Winner of the Writers' Guild Award for Best Debut Novel Longlisted for the Authors' Club First Novel Award 'Look for your sister after each dive. Never forget. If you see her, you are safe.' Hana and her little sister Emi are part of an island community of haenyo, women who make their living from diving deep into the sea off the southernmost tip of Korea. One day Hana sees a Japanese soldier heading for where Emi is guarding the day's catch on the beach. Her mother has told her again and again never to be caught alone with one. Terrified for her sister, Hana swims as hard as she can for the shore. So begins the story of two sisters suddenly and violently separated by war. Moving between Hana in 1943 and Emi as an old woman today, *White Chrysanthemum* takes us into a dark and devastating corner of history — and two women whose love for one another is strong enough to triumph over the evils of war. From master storyteller Stewart O'Nan, a timely moral thriller of the Jewish underground resistance in Jerusalem after the Second World War. In 1945, with no homes to return to, Jewish refugees set out for Palestine in their tens of thousands. *City of Secrets* follows one survivor, Brand, as he tries to regain himself after losing everyone he's ever loved. Now driving a taxi provided - like his new identity - by the underground, he navigates the twisting streets of Jerusalem as well as the overlapping, sometimes deadly loyalties of the resistance. Alone, haunted by memories, he tries to become again the man he was before the war - honest, strong, capable of moral choice. He falls in love with Eva, a fellow survivor and member of his cell, reclaims his faith, and commits himself to the revolution, accepting secret missions that grow more and more dangerous even as he begins to suspect he's being used by their cell's dashing leader, Asher. By the time Brand understands the truth, it's too late, and the tragedy that ensues changes history. A noirish, deeply felt novel of intrigue and identity written in O'Nan's trademark lucent style, *City of Secrets* asks how both despair and faith can lead us astray, and what happens when, with the noblest intentions, we join movements beyond our control.

DANGEROUSLY GOOD. DISTINCTIVELY DEEVER. Forensic detective Lincoln Rhyme is back with his most harrowing case yet in this newest installment of Jeffrey Deaver's New York Times bestselling series. A businessman snatched from an Upper East Side street in broad daylight. A miniature hangman's noose left at the scene. A nine-year-old girl, the only witness to the crime. With a crime scene this puzzling, forensic expertise of the highest order is absolutely essential. Lincoln Rhyme and Amelia Sachs are called in to investigate. Soon the case takes a stranger turn: a recording surfaces of the victim being slowly hanged, his desperate gasps the backdrop to an eerie piece of music. The video is marked as the work of The Composer... Despite their best efforts, the suspect gets away. So when a similar kidnapping occurs on a dusty road outside Naples, Italy, Rhyme and Sachs don't hesitate to rejoin the hunt. But the search is now a complex case of international cooperation--and not all those involved may be who they seem. Sachs and Rhyme find themselves playing a dangerous game, with lives all across the globe hanging in the balance.

The final nail-biting installment in the ten-part, award-winning Hanne Wilhelmsen series—bestselling in Norway and throughout Europe—from Scandinavia’s most celebrated female crime writer, Anne Holt. Police investigator Kjell Bonsaksen is a contented man in most areas of life, but for one mistake he made years ago that has rankled like a stone in his shoe ever since: in 2001, a two-year-old girl was killed by a speeding car while playing in the road in front of her home. The marriage of the toddler’s grief-stricken parents dissolved in the wake of the accident, and not long thereafter, the girl’s mother died under mysterious circumstances. The girl’s father, Jonas, was convicted of his ex-wife’s murder and sentenced to twelve years in prison. But Kjell Bonsaksen knew he was innocent. Now it’s 2016, and Kjell is looking forward to his retirement to the French countryside with his wife. An uncomfortable chance encounter with Jonas at a roadside gas station prompts him to dig out Jonas’s case files for Detective Henrik Holme, the resident cold case prodigy. Henrik doesn’t take long to convince his beloved mentor, Hanne Wilhelmsen, that Jonas was wrongly convicted for his ex-wife’s murder. As their investigation evolves, Hanne and Henrik uncover eerie connections to the recent suicide of a right-wing extremist blogger whose fanatic ideologies seem incompatible with a desire to die. Masterfully plotted, *In Dust and Ashes* is the outstanding finale to Anne Holt’s award-winning, politically and socially conscious series, confirming Hanne Wilhelmsen as a character who will “get in your head—and stay there” (*Entertainment Weekly*). A heartbreaking debut YA romance featuring a neuroatypical girl with a tragic history and the chronically ill boy trying to break the vault encasing her heart. Alvie Fitz doesn’t fit in, and she doesn’t care. She’s spent years swallowing meds and bad advice from doctors and social workers. Adjust, adapt. Pretend to be normal. It sounds so easy. If she can make it to her eighteenth birthday without any major mishaps, she’ll be legally emancipated. Free. But if she fails, she’ll become a ward of the state and be sent back to the group home. All she wants is to be left alone to spend time with her friend, Chance, the one-winged hawk at the zoo where she works. She can bide her time with him until her emancipation. Humans are overrated anyway. Then she meets Stanley, a boy who might be even stranger than she is—a boy who walks with a cane, who turns up every day with a new injury, whose body seems as fragile as glass. Without even meaning to, she finds herself getting close to him. But Alvie remembers what happened to the last person she truly cared about. Her past stalks her with every step, and it has sharp teeth. But if she can find the strength to face the enemy inside her, maybe she’ll have a chance at happiness after all.

'Superior storytelling... excellent' - Daily Mail A hot summer. A shocking murder. A town of secrets, waiting to explode... A beautiful young teacher has been murdered, her body found in the lake, strewn with red roses. Local policewoman Detective Sergeant Gemma Woodstock pushes to be assigned to the case, concealing the fact that she knew the murdered woman in high school years before. But that's not all Gemma's trying to hide. As the investigation digs deeper into the victim's past, other secrets threaten to come to light, secrets that were supposed to remain buried. The lake holds the key to solving the murder, but it also has the power to drag Gemma down into its dark depths...

What is the relationship between the preeminent, cosmos-reconciling 'Christ' of Col 1:15-20 and the imprisoned 'Paul' of 1:24-29, who enigmatically 'completes' the former's afflictions as he declares to 'every person' the mystery, long concealed but only now revealed by Israel's God to his holy ones? After finding solid exegetical ground through an unprecedented and exhaustive study of the rare verb *antanapleroo* (in 1.24), Bruce Clark tackles this most intriguing, if challenging question. He argues that Col 1, in accord with 2 Cor 5:18-6:4, presents Paul as the utterly unique diakonos ('minister') of the universal ekklesia and, therefore, as one whose afflictions uniquely complete Christ's own, so that together, revealing the righteousness of God, they initiate the divine reconciliation of 'all things.'

Available in English for the first time, Encouragement Makes Good Things Happen is a translation of the bestselling German book Mut Tut Gut. It describes a courageous and encouraging style of living and focuses on the belief that human encouragement is the most important natural ingredient for the healthy development of human beings. Written in an engaging and conversational tone, the book first explores the negative consequences of discouragement on the individual and on society as a whole. It then discusses what encouragement is, why it is important in people's lives, and how a person can encourage both himself and others. Several exercises are also included to help guide readers in the encouragement of others. Mental health practitioners of all disciplines and in any setting will find that both they and their clients will benefit from the insights garnered and tested by the author of this engaging and compelling book.

Both women and men were leaders since ancient times; however, few female leaders are reported. Deborah is one of the powerful female leaders during the ancient Israel. This work explored the feminist expositions of the Old Testament in Africa, with focus on the context of the offices held by Deborah as narrated in the book of Judges Chapter 4 and 5. The exegetical part shed light onto the role played by the female leaders among the Israelites. The feminist paradigms in Judges 4 and 5 demonstrate how female characters in these chapters construct a way to disagree with what seems to oppress women and deny their leadership capability. The findings of this study determine that gender should not be perceived as having an effect on leadership in general.

This charming, irresistible debut novel set in London during World War II about a young woman who longs to be a war correspondent and inadvertently becomes a secret advice columnist is “a jaunty, heartbreaking winner” (People)—for fans of The Guernsey Literary and Potato Peel Pie Society and Lilac Girls. Emmeline Lake and her best friend Bunty are doing their bit for the war effort and trying to stay cheerful, despite the German planes making their nightly raids. Emmy dreams of becoming a Lady War Correspondent, and when she spots a job advertisement in the newspaper she seizes her chance; but after a rather unfortunate misunderstanding, she finds herself typing letters for the formidable Henrietta Bird, renowned advice columnist of Woman’s Friend magazine. Mrs. Bird is very clear: letters containing any Unpleasantness must go straight into the bin. But as Emmy reads the desperate pleas from women who many have Gone Too Far with the wrong man, or can’t bear to let their children be evacuated, she begins to secretly write back to the readers who have poured out their troubles. “Fans of Jojo Moyes will enjoy AJ Pearce’s debut, with its plucky female characters and fresh portrait of women’s lives in wartime Britain” (Library Journal)—a love letter to the enduring power of friendship, the kindness of strangers, and the courage of ordinary people in extraordinary times. “Headlined by its winning lead character, who always keeps carrying on, Pearce’s novel is a delight” (Publishers Weekly). Irrepressibly funny and enormously moving, Dear Mrs. Bird is “funny and poignant...about the strength of women and the importance of friendship” (Star Tribune, Minneapolis).

Nowadays, distributed software development has become more common. In a distributed project setting, managing experience is crucial than in a co-located project. Problems like ineffective communication, lack of awareness and trust and restrictive information policies impede experience exchange and raise the overall effort for software engineers to collaborate. Moreover, sharing experience is usually not part of the development process and considered additional effort. This often leads to failure of the experience management due to a lack of participation. This thesis proposes a framework for qualitative and quantitative assessment of light-weight experience collection. Light-weight methods primarily aim at lowering the perceived effort and return a reasonable benefit to the experience manager. This thesis proposes characterizing criteria of light-weight experience collection and a measurement system to measure gradation of effort and benefit of an experience collection method. To support knowledge managers in choosing the appropriate collection method, this thesis provides a catalogue of strategies from different categories and areas of application in distributed development projects. This book constitutes the proceedings of the First International Conference on Physiological Computing Systems, PhyCS 2014, Portugal, in January 2014. The 10 papers presented in this volume were carefully reviewed and selected from 52 submissions and organized in topical sections named: methodologies and methods; devices; applications; and human factors.

From bestselling and award-winning crime writer Reginald Hill, a "chilling, frightening, page-turning tale" featuring Yorkshire cop Andy Dalziel and Peter Pascoe, "that won't let you go, even when you finally put it down." (Providence Journal). Caught in the blast of an explosion, Detective Superintendent Andy Dalziel lies on a hospital bed, with only a life support system and his indomitable will to survive and the Great Beyond. Meanwhile, his colleague, Chief Inspector Peter Pascoe, is determined to find those responsible. Ignoring his own injuries, the advice of his friends, and the pleas of his wife, Pascoe follows a winding trail to the Templars, a mysterious group whose only way to fight terrorism is through terror. Where the arm of the law cannot reach, their work begins. Soon Pascoe comes to realize that he may have support and sympathy in high places, from men ready to accept the death of a policeman or of any other innocent as a regrettable but unavoidable collateral damage. From the streets of Manchester to the Yorkshire countryside, Pascoe searches for the truth. Above it all, like a huge zeppelin threatening to break from its moorings, hovers the disembodied spirit of Andy Dalziel.

Finnish detective Kimmo Joentaa is called to the local hospital in which his young wife died several years before. As autumn turns to winter, and Christmas fast approaches, Kimmo's attempt to solve the case and identify the first victim are complicated by the disappearance of his sometime girlfriend, who has vanished after the death of the head of the police force, and by a colleague's spiral into the depths of a gambling addiction.

Towards the Multilingual Semantic Web

#1 New York Times bestselling author Candice Fox delivers a compulsive new crime thriller, which sees Ted Conkaffey once again teaming up with an unlikely partner - this time the father of the girl he was accused of abducting . . . When former police detective Ted Conkaffey was wrongly accused of abducting thirteen-year-old Claire Bingley, he hoped the Queensland rainforest town of Crimson Lake would be a good place to disappear. But nowhere is safe from Claire's devastated father. Dale Bingley has a brutal revenge plan all worked out - and if Ted doesn't help find the real abductor, he'll be its first casualty. Meanwhile, in a dark roadside hovel called the Barking Frog Inn, the bodies of two young bartenders lie on the beer-sodden floor. It's Detective Inspector Pip Sweeney's first homicide investigation - complicated by the arrival of private detective Amanda Pharrell to 'assist' on the case. Amanda's conviction for murder a decade ago has left her with some odd behavioural traits, top-to-toe tats - and a keen eye for killers. For Ted and Amanda, the hunt for the truth will draw them into a violent dance with evil. Redemption is certainly on the cards - but it may well cost them their lives . . . To date, the relation between multilingualism and the Semantic Web has not yet received enough attention in the research community. One major challenge for the Semantic Web community is to develop architectures, frameworks and systems that can help in overcoming national and language barriers, facilitating equal access to information produced in different cultures and languages. As such, this volume aims at documenting the state-of-the-art with regard to the vision of a Multilingual Semantic Web, in which semantic information will be accessible in and across multiple languages. The Multilingual Semantic Web as envisioned in this volume will support the following functionalities: (1) responding to information needs in any language with regard to semantically structured data available on the Semantic Web and Linked Open Data (LOD) cloud, (2) verbalizing and accessing semantically structured data, ontologies or other conceptualizations in multiple languages, (3) harmonizing, integrating, aggregating, comparing and repurposing semantically structured data across languages and (4) aligning and reconciling ontologies or other conceptualizations across languages. The volume is divided into three main sections: Principles, Methods and Applications. The section on “ Principles ” discusses models, architectures and methodologies that enrich the current Semantic Web architecture with features necessary to handle multiple languages. The section on “ Methods ” describes algorithms and approaches for solving key issues related to the construction of the Multilingual Semantic Web. The section on “ Applications ” describes the use of Multilingual Semantic Web based approaches in the context of several application domains. This volume is essential reading for all academic and industrial researchers who want to embark on this new research field at the intersection of various research topics, including the Semantic Web, Linked Data, natural language processing, computational linguistics, terminology and information retrieval. It will also be of great interest to practitioners who are interested in re-examining their existing infrastructure and methodologies for handling multiple languages in Web applications or information retrieval systems.

Once upon a time there was a Prussian King, Frederick, also known as Fritz, who saw potential in the lowly potato -- a newly introduced crop from South America -- and decided to plant it for his people. However, it quickly became clear that his subjects didn't like being told what to eat. Determined to see the potato thrive, Fritz cleverly used reverse psychology to pique his people's curiosity and make the crop popular, and the potato has flourished ever since. his people's curiosity and make the crop popular, and the potato has flourished ever since. Potato-stamp illustrations throughout are simple and effective, exhibiting Neimann's trademark wit and playfulness. The book includes a short informational note on the historical background to the story. Readers will be interested to discover how one of today's most common foods likely rose to popularity and may also be inspired by the king's creative problem solving.

It rains everyday and all the talk is of the danger of landslides. The little girl worries. This book covers the basics of semantic web technologies and indexing languages, and describes their contribution to improve methods of formal knowledge representation and reasoning. The methodologies included combine the specifics of indexing languages, Web representation languages and intersystem relations, and explain their contribution to search functionalities in information retrieval scenarios. An example oriented discussion, considering aspects of conceptual and semantic interoperability in processes of subject querying and knowledge exploration is provided. The book is relevant to information scientists, knowledge workers and indexers. It provides a suitable combination of theoretical foundations and practical applications.
