This paper addresses the issue of threshold effects between public debt and economic growth in the Caribbean. The main finding is that there exists a threshold debt to gross domestic product (GDP) ratio of 55-56 percent. Moreover, the debt dynamics begin changing well before this threshold is reached. Specifically, at debt levels lower than 30 percent of GDP, increases in the debt-to-GDP ratio are associated with faster economic growth. However, as debt rises beyond 30 percent, the effects on economic growth diminishes rapidly and at debt levels reach a threshold, debt begins a drag on growth.

This book showcases the work of Australian colour designer, educator and artist, Eva Fay, produced during her time at the Shillito Design School in Sydney, Australia 1976-1977, and includes key strategies for understanding colour organisation, colour mixing, colour planning and application.It pays tribute to the immense contribution that the English educator and designer, Phyllis Shillito gave to the Australian design and art community. Her teaching at both the Shillito Design School (1962-1980) and at the National Art School in Sydney (1925-1960), had an en heads of school. Shillito (1895-1980), originally from West Yorkshire, England, created a unique set of colour education principles based on her wealth of knowledge of colour and experience in design. Many of her students are scattered throughout the world making their mark in all endeavours of the design and art worlds.Eva used much of the knowledge gained at the Shillito Design School during this period to become a renowned Australian colour and design educator at the tertiary level in Sydney, and she co-founded the acclaimed School of Colour and Design reference documenting the teaching of colour at one of Australia's most innovative design schools. It has 59 pages with approximately 85 colour illustrations.

"Pentecostal Currents in American Protestantism addresses the theme of encounter within the Protestant faith by exploring moments in which identities and boundaries have been established or challenged as the Pentecostal and charismatic movements have taken their place on the American religious scene. Examining topics as diverse as the animosity that marked Pentecostalism's encounter with the Holiness movement, the forms and results of engagement with evangelists to the charismatic mission boards in China, and the response of Southern and American Baptists to the charismatic renewal, contributors show how the confluence of the mainstream with other streams brings about questioning, realignment, and change."

After her nightmareish recovery from a serious car accident, Faye gets horrible news from her doctor, and it hits her hard like a rock: she can't bear children. In extreme shock, she breaks off her engagement, leaves her job and confines herself in her family home. One day, she meets her brother's best friend , and her soul makes a first step to healing.

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

New edition of the much loved series.

Their design thinking changes more rapidly than ever before, and new business ideas are emerging. This book discusses applying insights from design thinking to craft novel strategies that satisfy customer needs, make use of the available capabilities, integrate requirements for financial success and provide competitive advantage. It guides readers through the jungle encountered when developing a strategy for sustained growth and profitability. It addresses strategy design in a holistic way by applying abductive reasoning, iteratively observing customers and focusing on empathy, as well as prototyping ideas and using customers to validate them. Uniquely applying insights from design thinking to strategy, this book is a must-read for graduates, MBAs and executives interested in innovation and strategy, as well as corporate strategists, innovation managers, business analysts and consultants.

Evolving from the premise that customers have always behaved more like cats than Pavlov's dogs, Waiting for Your Cat to Bark? examines how emerging media have undermined the effectiveness of prevailing mass marketing models. At the same time, emerging media have created an unprecedented opportunity for businesses to redefine how they communicate with customers by leveraging the power of increasingly interconnected media channels. Bryan and Jeffrey Eisenberg don't simply explain this shift in paradigm; Waiting for Your Cat to Bark? introduces Persuasion Architecture™ as the synthetic model that provides business with a proven context for rethinking customers and retooling marketers in a rewired market. Readers will learn: Why many marketers are unprepared for today's increasingly fragmented, in-control, always-on audience that makes pin-point relevance mandatory How interactivity has changed the nature of marketing by extending its reach into the world of sales, design, merchandizing, and customer relations How Persuasion Architecture™ allows businesses to create powerful, multi-channel persuasive systems that anticipate customer needs How Persuasion Architecture™ allows businesses to measure and optimize the return on investment for every discreet piece of that persuasive system "There's some big thinking going on here-thinking you will need if you want to take your work to the next level. 'Typical, not average' is just one of the ideas inside that will change the way you think about marketing." ?Seth Godin, Author, All Marketers Are Liars "Are your clients coming to you armed with more product information than you or your sales team know? You need to read Waiting for Your Cat to Bark? to learn how people are buying in the post-Internet age so you can learn how to sell to them." ?Tom Hopkins, Master Sales Trainer and Author, How to Master the Art of Selling "These guys really 'get it.' In a world of know-it-all marketing hypsters, these guys realize that it takes work to persuade people who aren't listening. They've connected a lot of the pieces that we all already know-plus a lot that we don't. It's a rare approach that recognizes that the customer is in charge and must be encouraged and engaged on his/her own terms, not the sellers. Waiting for Your Cat to Bark? takes apart the persuasion process, breaks down the steps and gives practical ways to tailor your approaches to your varying real customers in the real world. This book is at a high level that marketers better hope their competitors will be too lazy to implement." ?George Silverman, Author, The Secrets of Word of Mouth Marketing: How to Trigger Exponential Sales Through Runaway Word of Mouth "We often hear that the current marketing model is broken-meaning the changes in customers, media, distribution, and even the flatness of the world make current practices no longer relevant. Yet we have offered a solution. This book recognizes the new reality in which we operate and provides a path for moving forward. The authors do an outstanding job of using metaphors to help make Persuasion Architecture clear and real-life examples to make it come alive. Finally, someone has offered direction for how to market in this new era where the customer is in control." ?David J. Reibstein, William Stewart Woodside Professor, Wharton Business School of the University of Pennsylvania and former Executive Director, Marketing Science Institute "If you want to learn persistence, get a cat. If you want to learn marketing, get this book. It's purrfect." ?Jeffrey Gitomer, Author, The Little Red Book of Selling

For over fifty years, Needfinding has been one of the core classes in the design program at Stanford University. Its premise is that by studying the world around us, we can get a better understanding of what people need, and use those insights to create meaningful new products and services. Needfinding draws upon theory and methods from anthropology, psychology, engineering and design planning to better equip aspiring design researchers. Much of the class involves hands on learning and project work. This book acts as the primary reference for methods taught in the class. It's now available to students and non-students alike.

The evolution of the automotive transmission has changed rapidly in the last decade, partly due to the advantages of highly sophisticated electronic controls. This evolution has resulted in modern automatic transmissions that offer more control, stability, and convenience to the driver. Electronic Transmission Controls contains 68 technical papers from SAE and other international organizations written since 1995 on this rapidly growing area of automotive electronics. This book breaks down the topic into two sections. The section on Stepped Transmissions covers recent developments in regular and 4-wheel drive transmissions from major auto manufacturers, including Daimler Chrysler, General Motors, Toyota, Honda, and Ford. Technology covered in this section includes: smooth shift control automatic transmission efficiency mechatronic systems fuel saving technologies shift control using information from vehicle navigation systems fuzzy logic control. The section on Continuously Variable Transmissions presents papers that demonstrate that CVTs offer better efficiency than conventional transmissions.Technologies covered in this section include: powertrain control fuel consumption improvement development of a 2-way clutch system internal combustion engines with CVTs in passenger cars control and shift strategies CVT application to hybrid powertrains. The book concludes with a chapter on the future of electronic transmissions in automobiles.

In JERRI, A Black Woman's Life In the Media, author Jerri Lange has written a personal, candid revelation of the situation of a black woman in the early days of media. As its publisher, Ishmael Reed, of Ishmael Reed Publishing Company, comments: "JERRI, A Black Woman's Life In the Media reminds us of a time when sheroes like Ms. Lange challenged powerful institutions, no matter the consequences." Armed with her father's admonition to not allow anyone to interfere with her dreams, Jerri Lange set out on a life's journey that would take her to the pinnacle of San Francisco's media and political power. A single mother, Ms. Lange accomplished this while raising three distinguished sons, including Michael, a director, producer and Malcolm X delineator, and Ted, a regular on the television series "Love Boat." Ms. Lange's journalistic career began at the San Francisco Chronicle, where she worked along side such luminaries as Art Hoppe, Charles McCabe and Count Marco, and her mentor, Scott Newhall. She continued with tours at stations KEMO, KBHK, KGO and KQED Television. The dream ended when Ms. Lange delivered her famous speech, "Blacks In Broadcasting," in which she criticized the negative images of blacks in the media. After this speech she found the industry that had formerly welcomed her as the token pioneering African-American newswoman and television host, began to give her the cold shoulder. She was eventually, in her words, black balled." But if some members of the segregated San Francisco media thought that they had defeated Jerri Lange, they underestimated the resiliency of Laura and Turner Wilson's daughter. Ms. Lange began to tour the world, which provided her with the opportunity to draw revealing portraits of a dictator's wife, Arnold Tonbee, and others. Along the way she was feted by members of the British aristocracy and was an invited guest to a king's wedding. Ms. Lange also gives the reader revealing portraits of Malcolm X, Shirley MacLaine, Sammy Davis, Jr. and Daisaku Ikeda. She continued her career at KHET, a public television station in Hawaii. With African American faces disappearing from television news rooms, and the media establishment having abandoned their goal of diversifying the industry by the year two thousand, a challenge made by the late Robert Maynard, Ms. Lange's effort as a pioneer African-American news woman is especially timely.

This book highlights the important need for more efficient and environmentally sound combustion technologies that utilise renewable fuels to be continuously developed and adopted. The central theme here is two-fold: internal combustion engines and fuel solutions for combustion systems. Internal combustion engines remain as the main propulsion system used for ground transportation, and the number of successful developments achieved in recent years is as varied as the new design concepts introduced. It is therefore timely that key advances in engine technologies are organised appropriately so that the fundamental processes, applications, insights and identification of future development can be consolidated. In the future and across the developed and emerging markets of the world, the range of fuels used will significantly increase as biofuels, new fossil fuel feedstock and processing methods, as well as variations in fuel standards continue to influence all combustion technologies used now and in coming streams. This presents a challenge requiring better understanding of how the fuel mix influences the combustion processes in various systems. The book allows extremes of the theme to be covered in a simple yet progressive way.
