however treats gender as it needs to be treated, as a fundamental organizing principle of organization'. Professor Paul Iles, of Liverpool Business School, Liverpool John Moores University: Challenging mainstream accounts of organizational behaviour and management, which treat gender as an optional extra, this book demonstrates how it can be an essential organizing principle. Each chapter covers one or more of the principal mainstream topics before deconstructing and critiquing these and suggesting other ways of understanding these issues.

Organisational Behaviour by Khushboo Pathak is a publication of the SBPD Publishing House, Agra. The book extensively covers all major topics of Organisational Behaviour and helps the student understand all the basics and get a good command on the subject.

In this unusual study, several South African organizations are viewed through the framework of chaos and quantum complexity theories. Reaching the conclusion that a multitude of different skills within a company?complexity?is the best way to meet organizational goals, the discussion describes how talent and skill can be amassed through organizational change, attention to group behavior, proper management of diverse groups, and the use of collective bargaining.

Organisational Behaviour: Engaging People and Organisations uses an integrative model to teach a robust approach to OB by encompassing five levels of analysis: environment, individual, groups, leadership and organisation, and demonstrating how each relates to one another. It teaches a contemporary approach to

Organisational Behaviour that aims to understand, rather than control, human behaviour in organisations. Unique to this local edition is the inclusion of a 'critical perspective' of Organisational Behaviour introduced through in-chapter features and the end-of-chapter case study. This complements courses that teach mainstream theory and advance through to critical examination of the subject area. This approach presents a side of management that reflects real-world experiences in the workplace by challenging the managerial perspective and discussing issues for employees.
