Mercury is one of the world's most poisonous substances, and yet dentists routinely use it in amalgams to fill our teeth. Forty years ago, Dr. Hal Huggins questioned this practice, and now legions of dentists, researchers, and citizens are adding their voices of concern. It's All in Your Head looks at past research on mercury toxicity and dental amalgams as well as current scientific findings that can no longer be ignored. It describes the

possible effects of mercury toxicity, including multiple sclerosis, Alzheimer's disease, Hodgkin's disease, Chronic Fatigue Syndrome, and virtually all autoimmune disorders. Written in easy-to-understand language, It's All in Your Head explodes the claim that mercury amalgams are safe. If you think your worries are all in your head, you may be right. Guiding patient behavior is as important as ever for the practicing dentist, and the behavior of pediatric patients is perhaps the most challenging to manage. Drs. Wright and Kupietzky here update Dr. Wright's classic work on

managing pediatric dental patients. Behavior Management in Dentistry for Children, 2nd Edition, has been entirely rewritten and includes the latest and most effective management strategies from an international team of experts in the field. The book addresses the influence of family and parenting styles on children's behavior and the factors that determine how children behave in the dental office. Pharmacological and non-pharmacological management techniques are described in depth, as are techniques for dealing with special needs patients. Clinical scenarios are described

This edited volume investigates the nature and possible applications of an expanded and reconceptualized theoretical construct of speaking as a dynamic socially-constructed endeavour. It addresses both theoretical perspectives and methodological procedures to define and circumscribe the assessment of contextualized speaking. The chapters focus on the complexity brought about by actual interactional competence in speaking tasks and discuss how testing and assessment models and

practices can incorporate recent research findings on the inherently dynamic and situated nature of language use. The volume presents research on language assessment in a variety of languages other than English, including French, Chinese and Japanese. It also examines the role that embodied action (gaze, gesture, orientation to materials and texts in the environment) plays in assessment practices, an area that has heretofore remained under-explored. Chapter 6 will be free to download as an open access publication. We will link to it here as soon as it is available.

Midwifery Care introduces students to the fundamentals of the healthcare of Indigenous Australians, from the perspective of both the patient and the professional. Aboriginal Elder Ivy Molly Booth gifted the word Yatdjuligin to the authors to use as the title of this textbook. The word Yatdjuligin literally translates to 'talking in a good way'. For Wakgun people the process of Yatdjuligin is deeply embedded in learning. Written by a team of Aboriginal and Torres Strait Islander nursing and midwifery academics, and practising nurses, this book is designed for both non-Indigenous and Indigenous nurses, who will work with
