

## Model Ftese Zyrtare

In the Balkan Peninsula, history's long-disputed bridge between Asia and Europe, the receding Byzantine empire has left behind a patchwork of warring peoples who fight over everything, from their pastures of sheep to the authorship of their countless legends. One such gruesome tale declares that a castle under construction cannot be finished until a young mason's bride has been walled up alive, one breast left exposed to suckle her growing infant even after her death. Myth becomes perverse reality when a mason is plastered into a bridge over a strategically important river, where his will not be the last human sacrifice.

The book offers demographic, sociolinguistic, and educational perspectives on the status of both regional and immigrant languages in Europe and in a wider international context. From a cross-national point of view, empirical evidence on the status of these other languages of multicultural Europe is brought together in a combined frame of reference.

In High Albania, Victorian anthropologist and travel writer M (Mary) Edith Durham presents a vivid and fascinating insight into the culture, customs, people, and the lands of Northern Albania as it was in the early 20th century.

"We live in an era where the university system is undergoing great changes owing to developments in financing policies and research priorities, as well as changes in the society in which this system is embedded. This change toward a more market-oriented university, which also has immediate effects in academic peripheries such as the Balkans, the Middle East, or South-East Asia, is of great influence for the pedagogical practice of "less profitable" academic areas such as the Humanities: philosophy, languages, sociology, anthropology, history. Because of the absence of a historically grounded establishment of the Humanities, academic peripheries, usually accompanied by a weak civil society infrastructure, seem to offer the most fertile ground for rethinking the Humanities, their pedagogical practice, and their politics, as well as the greatest threats, such as the ongoing capitalization of research, and profitability as the norm of educational achievement. The sprawling presence of for-profit universities and in academic peripheries such as Albania and Kosovo is indicative of this problematic, as are consistent underfunding of universities and the relentless budget cuts in American and English, and to a lesser extent European, universities. Motivations for this ongoing attack on the university are often driven by a political system or a politics with an aggressive stance to critical thought."

Denisa Kostovicova shows that the legacy of ethnic segregation is one of the major obstacles the international community faces in its efforts to establish an integrated multi-ethnic society in this territory." "Of interest to academics and students of nationalism and politics as well as practitioners and journalists, this book is an important advance in research on one of the most tragic European conflicts of recent times."--Jacket.*

Muslims remain largely unaware of the importance and value of the Qur'anic principle of al-Shura (mutual consultation) and the significant role it can play in the advancement and reform of Muslim society. In this work, the author attempts to introduce and examine key meanings and practices of al-Shura, trace its historical evolution, and explore ways in which the principle can be introduced, institutionalized and applied in Muslim societies. There is no doubt that al-Shura has been sidelined throughout the Muslim world and the reasons for this are both historically and politically complex. According to the author, although much has been written on the subject, in reality it has been at best ineffectively applied and at worst heedlessly ignored. Even today it is a hotly contested issue. As al-Shura is increasingly associated with democratic participation in a decision-making process, debate has ignited with critics challenging the notion of equating the principle with western notions of democracy, with others claiming that the principle allows for a meaning that breaks the grip of centralized power. These and other issues are investigated with careful scholarship. Al-Raysuni concludes that al-Shura should be adopted as a way of life for all Muslims to protect their interests and as a vital tool for reconstruction and reform. In doing so he addresses the subject from some intriguing new angles, giving insight into areas hitherto little, if at all, examined.

The Three-Arched Bridge

**Peopled by larger-than-life heroes and villains, charged with towering questions of good and evil, Atlas Shrugged is Ayn Rand's magnum opus: a philosophical revolution told in the form of an action thriller—nominated as one of America's best-loved novels by PBS's The Great American Read. Who is John Galt? When he says that he will stop the motor of the world, is he a destroyer or a liberator? Why does he have to fight his battles not against his enemies but against those who need him most? Why does he fight his hardest battle against the woman he loves? You will know the answer to these questions when you discover the reason behind the baffling events that play havoc with the lives of the amazing men and women in this book. You will discover why a productive genius becomes a worthless playboy...why a great steel industrialist is working for his own destruction...why a composer gives up his career on the night of his triumph...why a beautiful woman who runs a transcontinental railroad falls in love with the man she has sworn to kill. Atlas Shrugged, a modern classic and Rand's most extensive statement of Objectivism—her groundbreaking philosophy—offers the reader the spectacle of human greatness, depicted with all the poetry and power of one of the twentieth century's leading artists.**

**Nearly tragic domestic disturbances highlight this compelling volume. Stepfathers and fathers figure prominently and futures hang in the balance— as if Kira and Rei needed any more complications!**

Pedagogies of Disaster

**During Albania's period under the rule of the Marxist-Leninist Enver Hoxha between 1945 and 1985, some 750,000 bunkers were constructed all over the Albanian landscape. All are rounded and mushroom-like in design, and remain as a legacy of Hoxha's fear-based isolationist policies. The book contains descriptions and photographs of variously located bunkers, as well as information relating to their potential for use today.**
