This book examines the structural changes in the labour market in North-East India. Going beyond the conventional study of tea and agricultural sectors, it focuses on the nature, pattern and structure of work and employment in the region as well as documents emerging shifts in the labour force towards farm to non-farm dynamics. The chapters explore historical developments in employment patterns, labour market policies, issues of gender and social-religious dimensions, as well as point to growing forms of casual, informal and contractual labour across sectors. Through large-scale data and detailed

case studies on unfree labour in plantations and those employed in crafts, handloom and the manufacturing industry, the book provides insights into labour and employment in the region. It also delves into the temporal and spatial dimensions of non-farm employment and its relationship with rural income distribution and labour mobility. By bringing interdisciplinary perspectives from scholars working on North-East India, this work fills a major gap in the political economy of the labour market in the region. The volume will be useful to scholars and researchers of development studies, North-East India studies, labour studies, economics, sociology and political science as well to those involved with governance and

This is the definitive guide for Symbian C++ developers looking to use Symbian SQL in applications or system software. Since Symbian SQL and SQLite are relatively new additions to the Symbian platform, Inside Symbian SQL begins with an introduction to database theory and concepts, including a Structured Query Language (SQL) tutorial. Inside Symbian SQL also provides a detailed overview of the Symbian SQL APIs. From the outset, you will “get your hands dirty” writing Symbian SQL code. The book includes snippets and examples that application developers can immediately put to use to get started quickly. For device creators and system software developers, Inside

This book will help readers comprehend technical and policy elements of telecommunication particularly in the context of 5G. It first presents an overview of the current research and standardization practices and lays down the global frequency spectrum allocation process. It further lists solutions to accommodate 5G spectrum requirements. The readers will find a considerable amount of information on 4G (LTE-Advanced), LTE-Advance Pro, 5G NR (New Radio); transport network technologies, 5G NGC (Next Generation Core), OSS (Operations Support Systems), network deployment

Microfinance india: state of the Sector

Report is a series of annual reports on the microfinance sector in India. The Report seeks to document developments, clarify issues, publicise studies, stimulate research, identify policy choices, generate understanding and enhance support for the sector. It is a comprehensive one-stop document that provides the latest data and a holistic view of the sector, combines analysis and description and integrates a variety of topics hitherto treated piecemeal. The Report highlights recent developments in Self Help Groups (SHGs) and SHB-Bank Linkage Programmes (SBLPs), and focuses on microfinance with regard to the investment scenario in India. It also deals with the burgeoning field of urban

microfinance, developments in micro-insurance and the impact of new technologies on the microfinance sector. Additionally, it recognizes the high demands which the state makes on microfinance institutions and discusses the need and relevance of new policy regulations.

Complementing these analyses, statistical annexures provide essential data on the sector, strengthening its utility as a reference document. It contains extensive original material, yet draws widely on the findings of other recent studies and reports, thereby providing a complete, detailed analysis of the status and the future of microfinance.

work contexts has the potential to alter our work and learning practices. This is particularly true for knowledge workers. In addressing the implications of this transformation the book offers a multi-faceted collection of different concepts and cases of mobile learning in work environments from international contexts. The contributions are centred on the question of how individual users and organisations can harness mobile devices for learning and education. The range of examples presented in this book demonstrates that mobile devices foster situated approaches to learning in and across work contexts. The book is targeted at both practitioners - trainers or managers in charge of in-company training - and researchers, who are interested in designing, implementing or evaluating work-based mobile learning.

Sensor Networking and Applications focuses on sensor deployment and networking, adaptive tasking, self-configuration, and system control. In the expanded applications section, the book draws on the insight of practitioners in the field. Readers of this book may also be interested in Distributed Sensor Networks, Second Edition: Image and Sensor Signal Processing (ISBN: 9781439862827). Wireless communication engineers will turn to this book to gain a better understanding of how the design of communications hardware and

software relate to overall performance of the CDMA wireless system. Since the book provides valuable insights into the impact of tradeoffs and decisions made during design, simulation and production, engineers can develop better performing wireless handsets and related equipment.

The author offers an insider's account of the cutthroat entrepreneurial environment of Silicon Valley, detailing his struggle to start up a computer company, put together a team of software designers, and bring to market his unique product

This classic volume achieves a remarkable width of appeal without sacrificing scientific accuracy or depth of analysis. It is a valuable contribution to the study of business efficiency which should be read by anyone wanting information about the developments and place of management, and it is as relevant today as when it was first written. This is a practical book, written out of many years of experience in working with managements of small, medium and large corporations. It aims to be a management guide, enabling readers to examine their own work

and performance, to diagnose their weaknesses and to improve their own effectiveness as well as the results of the enterprise they are responsible for.

This volume is the second part of a four-volume set (CCIS 190, CCIS 191, CCIS 192, CCIS 193), which constitutes the refereed proceedings of the First International Conference on Computing and Communications, ACC 2011, held in Kochi, India, in July 2011. The 72 revised full papers presented in this volume were carefully reviewed and selected from a large number of submissions. The papers are organized in topical sections on database and information systems;
