A Word Building Approach

Medical Terminology Express

This workbook complements a number of allied health products, especially the Allied Health Dictionary and the medical terminology textbooks published by McGraw-Hill. The Medical Terminology WordBuilder and Communications Workbook emphasizes the dual tasks of word building and communication to make students valuable employees in their allied health careers. The workbook is chock-full of exercises, case studies, and verbal and written communication work to guide the student through realistic simulations of job activities and job search tasks.

Resource added for the Medical Assistant program 315091.

Building a Medical Vocabulary, 4th Edition, teaches you the fundamental word parts that make up the language of health care - and then explores how these word parts are used to construct more complex terms. This

cumulative, "building block" approach makes it easier for you to learn the vocabulary covered in the book...and equips you to recognize and analyze the new terms that you'll encounter throughout your career! Each chapter focuses on a separate body system, to make understanding and remembering new terminology simple and logical. You'll quickly become familiar with the terms that apply to each body system's anatomy, its diseases, and the drugs and procedures that are used to diagnose and treat them.

Now in its 2nd edition, Medical Terminology Express adapts Barbara Gylys's proven word-building techniques for the short-course. Organized by body system, this text shows the connection between anatomical structures and associated medial word roots.

Abstract: A study guide for medical field workers provides a systematic approach for building a vocabulary and developing an understanding of thousands of medical terms. This approach is based on and active participation by the reader in identifying word parts, building new words, and pronouncing and practicing them. Following a description of the system, 10 study units teach the reader to form a constantly expanding medical vocabulary by using new word parts. Each study unit is divided into numbered frames; each frame provides information and asks a question, the answer to which is
