This study considers the ways Spanish American and Brazilian poets differ from their European counterparts by considering 'Latin American' as more than a perfunctory epithet. It sets the orthodox Latin tradition of the subcontinent against others that have survived or grown up after the conquest then pays attention to those poets who, from Independence, have striven to express a specifically American moral and geographical identity.

Dr Brotherson focuses on Modernismo, or the 'coming of age' of poetry in Spanish America and Brazil, and the importance of the movements associated with it. He considers César Vallejo and Pablo Neruda, probably the greatest of the selection, Octavio Paz, and modern poets who have reacted differently to the idea that Latin America might now be thought to have not just a geographical but a nascent political identity of its own. Poems are liberally quoted, and treated as entities in their own right.

Using *El lazarillo de ciegos caminantes* (the "Guide for Blind Rovers" by Alonso Carrío de Lavandera, the best known work of the era) as a jumping off point for a sprawling discussion of 18th-century Spanish America, Ruth Hill argues for a richer, more nuanced understanding of the relationship between Spain and its western colonies. Armed with primary sources including literature, maps, census data, letters, and diaries, Hill reveals a rich world of intrigue and artifice, where identity is surprisingly fluid and always

**Anger is not just ubiquitous, it is also popular. Many people think it is impossible to care sufficiently for justice without anger at injustice. Many believe that it is impossible for individuals to vindicate their own self-respect or to move beyond an injury without anger. To not feel anger in those cases would be considered suspect. Is this how we should think about anger, or is anger above all a disease, deforming both the personal and the political? In this wide-ranging book, Martha C. Nussbaum, one of our leading public intellectuals, argues that anger is conceptually confused and normatively pernicious. It assumes that the**

**suffering of the wrongdoer restores the thing that was damaged, and it betrays an all-too-lively interest in relative status and humiliation. Studying anger in intimate relationships, casual daily interactions, the workplace, the criminal justice system, and movements for social transformation, Nussbaum shows that anger's core ideas are both infantile and harmful. Is forgiveness the best way of transcending anger? Nussbaum examines different conceptions of this much-sentimentalized notion, both in the Jewish and Christian traditions and in secular morality. Some forms of forgiveness are ethically promising, she**

**claims, but others are subtle allies of retribution: those that exact a performance of contrition and abasement as a condition of waiving angry feelings. In general, she argues, a spirit of generosity (combined, in some cases, with a reliance on impartial welfare-oriented legal institutions) is the best way to respond to injury. Applied to the personal and the political realms, Nussbaum's profoundly insightful and erudite view of anger and forgiveness puts both in a startling new light.**

**Manliness has always been linked to physical prowess and to war; indeed the warrior has been the archetypal man across countless cultures throughout time. In this magisterial excursion through literature, history, warfare, and sociology,**

**one of our most prominent scholars tracks the complex relationship between the changing methods and goals of warfare and shifting models of manhood. This journey takes us from the citizen soldiers of ancient Greece to the medieval knights to the misogynistic terrorists of Al Qaeda. As he chronicles these transformations, Leo Braudy weighs the significance of everything from weapon technology to the hairstyles favored during different eras. He offers fresh insights on codes of war and codes of racial purity, and on cultural and historical figures from Socrates to Don Quixote to Napoleon to Custer to Rambo. Epic in scope and free of academic jargon, *From Chivalry to Terrorism* is a masterwork of scholarship that is both accessible and breathtakingly ambitious.**

He also returns to the debacle that entered sporting folklore during his rematch with Sugar Ray Leonard, when he uttered the infamous words 'no mas' - no more. Starting life in abject poverty as the illegitimate son of a serving US soldier, Duran quickly realized that his fists could both protect him on the streets and put food on the table. From his stunning debut in New York to the glorious defeat of Sugar Ray Leonard, the world titles and the chaos that ensued after the No Mas encounter, Duran's explosive life in the ring was matched only by the volatility outside of it, as he lurched from kingmaker to bankruptcy, before the ultimate ending of a bloody comeback and, finally, redemption.**

**poder político a la oligarquía e impusieron un gobierno al servicio del pueblo. Nació la Revolución Nacional, una de las tres más grandes realizadas en Latinoamérica durante el Siglo XX. El ensayo *La Novela Revolucionaria. Otras novelas escritas durante los años del gobierno revolucionario, procuraron crear una conciencia en favor de una revolución socialista. ongoing after-school project called La Clase Mágica. It is a blow-by-blow description of the early transformations of a project that began as an educational activity and slowly but deliberately turned into a social action project whose aim was to serve those with low economic and political means and little access to educational resources. This multivocal account details research in action for effectively serving Spanish-English bilingual speakers from a Mexican origin community, as well as--on a broader level--the diverse populations that increasingly characterize American society today. The focus is on the early foundational work of the project between 1989-1996, though attention is also given to the national and international recognition the project has subsequently received, the college-going patterns of its long-term

participants, and the transplantation of the project to other cultural communities. The book speaks out from the "zones of contact" between the university and a language minority community about new ways to extend and intersect theory and practice in many areas of the educational enterprise. Contact is defined not only in the physical sense of face-to-face interaction but also as symbolic interaction between languages, cultures, histories, and epistemologies. Thus, Vázquez speaks of optimal possibilities situated in the middle grounds, or more technically speaking, in the borders between Spanish and English, Mexican and mainstream culture, minority and majority designations, and between school and community contexts where contact is made and new arrangements are imagined. This account uses the

reflections of participants at times to take readers from the scientific to the everyday, to make real and concrete the theoretical conceptualizations that box in human behavior. In this way, it defines the theories, methods, and philosophies for linking multiple disciplines, institutions, and participant groups into a concerted effort with potential to reframe the educational opportunities of under-served populations. A close look is provided into the intricacies and the fundamental principles for building and sustaining effective learning environments and institutional relations necessary for enhancing the potential of learners of all ages. In the process, the book also suggests ways in which community members and institutional agents can play an active and integral role in creating learning opportunities that serve both constituencies.
