Draft Legislation to Reform Employment and Training Programs Administered by the Department of Labor

Unemployment and underemployment are global development challenges. The situation in Ghana is no different. In 2016, it was projected that, given the growing youth population, 300,000 new jobs would need to be created each year to absorb the increasing numbers of unemployed young people. Yet

the structure of the Ghanaian economy in terms of employment has not changed much from several decades ago. Most jobs are low skill, requiring limited cognitive or technology know-how, reflected by low earnings and less decent work. An additional challenge for Ghana is the need to create access to an adequate number of high-quality, productive jobs. This report seeks to increase knowledge about Ghana's job landscape and youth employment programs to assist policy makers and key stakeholders to identify ways to improve the programming and effectiveness of youth employment programs and to strengthen coordination among major stakeholders. Focused, strategic, short-to-medium and long-term responses are required to address the current unemployment and underemployment challenges. Effective coordination and synergies among youth employment programs are needed to avoid duplication of efforts while transformation of the country's economic structure is improved. Effective private sector participation in skills development and employment programs is suggested. The report posits interventions in five priority areas, which are not new but could potentially be impactful through scaling

up. These areas include: (1) agriculture and agribusiness promotion; (2) apprenticeship (skills training); (3) entrepreneurship promotion; (4) high-yielding areas (renewable energy-solar, construction, tourism, sports, and green jobs); and (5) pre-employment support services Finally, with the fast-changing nature of work due to technology and artificial intelligence, Ghana needs to develop an education and training system that is versatile and helps young people to adapt and thrive in the 21st century world of work.

The terms social engineering is now coined first time in the state elections. It gives a very big point to be thought over. What is social engineering and why it is being

needed. As that of many of the big issues have been raised in today's life regarding social structure. As we all know that Indian society is very complex society in all the means. We have orthodoxal issues, labour issues, child and development issues, gender equality, mother worship issues at the same time.

Investing in Skills for Productivity, Inclusivity, and Adaptability

Born in 1913 in Collinsville, Illinois, Cecil Reed has lived all of his life in the Midwest as a black man among whites. The self-styled fly in the buttermilk worked among whites with such skill and grace that they were barely aware of his existence - unless he wanted to get a bank loan or move in

their neighborhood. Now, in his lively and optimistic autobiography, he speaks of his resilience throughout a life spent working peacefully but passionately for equality. As a teenager and young man, Cecil Reed was the black waiter, the short-order cook, the paper carrier, the tap dancer and singer, the carpenter, and the maintenance man who learned to survive in a white society. As an adult in Cedar Rapids, Iowa, he inched his way into owning several small businesses, convincing the community to accept him and his family through hard work and creativity. When whites felt besieged by black militants in the sixties, they turned to him for less threatening advice and leadership. Reed put away his floor sander and became an inspiring speaker who crisscrossed the country offering solutions to civil rights problems. In 1966, Reed was elected to the Iowa House of Representatives, the first and only black Republican to hold this office. His next major triumph: securing a unanimous vote of approval for the state's fair housing bill. Within a year he was appointed by a Democratic governor to the Iowa Employment Security Commission, becoming the first black commissioner in America. Thus began a twenty-year career in public service in both state and federal positions that brought him into partnership with the nation's political, economic, and religious leaders. Throughout his sometimes tragic but always hope-filled life, from shoeshine stand to Department of Labor, Cecil Reed has been a quiet, persistent, realistically-within-the-system fighter for justice. Although he epitomizes the success of his "get along by getting along" philosophy, he still confronts racism daily, still feels "in harm's way", still works for equal rights for all. Every reader will appreciate his honest, energizing, pragmatic chronicle of

A practical guide

Fiscal Year 1993 Budget for Veterans' Programs

Despite strong recent economic growth, Sub-Saharan Africa has levels of economic transformation, poverty reduction, and skill development far below those of other regions. Smart investments in developing skills—aligned with the policy goals of productivity growth, inclusion, and adaptability—can help to accelerate the region's economic transformation in the 21st century. Sub-Saharan Africa's growing working-age population presents a major opportunity to increase shared prosperity. Countries in the region have invested heavily in building skills; public expenditure on education increased sevenfold over the past 30 years, and more children are in school today than ever before. Yet, systems for building skills in this population have fallen short, and these shortcomings significantly impede economic

prospects. In half of the countries, fewer than two in every three children complete primary school; even fewer reach and complete higher levels of education. Learning outcomes have been persistently poor, leading to substantial gaps in basic cognitive skills—literacy and numeracy—among children, young people, and adults. The literacy rate of the adult population is below 50 percent in many countries; functional literacy and numeracy rates are even lower. Systemwide change is required to achieve significant progress. Multiple agencies at the central and local levels are involved in skills development strategies, making skills “everyone’s problem but no one’s responsibility.” Policies and reforms need to build capacity for evidence-based policies and create incentives to align the behaviors of all stakeholders with the pursuit of national skills development goals. The Skills Balancing Act in Sub-Saharan Africa: Investing in Skills for Productivity, Inclusivity, and Adaptability lays out evidence to inform the policy choices that countries will make in skill investments. Each chapter addresses a set of specific questions, drawing on original analysis and synthesis of existing studies to explore key areas:

- How the skills appropriate to each stage of the life cycle are acquired and what market and institutional failures affect skills formation
- What systems are needed for individuals to access these skills, including family investments, private sector institutions, schools, and other public programs
- How those systems can be strengthened
- How the most vulnerable individuals—those who fall outside the standard systems and have missed critical building blocks in skills acquisition—can be

supported. Countries will face trade-offs—often stark ones—that will have distributional impacts and a bearing on their development path. Committed leaders, reform coalitions, and well-coordinated policies are essential for taking on the skills balancing act in Sub-Saharan Africa.

Africa is known both for having a primarily youthful
population and for its elders being held in high esteem.

However, this situation is changing: people in Africa are living
longer, some for many years with chronic, disabling illnesses.

In Ghana, many older people, rather than experiencing a sense
of security that they will be respected and cared for by the
younger generations, feel anxious that they will be abandoned
and neglected by their kin. In response to their concerns about
care, they and their kin are exploring new kinds of support for
aging adults, from paid caregivers to social groups and senior
day centers. These innovations in care are happening in fits
and starts, in episodic and scattered ways, visible in certain
circles more than others. By examining emergent discourses
and practices of aging in Ghana, *Changes in Care* makes an
innovative argument about the uneven and fragile processes by
which some social change occurs. There is a short film that

accompanies the book, "Making Happiness: Older People
Organize Themselves" (2020), an 11-minute film by Cati Coe.

Demand and Supply of Skills in Ghana

Entrepreneurial learning for TVET institutions

The Skills Balancing Act in Sub-Saharan Africa

The Life Story of Cecil Reed

Hearing Before the Committee on Veterans' Affairs, House of Representatives, One Hundred Sixth Congress, First Session, February 11, 1999

Skills development in Ghana encompasses foundational skills, transferable/soft-skills, and technical and vocational skills. This report focuses on one segment of this skills development system: formal and informal technical and vocational education and training (TVET) at the pre-tertiary level. TVET represents a major intersection between education, youth and the labor market. The government has long promised to the population that increasing technical and vocational skills training opportunities will help solve youth unemployment. However, market distortions and inefficiencies have led to an adverse cycle of high costs, inadequate quality of supply and low demand, leading to further pressures on the effectiveness and efficiency of TVET services. This adverse cycle means that the political and policy promise of skills development helping to ease the unemployment problem is at risk of remaining unfulfilled. The report

focuses on social and economic demand for (pre-tertiary) technical and vocational skills and maps out the supply of these skills from formal and informal, private and public sectors. The dual purpose has been to both carry out an institutional and policy analysis and also to establish a platform for monitoring sector performance and assisting policy and Development Partner harmonization. The report analyzes the economic and social demand for technical and vocational skills and the suitability of the current supply as well as the effectiveness of policy, coordination and financing of technical and vocational skills development. The report annex provides the summary of economic demand analyses from the key sectors reviewed and provides a full mapping of all technical and vocational programs in Ghana. The study offers a comprehensive set of policy recommendations for improving Ghana's pre-tertiary technical and vocational skills development sector, which will be of interest to policy makers and development partners in Ghana.
