In 2050 zal driekwart van de wereldbevolking in een stedelijke omgeving wonen. Een groot deel van deze groei is geconcentreerd in ontwikkelingslanden waar men (nog) niet opgewassen is tegen de uitdagingen die deze veranderingen met zich meebrengen. Maar ook in rijkere landen is de overbelasting van woningen, transport en infrastructuur een probleem. In dit boek worden de meningen en visies van experts rond deze problematiek weergegeven.

Crossing into the quarantine zone on the most dangerous missions, he studied local customs to determine how this disease—the Ebola virus—was spreading. Later, Piot found himself in the field again when another mysterious epidemic
