Here is a directory that should help the technical service department in any library find a multitude of helpful professional resources quickly and inexpensively - resources that could cost thousands of dollars or require time-consuming calls or visits to other libraries to obtain. The guide provides information about hundreds of home pages, and is divided into three sections. Part 1, Acquisitions, lists the best publisher and vendor home pages; conservation, and gifts and exchange home pages; and library acquisitions department pages. These can offer help with price and other information checks, ordering and claiming, book repair and preservation, getting leads on book and equipment donations, finding a wide range of bibliographies and using forms online.

Report of the Advisory Commission on the Status of Women

A Guide to Developing Student, Faculty, and Professional Learning Communities to Improve Student Success and Organizational Effectiveness

Magazine of the National Association of College and University Business Officers

Creating Options for High School Success

Two-Year Colleges - 2010

Learning communities have been demonstrated to dramatically improve student outcomes by engaging students in their learning.

This book constitutes a comprehensive guide for readers who want a broad strategic view of learning communities, enabling them to identify which type of LC best meets the learning needs of their students, and the context and mission of their institution. It also provides the tools for planning, designing and implementing what the authors define as "powerful" LCs, and for understanding the assessment implications of their decisions.

The potential power of LCs is realised through effective facilitation, appropriate team-building activities, linkages, planning, and active collaboration that promotes learning of the group and the individual group members - all of which topics are covered in this volume.

This book is organised around the three themes of setting the stage, designing an LC, and building or enhancing a powerful LC, and covers three types of learning communities - student, professional (faculty, staff), and institutional LCs concerned with student learning - providing a range of tools and forms to facilitate planning. The authors also address designing and maintaining hybrid and virtual LCs.

This book is intended as a practical resource for anyone at any level in higher education who wants to champion, develop or redesign student or professional LCs, or even explore broader initiatives to develop their institution into a "learning organisation". Administrators in academic and student affairs administrators will find guidance for setting appropriate policies and allocating resources.

The book may also serve as a textbook for graduate courses in institutional leadership and policy studies, curriculum and instruction, student affairs, or assessment/evaluation.

This is a radically revised new edition of The Powerful Potential of Learning Communities: Improving Education for the Future (1999).

Human Resources Management Issues, Challenges and Trends: "Now and Around the Corner" explores and provides an updated look at some of the challenges, trends and issues HRM professionals will need to focus on now and around the corner. Like other departments in the broader organization HRM professionals will need to increasingly demonstrate how they add value and contribute to the organization's success. While the trends, challenges and issues impacting organizations and HRM professionals will continue to change over the years, the bottom-line of organization success is the clear reality that employees are their best assets and the need for effective HRM. The book is intended to help to better understand the ongoing transformation of HRM given the issues,

challenges and opportunities offered by the contributors to this book. This means the book discusses the ever evolving role of HRM professionals to include discussion of how the profession must continue to become more adaptive, resilient, quick to change direction and customer-centered in its efforts to help meet the human resource needs of contemporary organizations and their employees.

The book contributes to the ongoing dialogue and insights offered by HRM experts on what HRM professionals and their organizations can do in the face of such challenges, trends and issues in their efforts to win the talent wars.

Case Studies on Information Technology in Higher Education: Implications for Policy and Practice

Hispanic Link Weekly Report

Powerful Learning Communities

Congressional Record Index, Volume 156, A-K, L-Z

An estimated 30% of California's entering 9th graders do not finish high school. In L.A. County the dropout rate, estimated at 55%, is higher than the graduation rate. The current focus on career tech. ed. (CTE) is a measure of the intensity of the search for solutions. CTE -- with its real world relevance and project-based learning -- is a way to engage students in education that is different than a purely academic approach. This study of CTE found encouraging evidence that CTE -- in its modern, academically demanding form -- can deliver an alternative approach to learning that can keep students engaged, help improve grade point averages and prepare students for both the work world and higher education.
