When a spaceship lands in Sorrow Falls, a lovable and fearless small-town girl is the planet ' s only hope for survival Three years ago, a spaceship landed in an open field in the quiet mill town of Sorrow Falls, Massachusetts. It never opened its doors, and for all that time, the townspeople have wondered why the ship landed there, and what—or who—could be inside. Then one day a government operative—posing as a journalist—arrives in town, asking questions. He discovers sixteen-year-old Annie Collins, one of

with her strict mother, and the authoritarian church she must attend. Once out of high school, however, Janet is initiated into a fascinating new world of Astrology, Tarot cards, and Spirit Mediums. Next, she encounters the mysterious world of UFOs?a bewildering and sometimes frightening realm encompassing ancient astronauts, alien abductions, and shadowy government conspiracies. As the 1980s arrive, the Christian-dominated Piscean Age seems to be giving way to a long-anticipated Aquarian Age, with its hope for a coming revolution in higher consciousness. There are new paradigms in philosophy and science?promoting a holographic conception of the universe as engaged in a Cosmic Dance?along with the emergence of an introspective type of instrumental music known as New Age. With the help of bookstore owner Whisper Wynn, Janet investigates subjects such as reincarnation, quartz crystals, chakras and the human aura, in addition to an exciting new form of spiritual teaching called channeling. Following movement leaders including Shirley MacLaine and Marianne Williamson, studying enigmatic teachers like G.I. Gurdjieff and Carlos Castaneda, and inspired by medical doctors such as Deepak Chopra and Andrew Weil, she learns about Alternative Medicine and Holistic Health, as well as traditional health practices from China, Japan, and India. She assimilates wisdom from the ancient Celts along with rituals from contemporary Goddess worshippers, in formulating her own unique concept of the Divine that is within us all.

NAMED ONE OF THE BEST BOOKS OF THE YEAR BY BUZZFEED AND KIRKUS REVIEWS • With deeply moving human drama, nail-biting suspense—and bold speculation informed by a degree in physics—C. A. Higgins spins a riveting science fiction debut guaranteed to catapult readers beyond their expectations. Serving aboard the *Ananke*, an experimental military spacecraft launched by the ruthless organization that rules Earth and its solar system, computer scientist Althea has established an intense emotional bond—not with any of her crewmates, but with the ship’s electronic systems, which speak more deeply to her analytical mind than human feelings do. But when a pair of fugitive terrorists gain access to the *Ananke*, Althea must draw upon her heart and soul for the strength to defend her beloved ship. While one of the saboteurs remains at large somewhere on board, his captured partner—the enigmatic Ivan—may prove to be more dangerous. The perversely fascinating criminal whose silver tongue is his most effective weapon has long evaded the authorities’ most relentless surveillance—and kept the truth about his methods and motives well hidden. As the ship’s systems begin to malfunction and the claustrophobic atmosphere is increasingly poisoned by distrust and suspicion, it falls to Althea to penetrate the prisoner’s layers of intrigue and deception before all is lost. But when the true nature of Ivan’s mission is exposed, it will change Althea forever—if it doesn’t kill her first. Praise for *Lightless* “Gripping . . . sci-fi flavored with a hint of thriller.”—*New York Daily News* “[A] measured, lovely science-fiction debut [that is] more psychological thriller . . . contained, disciplined, tense . . . The plot is compulsive. . . . *Lightless* is the first of a planned series, and you can’t help looking forward to learning what’s next.”—*The New York Times* “*Lightless* is full of suspense and fun as hell to read.”—*BuzzFeed* “Absolutely brilliant . . . This is science fiction as it is meant to be done: scientific concepts wedded to and built upon human

ideals.”—Seanan McGuire, New York Times bestselling author of the October Daye series “The stakes in this story are high—life and death, rebellion and betrayal—and debut novelist Higgins continually ratchets up the tension. . . . A suspenseful, emotional story that asks plenty of big questions about identity and freedom, this is a debut not to be missed.”—Kirkus Reviews (starred review) “A taut, suspenseful read.”—Tech Times “Lightless is an exercise in lighting a very slow fuse and building the tension to an unbearable pitch while making us guess just how apocalyptic the ultimate explosion will be. . . . It is a high-wire act, a wonderment, and a fine accomplishment from a name we’ll be seeing again.”—Sci Fi

Inside the greatest movie saga of them all. From interviews with the cast and crew to expert analysis of the characters from leading Star Wars writers, this book showcases the Star Wars phenomenon in exhaustive detail. This essential collection features the exclusive true story of George Lucas’s struggle to bring Star Wars to the big screen, and how his love of fast-moving vehicles shaped the saga. A must have for Star Wars fans, this retrospective also includes the cast and crew of Star Wars: The Clone Wars on Attack of the Clones, Mark Hamill on life at a Star Wars convention, and what it was really like to work with Jabba the Hutt.

SPACESHIPS AND LIQUOR is a collection of both amusing and deadly serious essays, vignettes and

commentaries on life in contemporary America. The author includes a section he calls Politically Incorrect, wherein he trods in opinionated territory, not always comfortably. You may not agree, but you will not be bored. Balancing this are more neutral and light-hearted views of the authors friends and his various involvements. Someone said to him recently, Didnt I see you this summer in Moscow? The author invites the reader to return with him from an African adventure and travel across three time zones from east to west in the United States a mental travelogue. And to join him on some imagined intellectual precipice to enjoy the view before jumping!

MBBO Speed Machines is the perfect information book for anyone with a passion for racing vehicles and technology. The book covers notable inventions, record-breakers, racing cars, bikes, high-speed trains, aircraft and sea machines. It also looks at supersonic craft and space vehicles. Clear illustrations and evocative full-page scenes capture the excitement of high-speed travel.

Extinction was just the beginning... Clover Martinez has always been a survivor, which is the reason she isn't among the dead when aliens invade and destroy Earth as she knows it. Clover is convinced she's the only one left until she hears a voice on the radio urging her to go to the former Area 51. When she arrives, she's greeted by a band of misfits who call themselves The Last Teenagers on Earth. Only they aren't the ragtag group of heroes Clover was

expecting. The seven strangers seem more interested in pretending the world didn't end than fighting back, and Clover starts to wonder if she was better off alone. But when she finds a hidden spaceship within the walls of the compound, she doesn't know what to believe...or who to trust.

Praise for The Last 8: "A sci-fi romp."—Kirkus "The Walking Dead meets Alien...teens will want to follow Clover on her next adventure!"— Zoraida Córdova, author of the Brooklyn Brujas series

Project Hail Mary

The LEGO Adventure Book, Vol. 1

A New York Times bestseller! The historic race that reawakened the promise of manned spaceflight A Finalist for the PEN/E. O. Wilson Literary Science Writing Award Alone in a Spartan black cockpit, test pilot Mike Melvill rocketed toward space. He had eighty seconds to exceed the speed of sound and begin the climb to a target no civilian pilot had ever reached. He might not make it back alive. If he did, he would make history as the world's first commercial astronaut. The spectacle defied reason, the result of a competition dreamed up by entrepreneur Peter Diamandis, whose vision for a new race to space required small teams to do what only the world's largest governments had done before. Peter Diamandis was the son of hardworking immigrants who wanted their science prodigy to make the family proud and become a doctor. But from the age of eight, when he watched Apollo 11 land on the Moon, his singular goal was to get to space. When he realized NASA was winding down manned space

flight, Diamandis set out on one of the great entrepreneurial adventure stories of our time. If the government wouldn't send him to space, he would create a private space flight industry himself. In the 1990s, this idea was the stuff of science fiction. Undaunted, Diamandis found inspiration in an unlikely place: the golden age of aviation. He discovered that Charles Lindbergh made his transatlantic flight to win a \$25,000 prize. The flight made Lindbergh the most famous man on earth and galvanized the airline industry. Why, Diamandis thought, couldn't the same be done for space flight? The story of the bullet-shaped SpaceShipOne, and the other teams in the hunt, is an extraordinary tale of making the impossible possible. It is driven by outsized characters—Burt Rutan, Richard Branson, John Carmack, Paul Allen—and obsessive pursuits. In the end, as Diamandis dreamed, the result wasn't just a victory for one team; it was the foundation for a new industry and a new age.

They Both Die at the End meets The Loneliest Girl in the Universe in this mind-bending sci-fi mystery and tender love story about two boys aboard a spaceship sent on a rescue mission, from two-time National Book Award finalist Eliot Schrefer. Two boys, alone in space. Sworn enemies sent on the same rescue mission. Ambrose wakes up on the Coordinated Endeavor with no memory of a launch. There's more that doesn't add up: evidence indicates strangers have been on board, the ship's operating system is voiced by his mother, and his handsome, brooding shipmate has barricaded himself away. But nothing will stop Ambrose from making his mission succeed—not

when he's rescuing his own sister. In order to survive the ship's secrets, Ambrose and Kodiak will need to work together and learn to trust each other . . . especially once they discover what they are truly up against. Love might be the only way to survive.

To create the exotic materials and technologies needed to make stargates and warp drives is the holy grail of advanced propulsion. A less ambitious, but nonetheless revolutionary, goal is finding a way to accelerate a spaceship without having to lug along a gargantuan reservoir of fuel that you blow out a tailpipe. Tethers and solar sails are conventional realizations of the basic idea. There may now be a way to achieve these lofty objectives. “Making Starships and Stargates” will have three parts. The first will deal with information about the theories of relativity needed to understand the predictions of the effects that make possible the “propulsion” techniques, and an explanation of those techniques. The second will deal with experimental investigations into the feasibility of the predicted effects; that is, do the effects exist and can they be applied to propulsion? The third part of the book – the most speculative – will examine the question: what physics is needed if we are to make wormholes and warp drives? Is such physics plausible? And how might we go about actually building such devices? This book pulls all of that material together from various sources, updates and revises it, and presents it in a coherent form so that those interested will be able to find everything of relevance all in one place.

Set in the 1950s, two young sisters, Carlie and Sarah Neville, have to deal with an abusive mother who has the

ability to go crazy over the slightest thing and they aren't sure how long they will be able to keep it all a secret before something goes too terribly wrong.

NEW YORK TIMES BESTSELLER • From the author of *The Martian*, a lone astronaut must save the earth from disaster in this “propulsive” (Entertainment Weekly), cinematic thriller full of suspense, humor, and fascinating science—in development as a major motion picture starring Ryan Gosling. “An epic story of redemption, discovery and cool speculative sci-fi.”—USA Today “If you loved *The Martian*, you’ll go crazy for Weir’s latest.”—The Washington Post Ryland Grace is the sole survivor on a desperate, last-chance mission—and if he fails, humanity and the earth itself will perish. Except that right now, he doesn’t know that. He can’t even remember his own name, let alone the nature of his assignment or how to complete it. All he knows is that he’s been asleep for a very, very long time. And he’s just been awakened to find himself millions of miles from home, with nothing but two corpses for company. His crewmates dead, his memories

fuzzily returning, Ryland realizes that an impossible task now confronts him. Hurling through space on this tiny ship, it's up to him to puzzle out an impossible scientific mystery—and conquer an extinction-level threat to our species. And with the clock ticking down and the nearest human being light-years away, he's got to do it all alone. Or does he? An irresistible interstellar adventure as only Andy Weir could deliver, *Project Hail Mary* is a tale of discovery, speculation, and survival to rival *The Martian*—while taking us to places it never dreamed of going.
