The Dusky Dolphin: Master Acrobat Off Different Shores covers various topics about the dusky dolphin, including its taxonomy, history and demography, ecology, and behavior. After introducing the dusky dolphin as a member of the genus *Lagenorhynchus* under the family Delphinidae, the book continues by describing its life history, its demographic patterns, and its role in the food web considering predation, parasitism, and competition. The book also includes chapters that discuss the interaction of the dusky dolphin with its habitats, such as the dusky dolphin's sound production, its foraging at night and in daylight, its survival strategies in response to predator threats, the mating habits of New Zealand duskies, calf rearing, sexual segregation, and genetic relationships. Other chapters address the interaction of dusky dolphins with humans. This book offers information about dusky dolphins off Southern Africa and discussions about the patterns of sympatry in *Lagenorhynchus* and *Cephalorhynchus*. Finally, comparisons between dusky dolphins and great apes as large-brained mammals are also reviewed in this book. Only book fully devoted to the southern hemisphere "dusky" dolphin Heavily illustrated with charts, figures, tables, and all color photos Written by a cadre of experts intimately familiar with dolphin field work Written in an accurate yet accessible style for the scientist and natural historian alike

Strategy and Management of Industrial Brands is the first book devoted to business-to-business products and services. Looking at numerous companies, this book defines two brand objectives that are specific to the industrial and service sectors and which must be added to the traditional functions of branding: the minimization of risk as perceived by buyers, and the facilitation of the customer company's performance by the supplier brand. Different ways of classifying brands are suggested, providing a better understanding of brand strategies adopted by business-to-business companies, as well as new concepts such as brand 'printability', 'visibility', and 'purchaseability'. Five major brand categories are dealt with in separate chapters: -entering goods brands; -intermediary equipment goods brands; -equipment goods brands; -business-to-business service brands; and -industrial distributor brands. From a practical point of view, the aim of the book is to address the main concerns of managers: How to create and protect brands? What type of visual identity is appropriate? How to manage international brands? An analysis of 1,500 industrial brands as well as 40 case studies are included in this book. These brands are used in both the industrial (automotive, building, aeronautics, IT, etc.) and consumer sectors (clothing, electronics, food packaging, telecommunications, etc.). This book has been written for professors and students of universities and business schools, as well as managers and people working in industry or the service sector.

The archaeological site of Chichén Itzá, one of the best known ancient Maya cities, is located in the northern section of the Yucatán peninsula in Mexico. Chichén Itzá has figured prominently in both past and present discussions on the Terminal Classic and Early Postclassic periods in the northern Maya lowlands. Based on archaeological information and information derived from ethnohistorical sources, this city can be dated to a period from circa A.D. 700 to circa A.D. 1250, with its apogee placed between about A.D. 800 to A.D. 1050. The past and present discussions were directed specifically towards the origin of the inhabitants of the city, the arrival of K'uk'ulkán ("Feathered Serpent"), the origin of non-Mayan ("Toltec") architecture and sculptural programmes at the site, and the model of its political organization. The centre of Chichén Itzá is dominated by a raised platform, which harbours buildings now known as El Castillo (The Castle), the Great Ballcourt, and the Temple of the Warriors. These buildings contain various non-Mayan architectural and sculptural traits. Buildings south of the centre, erected in a regional Maya style, contain a large number of inscribed monuments (mostly lintels) carrying long hieroglyphic texts, which provide Chichén Itzá with the largest corpus of surviving inscriptions in the northern Maya lowlands. Chichén Itzá figures prominently in a wide range of ethnohistorical sources from the Colonial period, such as the "Relación de las Cosas de Yucatán" by Fray Diego de Landa and the "Relaciones Geográficas" by various authors, all in Spanish, and the so-called "Books of Chilam Balam" of Chumayel, Maní, and Tizimín, all in Yucatec Maya. In this study Erik Boot discusses the southern Maya lowland origin of the inhabitants of Chichén Itzá, the arrival of K'uk'ulkán and the introduction of so-called Toltec architecture and iconography, the identification of both gods and human beings in the inscriptions, and the political organization at Chichén Itzá. He presents extensive and detailed analyses of architectural and sculptural programmes, hieroglyphic inscriptions, and the Yucatec Maya "chronicles" from the Books of Chilam Balam.

This book is the first stand-alone and definitive account of the cetaceans of the oceanic region from the equator to Antarctica, and between the longitudes of 20° W and 80° E - a thirds of the world's marine cetacean species. In the fascinating accounts of 51 species of whales and dolphins (and one porpoise), information for this region is comprehensively s Best to give us the benefit of his extensive knowledge and of the wealth of unpublished information he has accumulated during his 40 years of studying these creatures. Approximately created in colour for this book by world-renowned marine mammal illustrator Pieter Folkens. Colour photographs of the living animal portray the 'jizz' of each species and specific c features.

The World Health Organization's Global Technical Strategy for Malaria 2016- 2030 has been developed with the aim to help countries to reduce the human suffering caused by the borne disease. Adopted by the World Health Assembly in May 2015 it provides comprehensive technical guidance to countries and development partners for the next 15 years emp scaling up malaria responses and moving towards elimination. It also highlights the urgent need to increase investments across all interventions - including preventive measures dia disease surveillance- as well as in harnessing innovation and expanding research. By adopting this strategy WHO Member States have endorsed the bold vision of a world free of m new target of reducing the global malaria burden by 90% by 2030. They also agreed to strengthen health systems address emerging multi-drug and insecticide resistance and inte regional efforts to scale up malaria responses to protect everyone at risk.

This book contains all refereed papers accepted during the ninth edition of the conference that took place at the Cité Internationale Universitaire de Paris on December 18-19, 2018. Mastering complex systems requires an integrated understanding of industrial practices as well as sophisticated theoretical techniques and tools. This explains the creation of an annual go-between forum in Paris dedicated to academic researchers & industrial actors working on complex industrial systems architecture, modeling & engineering. These proceedings cover the most recent trends in the emerging field of Complex Systems, both from an academic and a professional perspective. A special focus is put on “ Products & services development in a digital world ” . The CSD&M Paris 2018 conference is organized under the guidance of CESAM Community (<http://cesam.community/en>). CESAM Community has been developed since 2010 by the non-profit organization CESAMES Association to organize the sharing of good practices in Enterprise and Systems Architecture and to certify the level of knowledge and proficiency in this field through CESAM certification.

Eureka Math is a comprehensive, content-rich PreK-12 curriculum that follows the focus and coherence of the Common Core State Standards in Mathematics (CCSSM) and carefully sequences the mathematical progressions into expertly crafted instructional modules. The companion Study Guides to Eureka Math gather the key components of the curriculum for each grade into a single location, unpacking the standards in detail so that both users and non-users of Eureka Math can benefit equally from the content presented. Each of the Eureka Math Curriculum Study Guides includes narratives that provide educators with an overview of what students should be learning throughout the year, information on alignment to the instructional shifts and the standards, design of curricular components, approaches to differentiated instruction, and descriptions of mathematical models. The Study Guides can serve as either a self-study professional development resource or as the basis for a deep group study of the standards for a particular grade. For teachers who are new to the classroom or the standards, the Study Guides introduce them not only to Eureka Math but also to the content of the grade level in a way they will find manageable and useful. Teachers familiar with the Eureka Math curriculum will also find this resource valuable as it allows for a meaningful study of the grade level content in a way that highlights the coherence between modules and topics. The Study Guides allow teachers to obtain a firm grasp on what it is that students should master during the year. The Eureka Math Curriculum Study Guide, Grade 2 provides an overview of all of the Grade 2 modules, including Sums and Differences to 20; Addition and Subtraction of Length Units; Place Value, Counting, and Comparison of Numbers to 1,000; Addition and Subtraction Within 200 with Word Problems to 100; Addition and Subtraction Within 1,000 with Word Problems to 100; Foundations of Multiplication and Division; Problem Solving with Length, Money, and Data; and Time, Shapes, and Fractions as Equal Parts of Shapes.

The Dutch history painter Joachim Wtewael is widely admired for his astonishing small paintings on copper. The Getty Museum's Mars and Venus Surprised by Vulcan is one of his finest works in this unusually demanding medium. Though only eight inches high, this Mannerist painting contains eleven figures in three different spaces, captured in a dramatically charged moment from the famous story told by Ovid in his Metamorphoses. The author's detailed analysis of Wtewael's painting also serves as a fine introduction to Dutch art of the Golden Age. Illustrated with seventy reproductions of paintings, drawings, etchings, and decorative objects, Anne W. Lowenthal's study ranges over the broad historical and cultural context in which Mars and Venus was created.

This book contains all refereed papers that were accepted to the sixth edition of the « Complex Systems Design & Management Paris » (CSD&M Paris 2015) international conference which took place in Paris (France) on November 23-25, 2015. These proceedings cover the most recent trends in the emerging field of complex systems sciences & practices from an industrial and academic perspective, including the main industrial domains (aeronautics & aerospace, defense & security, electronics & robotics, energy & environment, health & welfare, software & e-services, transportation), scientific & technical topics (systems fundamentals, systems architecture & engineering, systems metrics & quality, systems modeling tools) and systems types (artificial ecosystems, embedded systems, software & information systems,

Rainer Werner Fassbinder is one of the most prominent and important authors of post-war European cinema. Thomas Elsaesser is the first to write a thoroughly analytical study of his work. He stresses the importance of a closer understanding of Fassbinder's career through a re-reading of his films as textual entities. Approaching the work from different thematic and analytical perspectives, Elsaesser offers both an overview and a number of detailed readings of crucial films, while also providing a European context for Fassbinder's own coming to terms with fascism.

If you want a holiday that's hassle-free, virtually pre-paid, and that lets you see lots of places while only needing to pack and unpack once, then you should try a cruise. This best-selling book is the cruise industry bible: it gives you all the information you need to choose the right cruise for you. Meticulously updated every year by cruise expert Douglas Ward, it is divided into two main parts: the first helps you work out what you're looking for in a cruise holiday and how to find it; the lively text and colour photographs describe every aspect of life on board, including safety, the highs and lows of the cruise experience and how to save money. The second part contains unbiased reviews and fascinating detail of almost 300 ocean-going cruise vessels, and grades them on service, food, entertainment and facilities, using an internationally recognised ratings system.

This book analyses the unique psychological appeal of the airship worldwide and shows how this appeal was exploited for ulterior political purposes. They were used by Count Zeppelin to advance German militarism, American Admiral Moffett to fight US Army aviation ambitions, British Lord Thomson to foster Socialism and strengthen Empire ties, Mussolini to promote Italian Fascism, Stalin to foster world Communism, and Hitler to promote Nazi ideology. As airships roamed worldwide, so they carried these political influences with them.

Indonesia has been remarkably successful in achieving its development objectives over the past 25 years. Although it is still a low-income country, its tradition of sound economic management has laid the foundations for continued progress in the decades ahead. As the Indonesian government formulates its second long-term development plan, issues of environmental quality and sustainability raise new concerns. This report examines environmental issues, assesses their implications for the achievement of development goals, and suggests an action plan that would help to ensure that those goals will be met. The analysis of current environmental conditions and trends and of the likely impact of future growth leads to three main conclusions: - Future growth will depend increasingly on Indonesia's stock of key natural resources and the sustainability of critical ecosystems. -The industrial sector will continue to expand in urban areas, where growing congestion and industrial pollution pose an immediate threat to health and human welfare. This will eventually lead to negative effects on the economy. -As a result of rapid growth, environment- related issues of equity among the population will become increasingly important.

The World malaria report 2014 summarizes information received from 97 malaria endemic countries and other sources and updates the analyses presented in 2013.
