From simple tips on hygiene to an empowering message on how to distinguish safe and unsafe touch, Shruti Singhal's visuals and text provide perfect reading material for talking about health, safety, and emotional and physical well-being with very young children. Published by Young Zubaan.

As a child, there are constantly people trying to pick you up, hug you, or tickle you. Sometimes, though, children fall victims to people who try to touch them inappropriately. But how do you tell someone, most likely an adult, that you don't want to be touched? Or, if it has already happened, how do you tell an adult you trust about what happened? You're only a child, and they're the adults. Why would they believe you? My Body Belongs to Me! is an educational tool to help instill confidence in children when it comes to their bodies. The narrative of the story is led by a girl named Clara, who encourages kids to say "no" if they are uncomfortable with physical contact. The narrator gives readers tips about what they can say or do to avoid unwanted physical contact, or how to tell the right people in the event it has already occurred. My Body Belongs to Me! is an invaluable resource that gives children a voice in uncomfortable situations. Suited for children ages 3 to 6, this should be in all doctor's offices, counselor's offices, and all parents should read to their preschool-aged children to teach them how to effectively say no to unwanted touching and how to report unwanted touching if it does occur.

Now with new art by Katie Kath (illustrator of Unusual Chickens for the Exceptional Poultry Farmer), this easy-to-understand introduction teaches children how to quantify the things in their daily routines. They'll learn all about the tools they need to measure--rulers, scales, pencils, and cups--as well as the language to express what they find. Readers will soon have the answers to their questions--how far, how tall, and how small? Me and the Measure of Things joins the other repackages in Joan Sweeney's popular Me...series--Me on the Map, Me and My Place in Space, Me and My Amazing Body, Me and My Family Tree, Me Counting Time, and Me and My Senses.

Here's a lively, easy-to-read, and easy-to-use introduction to anatomy by the author and illustrator of the popular Me on the Map and Me and My Place in Space. What makes the body move? How does the brain tell the rest of the body what to do? Part by part, fact by fact, each major part of the body is clearly and simply explained including what it does and how it works. Colorful, detailed illustrations show where each part of the body is located. And an amusing, amazing body fact section is included at the very end.
