The corrections employee who inspired me to design this book knew what most of you reading this already know that the only hope that more than 90 percent of incarcerated inmates nationwide have for not returning to prison is steady employment. There are numerous books on this subject already, and most of them say the same things. It's also fair to say that most are accurate. This course doesn't try to reinvent the wheel, so to speak, but instead gives a step-by-step guide for preparing and facilitating a prerelease employability class in a corrections environment. Prison inmates are, for the most part, challenged with a wide variety of social dysfunctions. Educational backgrounds vary as well. It is critical to make the prerelease employability class both user-friendly and student specific for the challenges presented by the prison itself. Ultimately, it's up to an individual whether or not he or she chooses to succeed or improve the quality of their life. The key is to make this goal in life attainable and realistic to the students, thus encouraging them to make that choice. Remember that even the best plans in the world are nothing without good people to carry them out. If you're planning to teach or assist in a corrections prerelease employability course, you must understand and believe in its benefits. Not only believe, but also participate by sharing your own personal experiences and opinions to the extent that policy allows. Only by interacting with the class on a more personal level will you get the respect and trust of your students. By operating in this capacity, you become as important an asset to the course as the written material itself. The results of your efforts will be reflected in the future success stories from your students.

In September 1960 a television show emerged from the mists of prehistoric time to take its place as the mother of all animated sitcoms. The Flintstones spawned dozens of imitations, just as, two decades later, The Simpsons sparked a renaissance of primetime animation. This fascinating book explores the landscape of television animation, from Bedrock to Springfield, and beyond. The contributors critically examine the key issues and questions, including: How do we explain the animation explosion of the 1960s? Why did it take nearly twenty years following the cancellation of The Flintstones for animation to find its feet again as primetime fare? In addressing these questions, as well as many others, essays examine the relation between earlier, made-for-cinema animated production (such as the Warner Looney Toons shorts) and television-based animation; the role of animation in the economies of broadcast and cable television; and the links between animation production and brand image. Contributors also examine specific programmes like The Powerpuff Girls, Daria, Ren and Stimpy and South Park from the perspective of fans, exploring fan cybercommunities, investigating how ideas of 'class' and 'taste' apply to recent TV animation, and addressing themes such as irony, alienation, and representations of the family.
