a product of innate or cultural differences, Darby and Rury uncover the historical interplay between ideas about race and American schooling, to show clearly that the racial achievement gap has been socially and institutionally constructed. School leaders striving to bring justice and dignity to American schools today must work to root out the systemic manifestations of these ideas within schools, while still doing what they can to mitigate the negative effects of poverty, segregation, inequality, and other external factors that adversely affect student achievement. While we cannot expect schools alone to solve these vexing social problems, we must demand that they address the dignitary injustices associated with how we track, discipline, and deal

with special education that reinforce long-standing racist ideas. That is the only way to expel the Color of Mind from schools, close the racial achievement gap, and afford all children the dignity they deserve.

In 1948 most white people in the North had no idea how unjust and unequal daily life was for the 10 million African Americans living in the South. But that suddenly changed after Ray Sprigle, a famous white journalist from Pittsburgh, went undercover and lived as a black man in the Jim Crow South. Escorted through the South's parallel black society by John Wesley Dobbs, a historic black civil rights pioneer from Atlanta, Sprigle met with sharecroppers, local black leaders, and families of lynching victims. He visited ramshackle black schools and slept at the homes of prosperous black farmers and doctors. The Pittsburgh Post-Gazette reporter's series was syndicated coast to coast in white newspapers and carried into the South only by the Pittsburgh Courier, the country's leading black paper. His vivid descriptions and undisguised outrage at "the iniquitous Jim Crow system" shocked the North, enraged the South, and ignited the first national debate in the media about ending America's system of

apartheid. Six years before Brown v. Board of Education, seven years before the murder of Emmett Till, and thirteen years before John Howard Griffin's similar experiment became the bestseller Black Like Me, Sprigle's intrepid journalism blasted into the American consciousness the grim reality of black lives in the South. Author Bill Steigerwald elevates Sprigle's groundbreaking exposé to its rightful place among the seminal events of the early Civil Rights movement. Barry Jones? Dictionary of World Biography weaves historical facts with perspective on the subjects and the influence they had on theirs and on modern times. Gain a unique insight into the life and times of important identities, cultural icons and controversial characters.
