

## Northeast Region Facts

February issue includes Appendix entitled Directory of United States Government periodicals and subscription publications; September issue includes List of depository libraries; June and December issues include semiannual index

A static compensator (STATCOM), also known as static synchronous compensator, is a member of the flexible alternating current transmission system (FACTS) devices. It is a power-electronics based regulating device which is composed of a voltage source converter (VSC) and is shunt-connected to alternating current electricity transmission and distribution networks. The voltage source is created from a DC capacitor and the STATCOM can exchange reactive power with the network. It can also supply some active power to the network, if a DC source of power is connected across the capacitor. A STATCOM is usually installed in the electric networks with poor power factor or poor voltage regulation to improve these problems. In addition, it is used to improve the voltage stability of a network. This book covers STATCOMs from different aspects. Different converter topologies, output filters and modulation techniques utilized within STATCOMs are reviewed. Mathematical modeling of STATCOM is presented in detail and different STATCOM control strategies and algorithms are discussed. Modified load flow calculations for a power system in the presence of STATCOMs are presented. Several applications of STATCOMs in transmission and distribution networks are discussed in different examples and optimization techniques for defining the optimal location and ratings of the STATCOMs in power systems are reviewed. Finally, the performance of the network protection scheme in the presence of STATCOMs is described. This book will be an excellent resource for postgraduate students and researchers interested in grasping the knowledge on STATCOMs.

Facts for Northeast Committeemen

Interregional Input-output Analysis of the Chinese Economy

Hearings Before the Subcommittee on Transportation and Commerce of the Committee on Interstate and Foreign Commerce, House of Representatives, Ninety-fourth Congress, First Session ...

After three decades of spectacular economic growth in China, the problem is no longer how to achieve growth, but how to manage its consequences and how to sustain it. The most important consequence, at least as far as Chinese policy makers are concerned, is the rapidly growing inequality, between persons, between rural and urban areas, and between inland and coastal regions. At the same time, the institutions that have brought rapid growth so far are now under stress, and there is a need to reform and innovate on this front in order to sustain rapid growth, and to have growth with equity. The analytical literature has responded to the emerging policy problems by specifying and quantifying their magnitude, understanding their nature, and proposing policy approaches and solutions. Policy makers have also been looking to analysts for interaction and assistance. This volume brings together a collection of the best available analyses of China's problems in governing rapid growth, focusing on equity and institutions. Contributions include perspectives from leading policy makers who were intimately involved in the reform process, and from leading academics in articles published in top peer reviewed journals.

The Intelligent Client Series, written by CCH Tax Law Editors and consisting of informative, hot topic booklets and Key Facts and Figures Cards, is designed to inform your clients and promote your business. The Intelligent Client Series contains valuable information on topical issues in an easy-to-understand quick-read format. Customize these booklets and Key Facts cards with your logo and contact information. Your clients will appreciate the information and remember you when it comes to tax planning and tax and accounting issues. These booklets and cards are attractively priced, and can be personalized with your firm's message in quantities of 50 or more. They are available as stock versions with the CCH logo in any quantity. Visit http://cchgroup.com/intelligentclient to order.

Index to the Monthly Issues

This book explores the idea, psychology and political geography of Northeast India as forged by two interrelated but autonomous meta-narratives. First, the politics of conflict inherent in, and therefore predetermined by physical geography, and second, the larger geopolitics that was unfolding during the colonial period. Unravelling the history behind the turmoil engulfing Northeast India, the study contends that certain geographies — most pertinently fertile river valleys and surrounding mountains which feed the rivers — are integral to nature and any effort to disrupt this cohesion will result in conflict. It comprehensively traces the geopolitics of the region since colonial era — in particular the Great Game; the politics that went into the making of the McMahon Line, the Radcliffe Line and the Pemberton Line; the region's relations with its international neighbours (China, Bhutan, Myanmar, Bangladesh and Nepal); as well as the issue of many formerly non-state-bearing populations awakening to the reality of the modern state. Lucid and analytical, this book will be of great interest to scholars and researchers of Northeast India, modern Indian history, international relations, defence and strategic studies, and political science.

Everything from clothing styles to beauty shots is kicked back in Arizona. From teeming, cosmopolitan Phoenix to long stretches of open roads to intriguing trails that lead to incredible sights or adventures, Arizona has it all. This friendly guide helps you enjoy it all, with info on: 5 great itineraries, including kid-friendly jaunts, plus day trips and two-day trips The grandeur of the Grand Canyon, the Red Rocks of Sedona, the expanses of northeast Arizona—Hopi and Navajo country, and more Fantastic historic attractions, including Frank Lloyd Wright's former home and studio, a ghost town, a mining town, an active trading post, Holbrook (home of classic Route 66 kitsch), and more Upscale shopping in Phoenix or bargaining in Nogales Rafting on the Colorado River, mountain hiking in Sedona, being a cowhand at a dude ranch, star gazing, horseback riding, and more Where to find Native American crafts, Navajo rugs, Western art, Southwestern and ethnic furnishing, katchina dolls, silver inlay jewelry Fantastic museums and monuments where you can delve into Native American culture, plus some places where the ancient traditions are practiced today Like every For Dummies travel guide, Arizona For Dummies, 4th Edition includes: Down-to-earth trip-planning advice What you shouldn't miss — and what you can skip The best hotels and restaurants for every budget Handy Post-it Flags to mark your favorite pages Whether you want to experience the Old West or the new West...whether your style is luxuriating at a plush resort, golling on glorious, challenging courses, appreciating incredible sights and scenery, or exploring historical attractions and our Native American heritage, you'll find lots to do in Arizona. Kick back, relax, and enjoy.

Bioprospecting of Indigenous Bioresources of North-East India

Joint Hearing to Review the Davis-Bacon Act

Static Compensators (STATCOMs) in Power Systems

United States Railway Association Preliminary System Plan

United States Railway Association Preliminary System Plan, Hearings Before the Subcommittee on Transportation and Commerce of the ..., 94-1, May 5, 6, 8, 9, 12, 13, 14, 15, 16, and 21, 1975

***This book presents the key findings from a new poverty assessment for Vietnam, led jointly by the World Bank and the Vietnam Academy of Social Sciences (VASS). It takes a fresh look at the lives of poor men, women, and children, and explores the constraints and opportunities they face today in rising out of poverty. The book aims to do three things. First, it proposes revisions to Vietnam's poverty monitoring system—via better data, updated welfare aggregates, and new poverty lines—to bring these more in line with economic and social conditions in present-day Vietnam. Second, it revisits the stylized facts about deprivation and poverty in Vietnam, and develops an updated profile and diagnostic of poverty using data from the most recent Vietnam Household Living Standards Survey (VHLSS 2010), complemented by new qualitative field studies. Third, it aims to forge a consensus around some of the key challenges for reducing extreme poverty and promoting shared prosperity over the next decade, including changing regional patterns of poverty and wealth, high and persistent poverty among ethnic minorities, substantial and increasing vulnerability, and rising inequality in outcomes and opportunities.***

This book presents pioneering work on an interregional input-output table of the Chinese economy and its applications to the analysis of interregional and interindustrial relations in China. It is the fruit of the authors' joint efforts of more than five years to establish a solid basis for the analysis of interregional relations in China, in the hope of laying the foundation for further studies of regional development in that country. The book endeavors to make a contribution to the regional typology of the Chinese economy. The Chinese provinces are classified into seven large regions. The interregional input-output table is constructed accordingly. Chapter I describes the methodology for producing this interregional input-output (IRIO) table. Chapter II presents the (IRIO) table after a brief explanation of the Chinese statistical data needed for the compilation of the table. Chapter III explains the basis of seven large regions adopted for the IRIO table. Chapter IV deals with the interdependence of regions and the effects of the changes in some parameters of one region on the activities in other regions. Chapter V, the last chapter, applies the IRIO table to policy analysis. Contents: How to Construct the Interregional Input-Output Table (S Ichimura & S Xia); Interregional InputOCoOutput Table of the Chinese Economy in 1987 (Q Li et al.); Regional Division and Features of the Chinese Economy (W Li & Z Wu); An Analysis of Interregional Dependence by the Interregional Input-Output Table (S Li et al.); Applications of Interregional InputOCoOutput Analysis to Policy Simulation (B Li et al.). Readership: Economists working on regional problems of China; graduate students in regional or urban economics; business managers or business school students intending to do business in China."

This work is a comprehensive information on the indigenous bioresources of North Eastern India with the scope of bioprospecting for discovery and commercialization of new sources and products and long-term ecological balance. The exploration, conservation and sustainable utilization of bioresources of world's Megabiodiversity Hotspots are undeniable. North Eastern India is a recognised biodiversity hot spot where the evolutionary forces are at its optimum, making this region as centre of origin for many species. Although little bit exploratory studies have been conducted in this part of the globe but a scientific exploitation of the bioresources is almost lacking. Unscientific exploitation and overexploitation without proper knowledge of the bioresources may lead to imbalanced ecosystem of this mega diversity region. At the same time, very less exploration and exploitation will hamper biodiversity based development. Today, unscientific dramatic changes are underway in this region. Human activities are changing, degrading and destroying the bioresources in an unplanned manner. Scientific bioprospecting of the bioresources will boost the economy while ensuring conservation. This book offers comprehensive information about various levels of bioprospecting of the gene pool of this Indo-Burma Mega Biodiversity Hot Spot, the North East India, which is endowed with huge biodiversity potential for exploration and exploitation for the benefit of humankind. Also, this book highlights the less and merely explored part of the indigenous biodiversity of North East India with explanation towards their better sustainable exploitation for benefit of the people, economy and environment. The novelty of the book lies in expert coverage of the bioresources of this mega-diverse region including plants, microbes, insects etc. with provisions for their sustainable scientific utilization. This book portrays North East India as a melting pot of bioresources which are little explored and also those resources which are still to be explored. The book mainly highlights the bioprospecting approaches for North East Indian bioresources, and thus, it make itself a unique one in filling the knowledge gap that is there regarding the bioprospecting of the biodiversity of this special region on the earth. The book concludes by the ecotourism potential of this region. The target audiences for this book include biodiversity economists who are working on technology and bioresource management issues, and especially on biotechnology and biodiversity, development economists addressing the issues of bioresources in developing countries. These people may be in academia, in government, in non-governmental organizations and in private companies. The other target audiences group is policy scholars in government/public sectors who are interested in issues of biotechnology, IPRs, and biodiversity. In addition, scholars/experts in both development studies and resource management studies form another group of target audiences. Also, the book will be useful for the interaction between developed and developing nations regarding the issues of biodiversity and bioprospecting, as North Eastern India is the hub of Biodiversity.
